TEST 1

SECTION 1

- MAN: Hello, this is Land Transport Information at Toronto Airport.
How may I help you?
- WOMAN: Oh, good morning. Um, I'm flying to Toronto Airport next week, and I need to get to a town called um, Milton. Could you tell me how I can get there?
- MAN: Milton, did you say? Let me see. I think that's about 150 miles south-west of here. In fact it's 147 miles to be exact, so it'll take you at least – say, three to four hours by road. *Example*
- WOMAN: Wow! Is it as far as that?
- MAN: Yes, I'm afraid so. But you have a number of options to get you there and you can always rent a car right here at the airport, of course.
- WOMAN: Right. Well, I don't really want to drive myself, so I'd like more information about public transport.
- MAN: OK. In that case the quickest and most comfortable is a cab and of course there are always plenty available. But it'll cost you. You can also take a Greyhound bus or there's an Airport Shuttle Service to Milton. *Q1*
- WOMAN: Hmmm, I think for that kind of distance a cab would be way beyond my budget. But the bus sounds OK. Can you tell me how much that would cost?
- MAN: Sure. Let's see, that would be \$15 one way, or \$27.50 return. . . that's on the Greyhound.
- WOMAN: Oh, that's quite cheap – great! But whereabouts does it stop in Milton?
- MAN: It goes directly from the airport here to the City Centre and it's pretty fast. But you have to bear in mind that there is only one departure a day, so it depends what time your flight gets in. *Q2*
- WOMAN: Oh, of course. Hang on, we're due to get there at 11.30 am.
- MAN: Hmmm, too bad, the bus leaves at 3.45, so you would have quite a wait – more than 4 hours. *Q3*
- WOMAN: Oh, I see. Well, what about the Shuttle you mentioned?
- MAN: OK. That's the Airport Shuttle that will take you from the airport right to your hotel or private address. It's a door-to-door service and it would suit you much better, because there's one every two hours. *Q4*
- WOMAN: So how much does that cost?
- MAN: Let's see. Yeah, that's \$35 one way, \$65 return, so I guess it's a bit more expensive than the Greyhound.

- WOMAN: Oh, that doesn't sound too bad, especially if it'll take me straight to the hotel.
- MAN: But you do need to reserve a seat. Q5
- WOMAN: OK, is it possible to make a booking right now? Through you?
- MAN: Sure.
-
- MAN: OK, I just have to fill this form out for you. So what date do you want to book this for?
- WOMAN: The 16th of October – oh, no, sorry, that's my departure date. I arrive on the 17th, so book it for then, please. Q6
- MAN: So, that's the Toronto Airport Shuttle to Milton. And this is for just one person or . . . ?
- WOMAN: Yes, just me, please.
- MAN: Right. And you said your expected time of arrival was 11.30? So if I book your Shuttle for after 12.00 – let's say, 12.30; that should give you plenty of time to, you know, collect your baggage, maybe grab a coffee? Q7
- WOMAN: Yeah, that sounds fine, as long as we land on time!
- MAN: Well, we'll take your flight details so you don't need to worry too much about that. Now, what about the fare? What sort of ticket do you want? One way or . . . ?
- WOMAN: Yes, that'll be fine, provided I can book the return trip once I'm there.
- MAN: No problem – just allow a couple of days in advance to make sure you get a seat. And what's your name, please?
- WOMAN: Janet, Janet Thomson.
- MAN: Is that Thompson spelt with a 'p'?
- WOMAN: No, it's T-H-O-M-S-O-N. Q8
- MAN: OK. And you'll be coming from the UK? What flight will you be travelling on?
- WOMAN: Oh, it's Air Canada flight number AC936, from London Heathrow. Q9
- WOMAN: Right. Now, do you know where you'll be staying? We need to give the driver an address.
- WOMAN: Yes, it's called the Vacation Motel – and I think it's near the town centre. Anyway, the address is 24, Kitchener Street – that's KITCHENER Street.
- MAN: That's fine. Right, so that's \$35 to pay please. Have you got your credit card number there?
- WOMAN: Yes, it's a VISA card, and the number is 3303 8450 2045 6837. Q10
- MAN: OK. Well, that seems to be everything. Have a good trip and we'll see you in Toronto next week!
- WOMAN: Yes, bye – oh, thanks for your help!

SECTION 2

Thank you all for coming to my talk this evening. It's nice to see so many people in the audience. For those of you who don't know very much about PS Camping, let me start by giving you some background information about the company.

The company started twenty-five years ago. It actually opened as a retail chain selling camping equipment, and then twenty years ago, it bought a small number of campsites in the UK, and began offering camping holidays. The company grew rapidly and has been providing holidays in continental Europe for the last fifteen years. Q11

If you book a camping holiday with us, you'll have a choice of over three hundred sites. In Italy we now have some 64 sites that we either own, or have exclusive use of. France is where we have the majority of sites, and we currently have a project to expand into Switzerland. We also have a number of sites in Northern Spain, particularly in the mountainous region of Picos de Europa. We've upgraded all these Spanish sites, and improved them considerably from their original three-star rating. Q12

We believe our holidays offer superb facilities for the whole family. Parents who want their children to be fully occupied for all or part of the day can take advantage of our children's activities. These are organised by our well-qualified and enthusiastic staff. Each day kicks off with a sports match, perhaps football, or volleyball, followed by an hour of drama for everyone. This may include singing or dancing, mime or other activities. In the afternoon, there's a different art activity for each day of the week including a poster competition or model making. What's more, our sites are truly child-friendly, and, with this in mind, we operate a no-noise rule in the evenings. Children's evening activities usually finish at 9.30, or occasionally 10, and from 10.30 holiday-makers are expected to be quiet in the areas where there are tents. Q13

We want nothing to go wrong on a PS Camping holiday, but if it does, we also want all customers to be insured. If you haven't organised an annual insurance policy of your own you'll need to take out the low-cost cover we offer and we require that you arrange this when you make your holiday reservation. Q14

There are many advantages to choosing PS Camping, and to recommending it to others. As a regular customer, you'll be kept informed of special offers, and your friends can benefit from ten per cent off their holiday, or book a luxury tent for the price of a standard one. In return, we'll send you a thank-you present, which you can choose from a list of high-quality items. Q15

When it comes to our tents, these are equipped to the highest standard. We really do think of every essential detail, from an oven and cooking rings fuelled by bottled gas, to mirrors in the bedroom areas. If you don't want to cook indoors, you can borrow a barbecue if you ask in advance for one to be made available, and there's even a picnic blanket to sit on outside your Q16

tent. Inside, a box of games and toys can be found, and children's tents can be hired if required. All tents have a fridge, and if you want to spend the day on the beach, for example, ask for a specially designed PS Camping cool box, which will keep your food and drinks chilled. There are excellent washing facilities at all our sites, with washing machines and clothes lines in the central areas, along with mops and buckets in case your tent needs cleaning during your stay. All sites have a café and/or a shop for those who'd rather 'eat in' than dine at a local restaurant.

Q18
Q19
Q20

SECTION 3

TUTOR: Well, you've both been looking at different styles of managing individuals in companies and the workplace. How's the research going, Philip?

PHILIP: Well, I've been looking at why individualism, I mean individual differences, are such an important area of management studies. When you think about any organization, be it a family business or a multinational company, they are all fundamentally a group of people working together. But it's what these individuals contribute to their places of work that makes you realize how important they are. Of course they bring different ideas, but it's also their attitudes and their experiences of learning. Diversity is important in these areas too.

TUTOR: So why do people behave so differently from one another at work?

PHILIP: There are lots of reasons but research has shown a lot of it comes down to personality. And the other factor is gender. It's a well known fact that men and women do lots of things in different ways, and the workplace is no different.

TUTOR: Did you look at the effects of this variation on companies?

PHILIP: Yes, I did. On the positive side, exposure to such diversity helps encourage creativity which is generally an asset to a company. But unfortunately individual differences are also the root of conflict between staff and they can lead to difficulties for management, which can sometimes be serious.

Q21
Q22
Q23

TUTOR: Thanks, Philip. So now I guess the two main things to remember here are to identify individual talent and then to utilize it. So Janice, *you* were looking at identifying different talents in workers. Do you think this is easy for managers to do?

JANICE: Well, currently teamwork is in fashion in the workplace and in my opinion the importance of the individual is generally neglected. What managers should be targeting is those employees who can take the lead in a situation and are not afraid to accept the idea of responsibility.

TUTOR: That's true Janice but unfortunately many managers think the entire notion of encouraging individuality amongst their staff is far too hard.

Q24

- JANICE: Yes, that may be true but I think one of the most important tasks of managers is to consider the needs of the individual on one hand and group co-operation and conformity on the other. It requires creative thinking on the part of management to avoid tension. Q25
- TUTOR: So Janice, what kind of people do you think companies should be looking for?
- JANICE: Well, it has to start from the very beginning when companies are looking for new employees. When the personnel department is choosing between applicants they need to look for someone who's broken the mould and can think for themselves. Instead, people making these decisions often use a range of psychological tests to see if a person is a problem solver, or will do as they're told. I'm not convinced these qualities are actually the most important. Q26
- TUTOR: So do you think being a good team player is overrated?
- JANICE: No, it's not overrated. You do need to learn the rules and learn them fast. No individual can get around this if you're working in an organization.
- TUTOR: So how should managers deal with this?
- JANICE: Rewards. When an individual demonstrates the behaviour the organisation expects, some kind of incentive can be given. What's important here is that this happens right at the beginning so new recruits learn the rules of the system immediately. Also the incentive should be something the individual actually wants, and this isn't always just money. Q27
- TUTOR: To come back to you, Philip. You were saying that recognition of good performers is essential. What else should managers be looking for?
- PHILIP: Well, managing people means you not only have an understanding of your employees, but you also recognise the culture of the organization. In fact, for some organizations creativity and individuality may be the last thing they want to see during working hours! Q28
- TUTOR: Very true.
- PHILIP: Yes, but managing people isn't as easy as it looks. For example, change in the workplace can be quite tricky, especially if there's a need to increase profit. And at times like these managers may have to give priority to profit rather than individual staff needs. Q29
- TUTOR: Yes, and that creates difficult situations for people.
- PHILIP: Yes but what's important is that managers are able to deal with quite high levels of personal stress. During times of change they should be thinking not only about the strain on their staff but take time out to think of themselves. Q30
- TUTOR: Absolutely. So what are the implications of that for. . .

SECTION 4

Good afternoon, everyone!

This is the first seminar in preparation for our archaeological fieldwork in Namibia; we are fantastically lucky to have received partial research funding for this trip from our Institute, so I shall expect 200% attention and participation from you all. First in this seminar, I'm going to give a brief introduction to contemporary research on rock art, and in the second part I'm going to give you some do's and don'ts for our fieldwork trip in April – so please listen very carefully. Q31

I'm first going to focus on the interpretation of rock art in Namibia. We are very fortunate to be going to an area where you can find some of the most important sites in the entire world. And I hope to show you how easy it is for everyone to make mistakes in looking at cultures which are different from our own – the first and most important lesson we have to learn.

In Namibia there are both paintings and engravings – that's where the surface of the rock is cut out. Many of the engravings show footprints of animals and most scholars used to think that the purpose of these was simple and obvious: this rock art was like a school book with pictures to teach children about tracks: which track belonged to which animal – giraffe, lion and so on. Q32

But there were some mysteries. First, when you look at a typical Namibian painting or engraving, you see the tracks are repeated, there are dozens of tracks for the same animal. You'd expect just one clear illustration if the reason – the aim – was to teach tracking. Q33

Now there were two more problems. Why are some of the engravings of animals *very* accurate as you'd expect – all clearly identifiable – and others quite unrealistic?

And another mystery – some of these *unrealistic* animals – that's in the engravings – seem to be half human. Some, for example, have got human faces. Many researchers now think that these were pictures the wise men engraved of themselves. They believed they could use magic to control the animals they had drawn, so the hunters could then catch them for food. Q34 Q35

This shows you some of the dangers of coming from one culture to another, as we'll be doing, without understanding it fully. Scholars imagined that children looked at rock art pictures to learn to track – just because they themselves had learnt skills from pictures; many researchers now believe that rock art had a much more complex purpose. And we'll talk more about it next week!

Now before I invite you to join in a discussion in this second part of the seminar, I'd like to make some very important points about our fieldwork – and in fact any field trip to look at rock art.

We're going to a number of sites, and we won't always be together. The single largest problem faced by people who manage the sites is – yes, I'm sure you've guessed – damage caused by visitors, even though it's usually unintentional.

Whenever you do go to a site, don't forget you can learn many things from observing at a distance instead of walking all over it. This can really help to reduce visitor pressure. People often say, 'Well, there's only two of us and just this one time', but maybe thousands of people are saying the same thing. Q36

And then some basic rules to guide you – we'll have our own camp near a village, but remember never to camp on a site if you go on your own. It may be disrespectful to the people of that culture, and certainly don't make fires, however romantic it may seem. It's really dangerous in dry areas, and you can easily burn priceless undiscovered material by doing so. Q37
Q38

So, how are we going to enjoy the rock art on our field trip? By looking at it, drawing it and photographing it – NEVER by touching it or even tracing it. Rock art is fragile and precious. Q39

Remember that climbing on rocks and in caves can destroy in a moment what has lasted for centuries. So no heroics in Namibia, please! Try to be extra careful and help others to be too.

And lastly please don't even move rocks or branches to take photographs – you should leave the site intact – I'm sure I can rely on you to do that. Q40

Well, that's about all I want to say before today's first discussion, but if you have any questions please ask them now – and don't forget you'll find some fascinating information about world-wide sites on the Internet. Right, first question then?

TEST 2

SECTION 1

WOMAN: Hello . . . motor insurance department . . .

MAN: Oh hello . . . I'd like to ask about insurance for my car.

WOMAN: Yes, of course. I'll just take a few details. What's your name?

MAN: Patrick Jones. *Example*

WOMAN: And your address?

MAN: It's 27 Bank Road. Q1

WOMAN: 27 Bank Road. Is that in Greendale?

MAN: Yes.

WOMAN: And what's your daytime phone number?

MAN: My work number is 730453.

WOMAN: And could I ask what your occupation is?

MAN: Dentist. Q2

WOMAN: OK . . . now a few details about your car . . . What size is the engine?
 MAN: It's 1200 ccs.
 WOMAN: Thank you . . . and the make and model?
 MAN: It's a Hewton Sable.
 WOMAN: Could you spell the model name please?
 MAN: Yes . . . S-A-B-L-E. Q3
 WOMAN: Ah yes . . . thanks. And when was it made?
 MAN: 1997.
 WOMAN: Lovely . . . right . . . I presume you've had a previous insurer?
 MAN: Yes.
 WOMAN: Right . . . we need to know the name of the company.
 MAN: Yes . . . it was Northern Star. Q4
 WOMAN: Thank you, and have you made any insurance claims in the last five years?
 MAN: Yes . . . one in 1999.
 WOMAN: And what was the problem?
 MAN: It was stolen . . . but . . . Q5
 WOMAN: That's fine, Mr Jones . . . that's all we need to know at the moment . . .

WOMAN: And will there be any other named drivers?
 MAN: Just the one . . .
 WOMAN: And his name?
 MAN: Simon Paynter.
 WOMAN: Could you spell the surname please?
 MAN: P-A-Y-N-T-E-R. Q6
 WOMAN: OK thank you . . . And what relationship is he to you?
 MAN: He's my brother-in-law. Q7
 WOMAN: And what will you or Mr Paynter be using the car for?
 MAN: Well . . . mainly for social use . . .
 WOMAN: Social use (*murmuring*). Will you be using it to travel to work? Q8
 MAN: Yes . . . sometimes.
 WOMAN: . . . Anything else?
 MAN: No. That's it . . .
 WOMAN: And finally . . . when would you like to start the insurance?
 MAN: I'll need it from the 31st of January.
 WOMAN: Right . . . Mr Jones . . . I'm getting a couple of quotes coming up on the computer now . . . and the best bet looks like being with a company called Red Flag. Q9
 MAN: Yeah.
 WOMAN: And that comes out at \$450 per year . . . Q10
 MAN: Well . . . that seems OK . . . it's quite a bit lower than I've been paying up to now . . .
 WOMAN: Great . . . so would you like me to go ahead with that?
 MAN: Sure . . . why not?
 WOMAN: How would you like to pay?

SECTION 2

Thank you for calling the Tourist Line. There are many different ways of getting round the city and we'd like to suggest some you may not have thought of.

How about a city trip by boat? There are four main stopping points – from west to east: stop A Green Banks, stop B City Bridge, stop C Roman Landing and stop D Newtown. Q11 Q12

You can find the main booking office at stop A.

The first boat leaves at 8 a.m. and the last one at 6.30 p.m. There are also many attractions you can visit along the river. At Stop A, if you have time, you can visit the fine 16th century palace here built for the king with its beautiful formal gardens. It's very near the booking office. Now *you* can enjoy every corner of this superb residence. Q13 Q14

Stop B Why don't you visit Tower Restaurant with its wide range of refreshments? This is a place where you can sit and enjoy the wonderful views over the old commercial and banking centre of the city. Q15 Q16

Stop C is the area where, in the first century AD, invading soldiers crossed the river; this was much shallower than it is now. That's why this area is called Roman Landing. There's an interactive Museum to visit here with a large shop which has a good range of local history books. Q17

At the furthest point of the trip, stop D, the most exciting place to visit is the new Entertainment Complex with seven-screen cinema, bowling alley and video games arcade. Q18

Besides the boat tours, there are city buses. Two companies offer special services:

The Top Bus Company runs all its tours with a live commentary in English. Tours leave from 8.30 a.m. every 20 minutes. There are departures from Central Station, Castle Hill and Long Walk. This is a hop-on hop-off service and tickets are valid for 24 hours. For further details call Top Bus on 0208 9447810. Q19

The Number One Sightseeing Tour is available with a commentary in eight languages. Buses depart from Central Station every five to six minutes from about 9 a.m. with the last bus at around 7 p.m. There are also Number One services with an English-speaking . . . Q20

SECTION 3

INTERVIEWER: We're pleased to welcome Dr Martin Merrywhether of the Antarctic Centre in Christchurch, New Zealand who has come along to talk to us today about the role of the Centre and the Antarctic Treaty.

INTERVIEWER: Now my first question is about the choice of location for the centre. Why Christchurch? Was it because of the climate?

- DOCTOR: Well actually New Zealand is the second closest country to Antarctica and Christchurch is often used on Antarctic expeditions. Q21
- INTERVIEWER: Right, so it's because of where we are . . . coupled with our historical role. So tell us – what is the main purpose of the centre?
- DOCTOR: Well . . . we have two complementary roles. One is as a scientific base for expeditions and research and the other is as an information centre.
- INTERVIEWER: Tell us something about the role as a scientific base.
- DOCTOR: We're able to provide information about what scientists should take with them to the South Pole – for example, the centre contains a clothing warehouse where expeditions are supplied with suitable clothing for the extreme conditions. Q22
- INTERVIEWER: I suppose you need a bit more than your normal winter coat!
- DOCTOR: Yes, exactly and then there's also the specialist library and mapping services.
- INTERVIEWER: Right. And which countries are actually located at the centre?
- DOCTOR: Well . . . the centre houses research programmes for New Zealand, for The United States as well as for Italy . . . there's even a US post office at the American airforce base here.
- INTERVIEWER: Really? And what does the visitor's centre offer?
- DOCTOR: Well, since very few people will ever experience the Antarctic first hand, the visitors' centre aims to recreate the atmosphere of Antarctica. There's a mock camp site where you can see inside an Antarctic tent and imagine yourself sleeping there. And the centre also acts as a showcase for the unique international co-operation which exists in Antarctica today. Q23
- INTERVIEWER: What is it actually like at the South Pole? I know you've been there on a number of occasions.
- DOCTOR: Yes, I have and each time I'm struck by the awesome beauty of the place. It's magnificent but you can really only visit it in the summer months. Q24
- INTERVIEWER: October to March.
- DOCTOR: Yes, because it's completely dark for four months of the year (*pause*) . . . and in addition it has to be the coldest place on earth.
- INTERVIEWER: Colder than the North Pole? Why's that?
- DOCTOR: Well, unlike the North Pole, which is actually a frozen sea, Antarctica is a land mass shaped like a dome, with the result that the winds blow down the slopes at speeds of up to 150 km an hour and that's what makes it so cold. And one other interesting thing is that Antarctica is the driest continent on earth, surprisingly, and so you have to drink large amounts of water when you're there. Q25
- INTERVIEWER: How old is Antarctica?
- DOCTOR: We're pretty sure it was part of a larger land mass but it broke away from the rest of the continent 170 million years ago.
- INTERVIEWER: How can you be certain of this?

DOCTOR: . . . because fossils and rocks have been discovered in Antarctica which are the same as those found in places such as Africa and Australia. Q26

INTERVIEWER: Amazing . . . To think that it was once attached to Africa . . .

INTERVIEWER: Now let's just have a look at the Antarctic Treaty. How far back does the idea of an international treaty go?

DOCTOR: Well, as far back as the 19th century, when eleven nations organised an international event.

INTERVIEWER: When was that exactly?

DOCTOR: In 1870. And it was called the Polar Research Meeting. And then, not long after that, they organised something called the First International Polar Year.

INTERVIEWER: And that took place when exactly?

DOCTOR: Over two years from 1882 to 1883. But it wasn't until the 1950s that the idea of an international treaty was proposed. And in 1959 the Treaty was actually signed. Q27
Q28

INTERVIEWER: What do you see as the main achievements of the treaty?

DOCTOR: Well, firstly it means that the continent is reserved for peaceful use. Q29 Q30

INTERVIEWER: That's Article 1, isn't it?

DOCTOR: Yes . . .

INTERVIEWER: That's important since the territory belongs to everyone.

DOCTOR: Yes but not as important as Article 5, which prohibits any nuclear explosions or waste disposal. Q29 Q30

INTERVIEWER: Which is marvellous. Well, I'm afraid we're going to have to stop there because I'm afraid we've run out of time. Thanks for coming along today and telling us all about the centre and its work.

SECTION 4

My topic is handedness – whether in different sports it is better to be left- or right-sided or whether a more balanced approach is more successful. I'm left-handed myself and I actually didn't see any relevance to my own life when I happened to start reading an article by a sports psychologist called Peter Matthews. He spent the first part of the article talking about handedness in music instead of sport, which I have to say almost put me off from reading further. But what I soon became struck by was the sheer volume of both observation and investigation he had done in many different sports and I felt persuaded that what he had to say would be of real interest. I think Matthews' findings will be beneficial, not so much in helping sportspeople to work on their weaker side, but more that they can help them identify the most suitable strategies to use in a given game. Although most trainers know how important handedness is, at present they are rather reluctant to make use of the insights scientists like Matthews can give, which I think is rather short-sighted because focusing on individual flexibility is only part of the story. Q31
Q32
Q33

Anyway, back to the article.

Matthews found a German study which looked at what he called ‘mixed-handedness’, that is, the capacity to use both left and right hands equally. It looked at mixed-handedness in 40 musicians on a variety of instruments. Researchers examined a number of variables, e.g. type of instrument played, regularity of practice undertaken and length of time playing instrument . . . and found the following: keyboard players had high levels of mixed-handedness, whereas string players like cellists and violinists strongly favoured one hand. Also those who started younger were more mixed-handed.

Q34

Matthews also reports studies of handedness in apes. Apes get a large proportion of their food by ‘fishing’ ants from ant hills. The studies show that apes, like humans, show handedness – though for them right- and left-handedness is about equal, whereas about 85% of humans are right-handed. Studies showed that apes consistently using the same hand _
fished out 30% more ants than those varying between the two.

Q35

Matthews started researching several different sports and found different types of handedness in each. By the way, he uses ‘handedness’ to refer to the dominant side for feet and eyes as well as hands. Anyway, his team measured the hand, feet and eyes of 2,611 players and found that there were really three main types of laterality: mixed – you work equally well on both sides – both hand and eye; single – you tend to favour one side but both hand and eye favour the same side; and cross-laterality – a player’s hands and eyes favour only one side but they are opposite sides. Let’s start with hockey. Matthews found that it was best to be mixed-handed – this is because a hockey stick must be deployed in two directions – it would be a drawback to have hand or eye favouring one side. An interesting finding is that mixed-handed hockey players were significantly more confident than their single-handed counterparts. Things are slightly different in racket sports like tennis. Here the important thing is to have the dominant hand and eye on the one side. This means that there is a bigger area of vision on the side where most of the action occurs. If a player is cross lateral the racket is invisible from the dominant eye for much of the swing. It means that they can only make corrections much later . . . and often the damage has been done by then.

Q36

Q37

Q38

Q39

And moving to a rather different type of sport which involves large but precise movements – gymnastics. It’s been found that cross hand-eye favouring is best. The predominant reason for this is because it aids balance – which is of course absolutely central to performance in this sport.

Q40

TEST 3

SECTION 1

AGENT: Good morning.

STUDENT: Oh, good morning. Is this . . . er . . . room number 26?

AGENT: Yes, that's right.

STUDENT: So is this the Student Job Centre?

AGENT: It certainly is. How can I help you?

STUDENT: Well, actually I'm looking for a job – a part-time job. Do you have anything available at the moment?

AGENT: Ah, yes . . . Are you a registered student? I'm afraid this service is only available to full-time students.

STUDENT: Yes . . . I am. I'm doing a degree in Business Studies. Here's my student card.

AGENT: Which year are you in?

STUDENT: Well . . . I've been at uni for four years but I'm in the Third Year because I took last year off.

AGENT: Right . . . well, let's just have a look at what positions are available at the moment. There's a job working at reception desk at the Sports Centre, for three evenings a week – that's Wednesdays, Thursdays and Fridays.

STUDENT: That sounds like fun but unfortunately I have evening lectures so that's not possible, I'm afraid. Is there anything during the day?

AGENT: OK, that's no good then. Um. What about cleaning? There's a position for a cleaner at the Child Care Centre.

STUDENT: Right . . .

AGENT: But you'd need to be there at 6 am. Does that appeal?

STUDENT: Six o'clock in the morning! Oh, that's far too early for me, I'm afraid. I'd never make it that early in the morning.

AGENT: Mmm . . . Well – there was a position going in the Computer Lab. for three days a week that might be OK. Ah, here it is! No, it's in the Library, not the Lab., Clerical Assistant required – I think it mostly involves putting the books back on the shelves. Oh no – hang on. It's for Wednesday and Friday evenings again.

STUDENT: No – I can't manage that because of the lectures.

AGENT: OK, I'm getting the idea. Look, I'll just get a few details from you anyway, and then we can check through the list and see what comes up.

Example

Q1

Q2

Q3

Q4

Q5

AGENT: We'll fill in the personal details on this application form first, if that's OK?

STUDENT: Yes, that's fine.

AGENT: Now, what's your name again?

- STUDENT: Anita Newman – that's N-E-W-M-A-N.
AGENT: And your address, Anita?
STUDENT: I'm in one of the Halls of Residence for post-graduate students, you know, International House. *Q6*
AGENT: OK – that's easy. What's your room number there?
STUDENT: Room B569 – no sorry B659. I always get that wrong. I haven't been living there very long. *Q7*
AGENT: Do you have any other skills? Typing, languages, that sort of thing?
STUDENT: Well, I speak some Japanese.
AGENT: Right, I'll make a note of that. Now – let's see what else is available. What do you think of administrative work? There is a position for an Office Assistant at the English Language Centre. *Q8*
STUDENT: That sounds interesting.
AGENT: It's for 3 days a week – Monday, Friday and Saturday mornings. Interested?
STUDENT: Mmm. I was hoping to have Saturdays free. But I need the work so . . . can you tell me what the job involves?
AGENT: Yes, sure. It says here that you'll be required to deal with student enquiries and answer the phone. *Q9*
STUDENT: I'm sure I can handle all that without a problem.
AGENT: Great. Well, would you like me to arrange an interview for you? Say, Friday morning, around ten?
STUDENT: Could we make it a bit later? Unfortunately, I've got something to do at ten. Would that be OK?
AGENT: Not a problem. How about eleven thirty? Hope it works out for you *Q10*
STUDENT: Me too. And thanks for all your help.

SECTION 2

Good morning. I'm very pleased to have been invited along to your club to talk about our Charity Sponsored Walking Holiday for Education Aid. I'll start by giving you a brief overview of what it entails. First of all let me explain what we mean by 'sponsored' here. This is where people promise to donate money to the charity if you achieve your goal, in this case to walk a certain number of miles.

Basically we are organizing a ten-day holiday, from the sixth to the sixteenth of November, with eight days actual walking, trekking in the Semira Mountains. *Q11*

Let's have a look at some of the details. We require you to raise sponsorship money of at least \$3,200, paying \$250 of it up front as a deposit and the rest in stages throughout the year. Out of this about thirty-five per cent will go on your expenses, and that leaves sixty-five per cent guaranteed to go to the charity. *Q12*

Which brings me to the most important part. This trek is being specifically organized to help education in the Semira region. Last year we helped train teachers for the disabled, and this year we're focusing on the pupils. Each of the walkers' sponsorship money will go to help an individual special needs pupil in one of the mountain schools. In the second part of the talk I'll be giving you a lot more details, but back to the basic information. Q13

Age limits. This is the second time we have run this kind of holiday and um, on the first we even had an eighty-year old, but we found it was wise to establish limits this time. You have to be at least eighteen and the top limit is now seventy, though you need to obtain a health certificate from your doctor if you are over sixty years old.

Now, the Semira Mountains are among the highest in the world but you mustn't be too daunted, we will mainly be trekking in the foothills only, although there will be spectacular views even in the foothills. However, you will need to be extremely fit if you aren't now and you're interested in coming with us. You have plenty of time to get into shape. You will be sleeping in tents so you must have quite a bit of equipment with you but you will be helped by local assistants. Your bedding and so forth will be carried by them. We ask that you only walk with a small rucksack with needs for the day. Q14
Q15

I don't think I've really said enough about the marvellous area you'll be walking in. Let's have a look at some of the sights you'll be seeing. Apart from these spectacular snow-covered peaks and valleys, there are marvellous historic villages. The area has been famous for centuries for making beautiful carpets, although recently there has been a trend to move into weaving blankets and wood carving. The people are extremely friendly and welcoming. We deliberately keep the parties small in size to minimize disruption to people and landscape. Q16

I hope that there are still some people interested. I will be distributing leaflets at the end where you can find out more information, but just for the moment I'll outline the itinerary, the main high points of the holiday. Obviously, you'll start by flying out to Kishba, the capital city, on Day One. After a couple of days to acclimatize yourself, you'll start the trek on Day Three walking through the enormous Katiba Forest which will take the whole of the day. Day Four takes us higher up, going through the foothills past a number of villages and visiting a school for the disabled in Sohan. Then you have a rest day, that's Day Five, before going to the spectacular Kumi Temple with twelfth-century carvings, set in a small forest by a lake and that's Day Six, the highlight for many. We stay near there for Day Seven because then comes the hardest day, walking through very mountainous country, but culminating in a swim in the Parteh Falls. This is the highest waterfall in the region. Day Nine is much easier, with part of the day spent in a village where they make some of the gorgeous red blankets. Then back down to Kishba and the journey home. Q17
Q18
Q19
Q20

So you can see it's a pretty packed timetable . . .

SECTION 3

- SIMON: Thanks to all of you for coming along today to hear about how the robotic float project is helping with ocean research. Well, first of all we'll look at what a robotic float does and its use. So let's start with the device itself. It looks a bit like a cigar and it's about one and a half metres long. More importantly it's full of equipment that's designed to collect data. So, it can help us in building up a profile of different factors which work together within the world's oceans. Q21
- STUDENT 1: Sounds like a big project – isn't it too big for one country to undertake?
- SIMON: That's quite true but this project is a really good example of international co-operation. Over the last five years scientists from thirteen countries have been taking part in the project and launching floats in their area of ocean control. And next year this number will rise to fourteen when Indonesia joins the project. Q22
- STUDENT 2: That's impressive.
- SIMON: But let's move onto how floats work.
- SIMON: The operational cycle goes like this. Each of the floats is dropped in the ocean from a boat at a set point and activated from a satellite. Q23
Then the float immediately sinks about 2,000 metres. . . that's two whole kilometres down in the water. It stays at this depth for about 10 days and is carried around by the currents which operate in the ocean at this level. During this time it's possible for it to cover quite large distances but the average is fifty kilometres. Q24
- STUDENT 2: So what is it actually recording?
- SIMON: Well at this stage nothing, but as it rises to the surface it collects all sorts of data, most importantly variations in salinity, that's salt levels, and the changes in temperature, a bit like underwater weather balloons. Q25
Then when it gets back to the surface all the data it's collected is beamed up to the satellite. After about five hours on the surface the float automatically sinks, beginning the whole process again.
- STUDENT 1: What happens to the data?
- SIMON: Well the information is transferred direct to onshore meteorological stations. . . like our one in Hobart. . . and within four hours the findings can be on computers and they can be mapped and analysed.
-
- STUDENT 2: You say you're building models of the world's ocean systems but how're they going to be used, and more importantly, when?
- SIMON: Some of the data has already helped in completing projects. For example, our understanding of the underlying causes of El Niño events is being confirmed by float data. Another way we're using float data is to help us to understand the mechanics of climate change, like global warming and ozone depletion. That's part of an ongoing variability study but the results are still a long way off. Q26
Q27

However, this is not the case with our ocean weather forecasting. Because we know from the floats what the prevailing weather conditions will be in certain parts of the ocean, we can advise the navy on search and rescue missions. That's happening right now and many yachtsmen owe their lives to the success of this project. In addition, the float data can help us to look at the biological implications of ocean processes. Q28

STUDENT 1: Would that help with preserving fish stocks? Q29

SIMON: Yes, and advising governments on fisheries legislation. We're well on the way to completing a project on this. We hope it will help to bring about more sustainable fishing practices. We'll be seeing the results of that quite soon.

STUDENT 2: It sounds like the data from floats has lots of applications.

SIMON: Yes it does. It's also a powerful agricultural tool. If we were aware of what the weather would be like, say, next year, we could make sure that the farmers planted appropriate grain varieties to produce the best yield from the available rainfall.

STUDENT 1: That sounds a bit like science fiction, especially when now we can't even tell them when a drought will break.

SIMON: I agree that this concept is still a long way in the future, but it will come eventually and the float data will have made a contribution. Q30

SECTION 4

Good morning everyone. Today's lecture forms part of the Hospitality and Tourism module. Last week I looked at the economy end of the hotel business; this week I'm going to discuss the luxury end of the market. Let's consider the following scenario . . .

You wake up in the middle of the night in a strange hotel miles away from home, disoriented most probably from jet lag, when even the most expensive surroundings can seem empty and Q31 dispiriting. You have paid a great deal of money to stay in this first-class hotel with its contemporary technology, but according to recent research carried out by an international travel and public relations company, all is not well. The research suggests that even the most opulent, luxurious hotels seem to have underestimated the most basic needs of their customers – be they travelling for work or pleasure: the need to feel at home in surroundings Q32 which are both familiar and inviting.

Do these findings, however, apply only to hotels situated in particular areas? Is it possible that the external environment can affect a guest's well-being? The company's research covered a whole range of different hotel types, both independent hotels and those which are part of Q33 large chains. They investigated chic so-called boutique hotels in the heart of downtown business districts, stately mansions located in the depths of beautiful countryside, and plush hotels built at the edge of tropical beaches surrounded by palm trees and idyllic blue ocean. And the research concluded that what was *outside* the hotel building simply didn't matter. Q34 This is a fascinating revelation and those of you hoping to move into careers in the travel and leisure industry would be well advised to look at the findings in more detail.

But back to the main point of this lecture . . . the need to feel at home. What can the hotel industry do about it? And is the very idea so subjective that it's impossible to do *anything* about it on a global basis?

However, nothing stands still in this world. One company has come up with the slogan 'Take Your Home With You', and aims to provide clients with luxury serviced apartments. Those in the business travel industry maintain that these serviced apartments dispense with all the unwanted and expensive hotel services that business travellers don't want, while maximising the facilities they do want. For example, not only sleeping and living accommodation, but also a sleek modern kitchen that allows guests to cook and entertain if they wish, at no additional cost. The attractions of such facilities are obvious and it'll be interesting to see whether the company manages to establish a trend all over the world and make a lasting impact on the luxury accommodation market.

Q35
Q36
Q37

Now, finally I want to consider the psychology underpinning the traditional holiday hotel industry. As a hotelier, how do you go about attracting people to give up the security of their own home and entrust themselves to staying in a completely strange place and sleeping in an unfamiliar bed? Firstly, hotels exploit people's need to escape the predictability of their everyday lives. For a few days people can pretend they are free of responsibilities and can indulge themselves. Secondly, there is something very powerful in our need to be pampered and looked after; it's almost as if we return to being a baby, when everything was done for us and we felt safe and secure. And not far removed from this is the pleasure in being spoilt and given little treats – like the miniscule bottles of shampoo and tiny bars of soap, the chocolate on your pillow at night – and we actually forget that we are paying for it all!

Q38
Q39
Q40

Next week, I'm going to look at eco-hotels, a fairly new phenomenon but increasingly popular . . .

TEST 4

SECTION 1

- OFFICER: Yes, what can I do for you?
STUDENT: My friend is in homestay . . . and she really enjoys it . . . so I'd like to join a family as well.
OFFICER: Okay, so let me get some details. What's your name?
STUDENT: My name is Keiko Yuichini.
OFFICER: Could you spell your family name for me?
STUDENT: It's . . . Yuichini, that's Y-U-I-C-H-I-N-I.
OFFICER: And your first name?
STUDENT: It's Keiko. K-E-I-K-O.

Example

Q1

OFFICER:	That's Keiko Yuichini . . . okay . . . and you're female. And your nationality?	
STUDENT:	I'm Japanese.	
OFFICER:	Right and could I see your passport, please?	
STUDENT:	Here it is . . .	
OFFICER:	Okay . . . your passport number is JO 6337 . . . And you're how old?	Q2
STUDENT:	I'm twenty-eight years old.	
OFFICER:	Now, you live at one of the colleges . . . which one?	
STUDENT:	Willow College, umm . . . Room 21C	
OFFICER:	Right, 21C Willow College, and how long are you planning on staying with homestay?	
STUDENT:	About four months . . . longer if I like it . . .	Q3
OFFICER:	And what course are you enrolled in?	
STUDENT:	Well, I've enrolled for twenty weeks in the . . . um . . . Advanced English Studies because I need help with my writing . . . and I'm nearly at the end of my first five-week course.	Q4
OFFICER:	Okay . . . Do you have any preference for a family with children or without children?	
STUDENT:	I prefer . . . I mean I like young children, but I'd like to be with older people . . . you know . . . adults . . . someone around my age.	Q5
OFFICER:	Okay, and what about pets?	Q6
STUDENT:	I am a veterinarian so that's fine . . . the more the better.	
OFFICER:	All right, now what about you? Are you a vegetarian or do you have any special food requirements?	
STUDENT:	No, I am not a vegetarian . . . but I don't eat a lot of meat . . . I really like seafood.	Q7
OFFICER:	And what are your hobbies?	
STUDENT:	I like reading and going to the movies.	
OFFICER:	Do you play any sports?	
STUDENT:	Yes, I joined the handball team, but I didn't like that . . . so I stopped playing. Now I play tennis on the weekend with my friends . . .	Q8
OFFICER:	All right, let's see, name, age, now the location. Are you familiar with the public transport system?	
STUDENT:	No . . . I'm not really because I have been living on campus . . . I've been to the city a few times on the bus, but they are always late.	
OFFICER:	What about the trains?	
STUDENT:	I like catching the train . . . they are much faster . . .	Q9
OFFICER:	Now, let me go check on the computer and see who I've got . . . Listen, leave it with me . . . I'll check my records and I'll give you details this afternoon.	Q10
STUDENT:	Thank you for helping me . . .	
OFFICER:	It's a pleasure. Bye.	
STUDENT:	Bye.	

SECTION 2

Welcome to all of you . . . can everybody see and hear me? . . . Good . . . I'm Sally, your guide for this tour of the Bicentennial Park . . . I hope that you're all wearing your most comfortable shoes and that you can keep up the pace. So let's get under way on our tour around this wonderful park. Q11

I'll start today with some general background information. There used to be a lot of factories in this area until the 1960s. Creating the park required the demolition of lots of derelict buildings on the site, so most of the exciting park space all around you was originally warehouses and storehouses. Q12

The idea of building a public park here was first discussed when a property developer proposed a high-rise housing development, but the local community wasn't happy. If the land was to be cleaned up, they wanted to use the site for recreation. Residents wanted open space for outdoor activities, rather than housing or even an indoor sports complex. Q13

Now to the Bicentennial Park itself. It has two areas, a nature reserve and a formal park with man-made features and gardens. The tall blue-and-white building in front of us is called The Tower and is the centre point for the formal gardens. It stands twelve metres high, so follow me up the stairs to where we can take advantage of the fantastic views. Q14

Well, here we are at the top of The Tower, and we're going to look at the view from each direction. Out to the east, the large buildings about a kilometre away are on the Olympic site. There's an indoor arena for gymnastics, a stadium for track and field and a swimming pool for races and synchronised swimming and also diving. If you look carefully down there, you can see the train lines. The Olympic site has its own station to encourage the use of public transport. There is also a car park, but it only holds a limited number of cars. Q15

The formal park has some specially-created water features. If you look out here to the south, you can see a circular ornamental pond.

And around to the west, you can relax and sit on a bench to smell the flowers in the rose garden, and finally up to the north, if you look in front of you now, there's a lake with a small island in the centre, you can hire rowing boats at the boat shed, which you can't see from here, but if you look through the trees, you can see the café, which has lovely views across the water. OK, let's climb down now. We will go now and have a look at the nature reserve section of the park, which has opened up natural wetland to the public. Q16

The Mangroves have been made more accessible to visitors by the boardwalk built during the park's upgrade. You'd think that people would come here to look at the unusual plant life of the area, but in fact it's more often used for cycling and is very popular with the local clubs. Q17

This is the far end of the park and over there you can see the Frog Pond, a natural feature here long before the park was designed. Just next to it we have our outdoor classroom, a favourite spot for school parties. The area is now most often used by primary schools for biology lessons. Q19

And finally let's pass by the Waterbird Refuge. This area is in a sheltered part of the estuary, that's why the park's viewing shelter is a favourite spot for bird watchers who can use it to spy through binocuiars. You can watch a variety of water birds, but most visitors expect to see black swans when they come to the shelter. You might spot one yourself right now! Q20

Well, here we are back at our starting point, the Visitor Centre.

SECTION 3

JULIE: Remind me, Trevor . . . how long is the presentation?
 TREVOR: Dr White said three per hour.
 JULIE: So about twenty minutes?
 TREVOR: Well . . . it'll be fifteen minutes per presentation.
 JULIE: And five minutes for questions. Q21
 TREVOR: And is this one going to be assessed? Q22
 JULIE: No . . . not this time round . . . because it's the first one . . . you know.
 TREVOR: Good news.
 JULIE: Well, Trevor, what are we going to include?
 TREVOR: Well . . . Do you think we ought to give some historical background?
 JULIE: Oh no . . . definitely not . . . we won't have time!
 TREVOR: OK . . . but I think we ought to say something about the geographical Q23
 location . . . cos not a lot of people know where the islands are . . .
 JULIE: Yes . . . OK . . . I'll take notes, shall I?
 TREVOR: Yeah, that'll be a help . . .
 JULIE: So . . . geographical location . . .
 TREVOR: Then we ought to give an overview of the whole education system.
 JULIE: Shouldn't we say something about the economy . . . you know
 agricultural produce . . . minerals and so forth?
 TREVOR: Well . . . Dr White said we shouldn't go into that sort of detail.
 JULIE: But it's pretty important when you think about it . . . you know
 because it does influence the education system . . . Q24
 TREVOR: Look . . . let's think about that one later shall we? Let's see how we're
 doing for time . . .
 JULIE: OK . . . so . . . general overview of education Q25
 TREVOR: Of course . . . and then the role of English language . . . Q26
 JULIE: Nope . . . that goes in the Language Policy Seminar . . . don't you
 remember?
 TREVOR: Are you sure?
 JULIE: Positive.

- TREVOR: All right . . . so those are the topics we're going to be . . . to be covering . . .
-
- JULIE: We need to think about what to prepare . . . Dr White said he wanted us to use plenty of visuals and things and we might as well try them out when we're not being assessed . . .
- TREVOR: Well, the most important thing is the overhead projector . . . Q27
- JULIE: No problem . . . we'll get that from the media room . . . must remember to book it . . .
- TREVOR: Well . . . we'll need a map of course.
- JULIE: Probably two . . . one of the islands . . . large scale.
- TREVOR: And one of West Africa.
- JULIE: Well, the West African one is no problem . . . There's one in the Resources Room. Q28
- TREVOR: Oh yeah, of course, the resources room; the islands are going to be more of a problem.
- JULIE: Tell you what . . . there's a very clear map of Santiago in that tourist brochure I showed you last week. Don't you remember it?
- TREVOR: Oh yeah . . . that's right; we can just use the tourist brochure.
- JULIE: We also need statistics . . . on several different things.
- TREVOR: Literacy rates.
- JULIE: Yes, and school places.
- TREVOR: How about the encyclopaedia?
- JULIE: Nah . . . not up-to-date enough!
- TREVOR: Mmm . . . why don't we call the embassy? Q29
- JULIE: Oh . . . someone's enthusiastic!
- TREVOR: Well . . . if something's worth doing . . .
- JULIE: I know . . . it's worth doing well . . . OK.
- TREVOR: We can find out statistics on school places from them as well. Q30
- JULIE: Might as well.
- TREVOR: Look, Julie, it's almost time for our tutorials . . . we can meet again on Monday . . . but we need to prepare some stuff before then . . .

SECTION 4

In today's lecture, I'm going to talk about Monosodium Glutamate, or MSG, as it's more commonly known. Now, MSG as you probably know, is a flavour enhancer which is used particularly in Chinese and Japanese cooking. Today I am going to explore why it is so popular in these cuisines and, more importantly, how does it enhance the flavour of food? Q31

The main reason why MSG is more commonly used in Japanese meals is tradition. For many thousands of years the Japanese have incorporated a type of seaweed known as *kombu* in their cooking, as they discovered it had the ability to make food taste better. But it wasn't

until 1908 that the ingredient in *kombu* which was responsible for the improvement in flavour was actually discovered to be glutamate by scientists working there. Q32

From 1908 until 1956, glutamate was produced commercially in Japan by a very slow and expensive means of extraction. It was in 1956 that the speed of the process was improved, and industrial production increased dramatically and still continues to increase to this day. Q33
In fact, hundreds of thousands of tonnes of MSG are produced all over the world today.

So what exactly is MSG? Well, Monosodium Glutamate contains seventy-eight point two per cent glutamate, twelve point two per cent sodium and nine point six per cent water. Q34
Glutamate is an amino acid that can be found naturally in all protein-containing foods, erm, so this includes food such as meat and cheese. Q35 Q36

It is widely known that Chinese and Japanese food contains MSG but many people don't seem to be aware that it is also used in foods in other parts of the world. For example it is found in commercially made Italian pizzas, in American fast food and in Britain MSG is used in things like potato crisps.

So, how exactly does MSG work? Well, in the Western world, we commonly talk of four 'tastes', and I'm sure you're all familiar with the concepts of sweet, sour, bitter and salt. Well, in 1908, Kikunae Ikeda identified a fifth 'taste'. And it is thought that MSG intensifies this Q37 naturally occurring 'taste' in some food. It does make perfect evolutionary sense that we should have the ability to detect or taste glutamate because it is the amino acid which is Q38 most common in natural foods.

John Prescott, an associate professor at the University of Chicago, suggests that this fifth taste serves a purpose just as the other tastes do. He suggests that it signals to us the presence of protein in food, in the same way that sweetness indicates that a food contains energy-giving carbohydrates. Bitterness, he says, alerts us of toxins in the food, while sourness warns us of Q39 spoilage and saltiness signals the presence of minerals. Q40

So, what else do we know about this fifth taste . . .

Model and sample answers for Writing tasks

TEST 1, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 5.5** score. Here is the examiner's comment:

This answer focuses on the key features of the information, clearly grouping the countries, using supporting figures and presenting an overview. However, there is no clear reference to what the percentages represent and key comparisons need more expansion.

Information is organised with clear signalling and some effective referencing and linking, although not all ideas are clearly linked and the overall progression is achieved by repetition in the final section.

The range of vocabulary is rather narrow and just sufficient for the task. The attempt to paraphrase the rubric shows limited flexibility. There are several spelling and word form errors, and quite a lot of repetition. Similarly, the range of sentence forms is not wide, with few examples of complex structures. However, apart from one or two errors in basic grammar, simple structures are accurate and easily understood.

Different countries' consumer spendings are quite different. The table shows the vary consumer spending on a seires of intems in the five countries, namely, the Ireland, Italy, Span, Sweden and Turkey in 2002.

Food, drinks and tobacco were in the most important position on consumer spending in all of the five countries, and in a different percentage. In Ireland and turkey. they were near 30%, while in the other three countries they are under 20%.

Clothing and footwear were the second important consumer spending in these countries. In Italy, they got 9%, and in Sweden, they were 5.4%. In the other three countries, the figure were very similar, all were near 6.5%.

The last consumer spending were leisure and education. In Turkey, they were 4.35%, and in the other four countries the figure were under 4%.

In conclusion, it can be said that in 2002, food, drinks and tabacoo were the most important consumer spending in the five countries, and the different countries' consumer spending were quite different.

TEST 1, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The relative importance of natural talent and training is a frequent topic of discussion when people try to explain different levels of ability in, for example, sport, art or music.

Obviously, education systems are based on the belief that all children can effectively be taught to acquire different skills, including those associated with sport, art or music. So from our own school experience, we can find plenty of evidence to support the view that a child can acquire these skills with continued teaching and guided practice.

However, some people believe that innate talent is what differentiates a person who has been trained to play a sport or an instrument, from those who become good players. In other words, there is more to the skill than a learned technique, and this extra talent cannot be taught, no matter how good the teacher or how frequently a child practices.

I personally think that some people do have talents that are probably inherited via their genes. Such talents can give individuals a facility for certain skills that allow them to excel, while more hard-working students never manage to reach a comparable level. But, as with all questions of nature versus nurture, they are not mutually exclusive. Good musicians or artists and exceptional sports stars have probably succeeded because of both good training and natural talent. Without the natural talent, continuous training would be neither attractive nor productive, and without the training, the child would not learn how to exploit and develop their talent.

In conclusion, I agree that any child can be taught particular skills, but to be really good in areas such as music, art or sport, then some natural talent is required.

TEST 2, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The graph illustrates changes in the amounts of beef, lamb, chicken and fish consumed in a particular European country between 1979 and 2004.

In 1979 beef was by far the most popular of these foods, with about 225 grams consumed per person per week. Lamb and chicken were eaten in similar quantities (around 150 grams), while much less fish was consumed (just over 50 grams).

However, during this 25-year period the consumption of beef and lamb fell dramatically to approximately 100 grams and 55 grams respectively. The consumption of fish also declined, but much less significantly to just below 50 grams, so although it remained the least popular food, consumption levels were the most stable.

The consumption of chicken, on the other hand, showed an upward trend, overtaking that of lamb in 1980 and that of beef in 1989. By 2004 it had soared to almost 250 grams per person per week.

Overall, the graph shows how the consumption of chicken increased dramatically while the popularity of these other foods decreased over the period.

TEST 2, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 7.5** score. Here is the examiner's comment:

This is a thoughtful and well-argued response to the task. The candidate examines the opposing views of the topic and gives a clear opinion that is well developed and supported. To reach the highest band a more clearly-signalled conclusion would be needed. The argument is well organised and linking is well managed throughout. The development of the answer is not helped, however, by poor control of paragraphing which sometimes confuses the links across different sections. This is a weak feature of the script which limits the overall rating. In contrast, an excellent range of vocabulary is used with a sophisticated level of control and only rare slips. The range of structures is also wide and most sentences are accurate and precise, but there are some errors and omissions. These, however, are only minor and do not affect communication.

Fixing punishments for each type of crime has been a debateable issue. There are many arguments supporting both views, those for and those against fixed punishments.

On the one hand, fixed punishments will have a deterring effect on society. Individuals knowing that they will be subject to a certain punishment if they are convicted with a given crime, will reconsider committing this act in the first place.

This deterring effect also leads to social stability and security, through minimising the number of crimes committed.

If people knew they would be able to convince the court or the jury of a reason for having committed the crime they are accused of, penal decisions would be largely arbitrary. This would result in criminals getting away with their crimes and into a high level of injustice caused by the subjective approach of different courts.

On the other hand, taking the circumstances of a crime and its motivation into consideration is a prerequisite for establishing and ensuring justice and equity.

A person killing in self-defense cannot be compared to a serial killer, moving from one victim to the next. In my opinion an intermediary position between both solutions is the perfect way to establish and ensure justice and equity.

There have to be fixed punishments for all crimes. However, criminal laws have to provide for a minimum and a maximum for the punishment and the laws also have to foresee certain cases of exemptions.

An example for setting minimum and maximum penalties is Competition Law where a person being held liable of a crime under this law will be convicted to pay a fine, according to the harm caused by the violation and the profit gained by the violator through committing the crime.

As for the exemptions, in some countries the law exempts thieves stealing food during a period of famine taking into consideration the distress and hunger.

Also, a person killing in self defense will be exempted from punishment.

TEST 3, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 6.5** score. Here is the examiner's comment:

This answer clearly presents and illustrates the key points of the information. The writer groups the data effectively and draws clear comparisons, although these could be more appropriately extended in the overview. Information is well organised across the response and a range of linking devices is used.

The opening paragraph, however, is an inadequate paraphrase of language given in the task, and although there are some appropriate collocations in the response, overall the range of vocabulary is rather restricted. Control is good, however, with few examples of error.

A variety of structures is used with some fluency. There are occasional errors in punctuation and there are also some omissions and errors in grammar, but these tend to be minor and do not reduce communication.

The chart gives information about the percentage change in average house prices in five different cities located in five different countries over 12 year period between 1990 and 2002 compared with the average house prices in 1989.

According to the chart, during the period from 1990 to 1995 the average prices of houses in three cities decreased significantly by five percent in New York (U.S.A) and about 7.5 percent in both Tokyo (Japan) and London (UK). While the average house prices increased slightly in two cities Madrid (Spain) and Frankfurt (Germany) by about 1.5 percent and 2 percent respectively.

As far as the next period (1996-2002) is concerned, it is clear that the average house prices decreased only in Tokyo (Japan) by 5 percent. In contrast the average house prices increased in the rest of cities. In New York it increased considerably by 5 percent, in Madrid it increased slightly by 4 percent, in Frankfurt it increased by 2 percent.

London has the largest increase in the average house price over the 6-year period from 1996 to 2002 as it increased dramatically by 11 percent.

All in all, there are a wide differences in house prices between the five cities which illustrated in this chart. These differences may be a result of the number of population or the number of houses required in a certain city.

TEST 3, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Nowadays many adults have full-time jobs and the proportion of their lives spent doing such jobs is very high. So feelings about one's job must reflect how an individual feels about his or her life as a whole, and because of this, job satisfaction is indeed very important for the wellbeing of that person.

Employees get job satisfaction in a number of ways. Firstly, a person needs to feel that they are doing valued and valuable work, so positive feedback from superiors is very important in this respect. A sense of fulfilment is also encouraged if a worker feels the job is worth doing because it contributes to the society or the economy as a whole. Secondly, when someone feels they are improving or developing their skills through training opportunities, for example, then there is a sense of progression and purpose that rewards a worker. The sense of belonging to a team or a working community also contributes to job satisfaction because colleagues help each other to enjoy their working lives. Satisfaction is also increased by a sense of responsibility for and loyalty to a team.

Of course not everyone enjoys their work. Hard economic realities mean that many people have little choice in the kind of job they can get. In some cases an employee is working in a job that suits neither their skills nor their personality. Some jobs are repetitive and boring, and labour relations may be poor and lead to resentment and insecurity rather than to job satisfaction.

However, even though it is unlikely that all workers do feel happy in their work, I think it is not unrealistic to promote more job satisfaction in any job. If the factors identified above are implemented, then any job can be improved and more workers can feel greater degrees of job satisfaction.

TEST 4, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The charts compare the sources of electricity in Australia and France in the years 1980 and 2000. Between these years electricity production almost doubled, rising from 100 units to 170 in Australia, and from 90 to 180 units in France.

In 1980 Australia used coal as the main electricity source (50 units) and the remainder was produced from natural gas, hydro power (each producing 20 units) and oil (which produced only 10 units). By 2000, coal had become the fuel for more than 75% of electricity produced and only hydro continued to be another significant source supplying approximately 20%.

In contrast, France used coal as a source for only 25 units of electricity in 1980, which was matched by natural gas. The remaining 40 units were produced largely from oil and nuclear power, with hydro contributing only 5 units. But by 2000 nuclear power, which was not used at all in Australia, had developed into the main source, producing almost 75% of electricity, at 126 units, while coal and oil together produced only 50 units. Other sources were no longer significant.

Overall, it is clear that by 2000 these two countries relied on different principal fuel sources: Australia relied on coal and France on nuclear power.

TEST 4, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a Band 5 score. Here is the examiner's comment:

This answer is less than 250 words and it does not address all parts of the question, so it loses marks. Nevertheless, some relevant ideas and a position on the issue are presented. Ideas are organised and the structure of the answer is clearly signalled. Paragraphing is not always logical, however. There is some good use of linkers, but there is also a lot of repetition due to inadequate use of referencing and substitution. The high level of repetition ['knowledge and skills' is repeated nine times] also indicates limitations in the range of vocabulary although, apart from language given in the rubric, there is just sufficient additional vocabulary for the task. The answer includes attempts at complex sentence forms, but these are generally awkwardly phrased and tend to require some re-reading to understand. Nevertheless, there are examples of accurate complex structures.

What knowledge and skills should universities provide has been argued for many years. Some people think that the true function of universities provide knowledge for their own purpose, but nowadays, more and more people point out that universities should provide graduates with the knowledge and skills according to the workplace.

The first reason for universities should provide these knowledge and skill is the students' needs. Obviously, the most of the students go to university purpose of is to get some knowledge

and skills which could make them have the ability to get a job. If a university does not provide these knowledge and skills, the students might not get a job and they would be very disappointed. As a result, the university would lose its students.

Moreover, providing knowledge and skills needed in the workplace makes a university progress. The new skills and information always are initiated in the workplace, so focusing on the needs of the workplace the university could get sound strategies to do research and make it more modernization.

Lastly, providing these knowledge and skills could benefit our country which usually gives a financial support to universities. Having these knowledge and skills, students are more easy to get a job, and this can make our countries' economy strong.

In conclusion, it can be said that providing the knowledge and skills which the workplace needs is every universities' basic function.

TEST A, WRITING TASK 1 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Dear Jenny,

I hope this finds you and your family well, and I'm sorry I haven't been in touch recently. I'm writing now to let you know about my new job.

You remember that I was working for that construction company a few miles outside the city? Well, I just got so fed up with it – I was working really long hours and, to be honest, the pay wasn't great. So basically I applied for a job at a new international company that was looking for admin staff for a new branch in the city centre.

I was a bit nervous in the interview, but in the end I got a job as one of the senior administrators. I am so happy! The pay is better, the working conditions are great and I don't have to drive to work anymore.

Anyway, I have to stop now because my sister is staying with me and has brought my baby nephew to meet me. She sends you lots of love and is asking when we can all meet up. Soon, I hope.

With love,

Tina

TEST A, WRITING TASK 2 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 7** score. Here is the examiner's comment:

The response looks at the advantages of living in apartments and houses then briefly considers some disadvantages before giving the candidate's own opinion. Fuller development of the disadvantages would raise the candidate's score here. The ideas are clearly organised and paragraphing is logical. There is some under-use of cohesive devices and some incorrect referencing, but links between sentences and paragraphs can be clearly followed. The range of vocabulary used is varied and there is some good use of collocation, but there are occasional examples of inappropriate word choice, and better control of spelling would help to raise the candidate's score. The range of complex structures could be wider, but there is sufficient variation in sentence forms and sufficient control of grammar and punctuation to reach this band. Some errors occur, but most are minor and do not reduce communication.

In big business cities there are two options available for the type of accommodation: houses and apartments. Some people prefer to live in apartments and some like to live in houses.

In big business cities, where almost everyone is going out daily for work or study, apartments provide a much more comfortable and safe way of living. The advantages include the fact that there is one key and lock they have to take care of, and also the sense of being a part of a big family. Usually a guard sits at the main gate, so children can play around in the compound with their next door friends. In addition, not much daily cleaning is required in apartments as no staircase has to be clean, which is a difficult task – all housewives know it very well. But a key advantage is that it is safe to go on vacation for a long trip.

On the other hand, houses have their own attraction for its inhabitants. Garden lovers usually prefer houses as they can have their own garden. It is also easy to keep a pet, especially a dog in a house because dog can play around the garden. If someone is interested in maintaining cars himself, it can only be possible in houses where one can have his own garage.

Where people are sometimes much more concerned about their privacy, living in apartments can be a very difficult for them. It may also be the case that someone is not able to deal with other people, for instance next door neighbours, and then house can be a best choice for such people.

However, sometimes houses can be a bad choice for low income people. Maintaining a big house and running it properly can be a problem for such cases.

At the end I must say both options can be good or bad, depending on the personal considerations. But from my point of view, I must say apartments seem a gift of modern way of life which is not common in my home town.

TEST B, WRITING TASK 1 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 5** score. Here is the examiner's comment:

This answer does not cover the bullets well because there are no thanks for the holiday and giving the address is not logical in the context. The second bullet is given rather too much focus, so the purpose of the letter is less clear, and the tone is inappropriate at the end of the letter. The information is organised according to the ordering of the task, and although few linkers are used, there is some clear referencing. The range of vocabulary is rather restricted, but generally sufficient for the task, although inappropriacies and some word form errors occur. A mix of structures is attempted but short, simple sentences are frequent. Control of tenses and verb phrases is weak in more complex structures and this impacts on the message at times.

Dear Taufik and Lina,

I'm so glad receiving your photos when we were in Singapore. The photos are so nice and bright. They remind me for my special holiday with you.

I'm sorry because I don't write a letter to you as soon as possible. After I came back to Melbourne, my boss asked me to had two weeks training in Wellington, New Zealand. I don't have any time to tell you because it happened suddenly.

My company wants to change the system of the computer into the online system. All of the staffs must have training first, before the system running.

I hope you can come and stay with me during next holiday. My address is: 888 Little Collins Street, Melbourne, Victoria, 3000. You can contact me first if you have a plan to visit.

Thanks for your kindness and I'm looking forward for your reply.

Yours sincerely,

Victor

TEST B, WRITING TASK 2 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

I agree with the view that stars in the entertainment business are usually over paid. This is true whether we are considering stars of film, sport or popular music, and it often seems that the amount of money they are able to earn in a short time cannot possibly be justified by the amount of work they do.

However, it is also true that it is only those who reach the very top of their profession who can get these huge salaries. So the size of salary that stars expect is closely linked to the competition they have to overcome in order to reach success. They are, in effect, rare talents.

Furthermore, the majority of stars do not hold their top positions long. Sport stars and pop stars, for example, are soon replaced by the next younger, more energetic, generation, while the good looks of most film stars quickly fade. So this relatively short working life may be some justification for the very high pay.

Unfortunately, professionals from other fields, who make a much greater contribution to human society, are paid so much less that it is hard to disagree with the statement. Teachers, nurses, laboratory researchers etc. are never listed among the best-paid professionals, yet they are more important to our well-being and our future than the stars who earn their fortunes so quickly.

In conclusion, I think there may be some reasons why entertainment stars earn high salaries but overall I agree that they are overpaid. The gaps between their earnings and those of people who work less selfishly for the good of society cannot be justified. Such professionals should be much better appreciated and better paid.

Tapescripts

TEST 1

SECTION 1

- NINA: Hi, George! Glad you're back. *Loads* of people have phoned you.
- GEORGE: Really?
- NINA: I felt just like your secretary!
- GEORGE: Sorry! I went into the library this afternoon to have a look at a newspaper and I came across something really interesting.
- NINA: What? A book?
- GEORGE: No, a brochure from a summer festival – mainly Spanish music. Look, I've got it here. *Example*
- NINA: Spanish music? I really love the guitar. Let's have a look. So what's this group 'Guitarrini'?
- GEORGE: They're really good. They had a video with all the highlights of the festival at a stand in the lobby to the library, so I heard them. They play fantastic instruments – drums and flutes and old kinds of guitars. I've never heard anything like it before. *Q1*
- NINA: Sounds great.
- GEORGE: Okay. Shall we go then? Spoil ourselves?
- NINA: Yes, let's.
- GEORGE: The only problem is there aren't any cheap seats . . . it's all one price.
- NINA: Well, in that case we could sit right at the front – we'd have a really good view.
- GEORGE: Yeah, though I think that if you sit at the back you can actually hear the whole thing better. *Q2*
- NINA: Yes. Anyway we can decide when we get there.
-
- NINA: So will you fill in the form or shall I?
- GEORGE: I'll do it. Name: George O'Neill. Address: 48 North Avenue, Westsea. Do you remember our new postcode? Still can't remember it. *Q3*
- NINA: Just a minute – I've got it written down here. WS6 2YH. Do you need the phone too? *Q4*
- GEORGE: Please. I'm really bad at numbers.
- NINA: 01674 553242. So, let's book two tickets for Guitarrini. *Q5*
- GEORGE: Okay. If you're sure £7.50 each is all right. How do you feel about the singer?
- NINA: I haven't quite decided. But I've noticed something on the booking form that might just persuade me!
- GEORGE: What's that then?
- NINA: Free refreshments!
- GEORGE: Really?

NINA:	Yes, look here. Sunday 17th of June. Singer, ticket £6.00 includes <u>drinks</u> in the garden.	Q6
GEORGE:	Sounds like a bargain to me!	
NINA:	Yes, let's book two tickets for that. So, what else? I'm feeling quite keen now! How about the <u>pianist</u> on the 22nd of June?	Q7
GEORGE:	Anna Ventura? I've just remembered that's my evening class night.	
NINA:	That's okay. I'll just have to go on my own – but we can go to the Spanish dance and guitar concert together, can't we?	
GEORGE:	Yes – I'm sure Tom and Kieran would enjoy that too. Good heavens – £10.50 a ticket! I can see we're going to have to go without food for the rest of the week – we'll need to book <u>four</u> !	Q8 Q9
NINA:	Wish we were students – look! Children, Students and Senior Citizens get a 50% discount on everything.	Q10
GEORGE:	If only!	

SECTION 2

Hello, and thank you for asking me to your teachers' meeting to talk about the Dinosaur Museum and to tell you a bit about what you can do with your students there.

Well, let me give you some of the basic information first. In regard to opening hours, we're open every day of the week from 9.00 am to 8.00 pm except on Mondays when we close at 1.30 pm. And, in fact the only day in the year when we're closed is on the 25th of December. You can book a guided tour for your school group any time that we're open.

Q11 & 12

If you bring a school group to the museum, when you arrive we ask you to remain with your group in the car park. One or more of the tour guides will welcome you there and brief you about what the tour will be about. We do this there because our entrance is quite small and we really haven't got much room for briefing groups in the exhibition area.

Q13

As far as the amount of time you'll need goes, if you bring a school group you should plan on allowing a minimum of 90 minutes for the visit. This allows 15 minutes to get on and off the coach, 45 minutes for the guided tour and 30 minutes for after-tour activities.

Q14

If you're going to have lunch at the museum you will, of course, have to allow more time. There are two cafés in the museum, with seating for 80 people. If you want to eat there you'll need to reserve some seating, as they can get quite crowded at lunch time. Then outside the museum at the back there are tables, and students can bring their own lunch and eat it there in the open air.

Q15

When the students come into the museum foyer we ask them to check in their backpacks with their books, lunch boxes, etc, at the cloakroom before they enter the museum proper. I'm afraid in the past we have had a few things gone missing after school visits so this is a strict rule. Also, some of the exhibits are fragile and we don't want them to be accidentally knocked. But we do provide school students with handouts with questions and quizzes on them. There's so much that students can learn in the museum and it's fun for them to have something to do. Of course they'll need to bring something to write with for these. We do allow students to take photographs. For students who are doing projects it's useful to make some kind of visual record of what they see that they can add to their reports. And finally, they should not bring anything to eat into the museum, or drinks of any kind.

Q16–18

Q16–18

There are also a few things the students can do after the tour. In the theatrette on the ground floor there are continuous screenings of short documentaries about dinosaurs_ Q19 & 20
which they can see at any time. We used to have an activity room with more interactive things like making models of dinosaurs and drawing and painting pictures, even hunting for dinosaur eggs, but unfortunately the room was damaged in a bad storm recently when water came in the roof, so that's closed at the moment. But we do have an IT centre where students have access to CD ROMs with a range of dinosaur games. These games are a lot Q19 & 20
of fun, but they also teach the students about the lives of dinosaurs, how they found food, protected their habitat, survived threats, that kind of thing.

And . . . I think that's all I have to tell you. Please feel free to ask any questions if you would like to know anything else . . .

SECTION 3

- TUTOR: Right, Sandra. You wanted to see me to get some feedback on your group's proposal. The one you're submitting for the Geography Society field trip competition. I've had a look through your proposal and I think it's a really good choice. In fact, I only have a few things to say about it, but even in an outline document like this you really have to be careful to avoid typos and problems with layout in the proposal, and even in the contents page. So read it through carefully before submitting it, okay?
- SANDRA: Will do.
- TUTOR: And I've made a few notes on the proposal about things which could have_ Q21
been better sequenced.
- SANDRA: Okay.
- TUTOR: As for the writing itself, I've annotated the proposal as and where I thought it could be improved. Generally speaking, I feel you've often used complex structures and long sentences for the sake of it and as a consequence . . . although your paragraphing and inclusion of sub-headings help . . . it's quite hard to follow your train of thought at times. So Q22
cut them down a bit, can you?
- SANDRA: Really?
- TUTOR: Yes. And don't forget simple formatting like numbering.
- SANDRA: Didn't I use page numbers?
- TUTOR: I didn't mean that. Look, you've remembered to include headers and footers, which is good, but listing ideas clearly is important. Number them Q23
or use bullet points, which is even clearer. Then you'll focus the reader on your main points. I thought your suggestion to go to the Navajo Tribal Park was a very good idea.
- SANDRA: I've always wanted to go there. My father was a great fan of cowboy films_ Q24
and the Wild West so I was subjected to seeing all the epics, many of_ which were shot there. As a consequence, it feels very familiar to me and it's awesome both geographically and visually, so it's somewhere I've always wanted to visit. The subsequent research I did and the online photographs made me even keener.

-
- TUTOR: Interesting. Right, let's look at the content of your proposal now.
- SANDRA: Did you find it comprehensive enough?

- TUTOR: Well, yes and no. You've listed several different topics on your contents page, but I'm not sure they're all relevant.
- SANDRA: No? Well, I thought that from the perspective of a field trip, one thing I needed to focus on was the sandstone plateaux and cliffs themselves. The way they tower up from the flat landscape is just amazing. The fact that the surrounding softer rocks were eroded by wind and rain, leaving these huge outcrops high above the plain. It's hardly surprising that tourists flock to see the area. Q25-27
- TUTOR: Well, yes, I'd agree with including those points . . .
- SANDRA: And then the fact that it's been home to native American Navajos and all the social history that goes with that. The hardships they endured trying to save their territory from the invading settlers. Their culture is so rich – all those wonderful stories.
- TUTOR: Well, I agree it's interesting, but it's not immediately relevant to your proposal, Sandra, so at this stage, I suggest you focus on other considerations. I think an indication of what the students on the trip could actually do when they get there should be far more central, so that certainly needs to be included and to be expanded upon. And I'd like to see something about the local wildlife, and vegetation too, not that I imagine there's much to see. Presumably the tourist invasion hasn't helped. Q25-27
- SANDRA: Okay, I'll do some work on those two areas as well. But you're right, there's not much apart from some very shallow-rooted species. Although it's cold and snowy there in the winter, the earth is baked so hard in the summer sun that rainwater can't penetrate. So it's a case of flood or drought, really.
- TUTOR: So, I understand. Now, before we look at everything in more detail, I've got a few factual questions for you. It would be a good idea to include the answers in your finished proposal, because they're missing from your draft.
- SANDRA: Fine.
- TUTOR: So, you mentioned the monoliths and the spires, which was good, but what area does the tribal park cover? Do you know?
- SANDRA: 12,000 hectares, and the plain is at about 5,850 metres above sea level. Q28
- TUTOR: Larger than I expected. Okay. Where's the nearest accommodation? That's a practical detail that you haven't included. Have you done any research on that?
- SANDRA: Yes. There's nowhere to stay in the park itself, but there's an old trading post called Goulding quite near. All kinds of tours start from Goulding, too.
- TUTOR: What kind of tours?
- SANDRA: Well, the most popular are in four-wheel drive jeeps – but I wouldn't recommend hiring those. I think the best way to appreciate the area would be to hire horses instead and trek around on those. Biking is not allowed and it's impossible to drive around the area in private vehicles. The tracks are too rough. Q29
- TUTOR: Okay, lastly, what else is worth visiting there?
- SANDRA: There are several caves, but I haven't looked into any details. I'll find out about them. Q30
- TUTOR: Okay, good. Now what I'd like to know is . . .

SECTION 4

So, welcome to your introductory geography lecture. We'll begin with some basics. Firstly, what do we learn by studying geography?

Well, we learn a great deal about all the processes that have affected and that continue to affect the earth's surface. But we learn far more than that, because studying geography also informs us about the different kinds of relationships that develop between a particular environment and the people that live there. Q31 Q32

Okay. We like to think of geography as having two main branches. There's the study of the nature of our planet – its physical features, what it actually looks like – and then there's the study of the ways in which we choose to live and of the impact of those on our planet. Our current use of carbon fuels is a good example of that. Q33

But there are more specific study areas to consider too, and we'll be looking at each of these in turn throughout this semester. These include bio-physical geography, by which I mean the study of the natural environment and all its living things. Then there's topography – that looks at the shapes of the land and oceans. There's the study of political geography and social geography too, of course, which is the study of communities of people. We have economic geography – in which we examine all kinds of resources and their use – agriculture, for example. Next comes historical geography – the understanding of how people and their environments and the ways they interact have changed over a period of time – and urban geography, an aspect I'm particularly interested in, which takes as its focus the location of cities, the services that those cities provide, and migration of people to and from such cities. And lastly, we have cartography. That's the art and science of map-making. You'll be doing a lot of that! Q34

So, to summarise before we continue, we now have our key answer . . . studying this subject is important because without geographical knowledge, we would know very little about our surroundings and we wouldn't be able to identify all the problems that relate to them. So, by definition, we wouldn't be in an informed position to work out how to solve any of them. Q35

Okay, now for some practicalities. What do geographers actually do? Well, we collect data to begin with! You'll be doing a lot of that on your first field trip! How do we do this? There are several means. We might, for example, conduct a census – count a population in a given area perhaps. We also need images of the earth's surface which we can produce by means of computer-generation technology or with the help of satellite relays. We've come a very long way from the early exploration of the world by sailing ships when geographers only had pens and paper at their disposal. Q36

After we've gathered our information, we must analyse it! We need to look for patterns, most commonly those of causes and consequences. This kind of information helps us to predict and resolve problems that could affect the world we live in. Q37

But we don't keep all this information confidential. We then need to publish our findings so that other people can access it and be informed by it. And one way in which this information can be published is in the form of maps. You'll all have used one at some stage of your life already. Let's consider the benefits of maps from a geographer's perspective.

Maps can be folded and put in a pocket and can provide a great store of reference when they're collected into an atlas. They can depict the physical features of the entire planet if necessary, or, just a small part of it in much greater detail. But there is a drawback. You can't exactly replicate something that is three-dimensional, like our planet, on a flat piece of paper, because paper has only two dimensions, and that means there'll always be a certain degree of distortion on a map. It can't be avoided.

Q38

We can also use aerial photographs . . . pictures taken by cameras at high altitude above the earth. These are great for showing all kinds of geographical features that are not easy to see from the ground. You can easily illustrate areas of diseased trees or how much traffic is on the roads at a given time or information about deep sea beds, for example.

Q39

Then there are Landsats. These are satellites that circle the earth and transmit visual information to computers at receiving stations. They circle the earth several times a day and can provide a mass of information – you'll all be familiar with the information they give us about the weather, for example.

Q40

So, what we're going to do now is look at a short presentation in which you'll see all these tools . . .

TEST 2

SECTION 1

JUDY: Good morning. Total Insurance. Judy speaking, how may I help you?

MICHAEL: I recently shipped my belongings from overseas back here to Australia and I took out insurance with your company. Some items were damaged during the move so I need to make a claim. What do I have to do?

JUDY: Okay, well first I need to get a few details about this. Can you give me your name please?

MICHAEL: Yes. It's Michael Alexander.

Example

JUDY: Okay. And your address please?

MICHAEL: My old address or my current one?

JUDY: Your current one.

MICHAEL: It's 24 Manly Street, Milperra near Sydney.

JUDY: What was the suburb, sorry?

MICHAEL: Milperra. M-I-L-P-E-R-R-A.

Q1

JUDY: Right. Now, who was the shipping agent Mr Alexander?

MICHAEL: You mean the company we used?

JUDY: Yes, the company who packed everything up at the point of origin.

MICHAEL: Oh, it was . . . er . . . First Class Movers.

Q2

JUDY: Okay . . . where were the goods shipped from?

MICHAEL: China, but the ship came via Singapore and was there for about a week.

JUDY: Don't worry, all of that information will be in the documentation. Now, the dates. Do you know when the ship arrived?

MICHAEL: It left on the 11th of October and got to Sydney on the 28th of November.

Q3

JUDY: Okay. I need one more thing. There's a reference number. It should be in the top right-hand corner of the pink form they gave you.

Tapescripts

MICHAEL:	Let me have a look. I have so many papers. Yes, here it is. It's 601 ACK.	
JUDY:	Thanks.	
JUDY:	I need to take down a few details of the actual damage over the phone before you put in a full report. Can you tell me how many items were damaged and what the damage was?	
MICHAEL:	Yes, well four things actually. I'll start with the big things. My TV first of all. It's a large one . . . very expensive.	
JUDY:	Our insurance doesn't cover electrical problems.	
MICHAEL:	It isn't an electrical problem. The screen has a huge crack in it so it's unusable.	Q4
JUDY:	I see. Any idea of the price to repair it?	
MICHAEL:	No. Well, I don't think it can be repaired. It will need a new one.	Q4
JUDY:	Okay. I'll make a note of that and we'll see what we can do. Now, what was the second item?	
MICHAEL:	The cabinet from the bathroom was damaged as well. It's a lovely cabinet, we use it to keep our towels in.	Q5
JUDY:	And what is the extent of the damage?	
MICHAEL:	Well, the back and the sides seem okay but the door has a huge hole in it. It can't be repaired. I'm really not very happy about it.	Q6
JUDY:	And how much do you think it will cost to replace it?	
MICHAEL:	Well, when I bought it last year I paid \$125 for it. But the one I've seen here in Sydney is a bit more expensive, it's \$140.	Q7
JUDY:	Right, and what was the third item?	
MICHAEL:	My dining room table. It's a lovely table from Indonesia. It must have been very hot inside the container because one leg has completely split down the middle. The top and the other three look okay thank goodness.	Q8
JUDY:	Any idea of the price to repair it?	
MICHAEL:	Well, I had an estimate done on this actually because it is a very special table to us. They quoted us \$200, which is really pricey so I hope the insurance will cover the total cost.	
JUDY:	I'm sure that will be fine. What was the last item, Mr Alexander?	
MICHAEL:	Well, we have a lovely set of china plates and dishes, you know, with matching cups, saucers, the lot. They were all in the one box which must have got dropped because some <u>plates</u> were broken – six actually.	Q9
JUDY:	And can you tell me the replacement value of these?	
MICHAEL:	Well, it's hard to say because they were part of a set but they can be up to \$10 each as it's such a good set.	
JUDY:	Okay, so that would be around \$60 altogether?	Q10
MICHAEL:	Yes, that's right.	
JUDY:	And is that all of the items?	
MICHAEL:	Yes. So what do I have to do now?	

SECTION 2

Welcome to Green Vale Agricultural Park. As you know, we have only been open a week so you are amongst our first visitors. We have lots of fascinating indoor and outdoor exhibits on our huge complex, spreading hundreds of hectares. Our remit is to give Q11

educational opportunities to the wider public as well as to offer research sites for a wide variety of agriculturists and other scientists.

Let's start by seeing what there is to do. As you can see here on our giant wall plan, we are now situated in the Reception block . . . here. As you walk out of the main door into the park there is a path you can follow. If you follow this route you will immediately come into the Rare Breeds section, where we keep a wide variety of animals which I shall be telling you a little more about later. Next to this . . . moving east . . . is the large grazing area for the rare breeds. Then further east . . . in the largest section of our Park is the Forest Area. Q12
South of the grazing area and in fact just next to the Reception block is our Experimental Crop Area. In the middle of the Park . . . this circular area is our lake . . . These two small rectangular shapes here . . . are the Fish Farms where we rear fish for sale. To the east of Q13
those is the marsh area which attracts a great many migrant birds. In the south-eastern corner, beyond the marsh, is our Market Garden area, growing vegetables and flowers. Q14

All these areas can be visited by the general public for almost all the year . . . although . . . please take note of the large signs at the entrance to each area which tell . . . which tell you when certain areas are being used for particular controlled experiments and are therefore temporarily out of bounds to the public. Q15

You can see for yourself what a huge area the park covers and a key question is always, how can we move around? Well you have a choice of means . . . all environmentally friendly . . . cars are banned in the park. We have bicycles which you can hire behind the Reception block . . . here . . . the healthy ones of you can go on foot and finally there's our electric tram, powered from solar cells. You find more information about this at the front entrance. Q16

A good place to start on your tour is the Rare Breeds section. We keep goats, sheep and Q17
hens and other kinds of poultry. We are also thinking of bringing in cows and horses but we do not, as yet, have facilities for these bigger animals. The animals are fed in public twice a day and a short lecture given on their feeding habits and nutritional needs. These are very popular with the public but of course we mustn't lose sight of the main purpose of having this section, not as such to preserve rare animals but to maintain the diversity of breeds to Q18
broaden the gene pool for agricultural development. Green Vale changes with the seasons with different events happening at different times of the year. May will be perhaps our most spectacular month with the arrival of the Canada geese and when our fruit trees will be in full blossom, but there are interesting events on all year round . . . for example John Havers, our expert fly fisherman, is currently giving displays on the lake. Each of the Q19
sections has its own seasonal calendar . . . please consult the summary board at the main entrance. And the final section, as we return to the Reception blocks, is the orchard.

Do take time to browse round our shop . . . there is a wide selection of books on wildlife, Q20
some of them written by local authors, and the history of farming, including organic farming, something which the park will be diversifying into in the coming months.

SECTION 3

PROFESSOR: Good morning everyone. In today's seminar, Grant Freeman, a biologist who specialises in identifying insects, and who works for the Australian

- Quarantine Service, has come to talk to us about his current research work. Right, well, over to you, Grant.
- GRANT: Good morning, everyone. I'm sure that you know that the quarantine service regulates all food brought into Australia. Well, obviously they want to protect Australia from diseases that might come in with imported goods, but they also want to prevent insect pests from being introduced into the country, and that's where I have a part to play. Anyway, my current research involves trying to find a particular type of bee, the Asian Honey Bee, and finding out whether there are any of them around in various states of Australia. We discovered a few of them in Queensland once and eradicated them. Now, we're pretty keen to make sure that there aren't any more getting in, particularly to New South Wales and other states. Q21
- STUDENT 1: What's wrong with Asian Honey Bees? Are they so different from Australian bees?
- GRANT: Well, in fact, they look almost the same, but they are infested with mites – microscopic creatures which live on them, and which can seriously damage our own home-grown bees, or could even wipe them out. Q22
- PROFESSOR: Well, what would happen if Australian bees died out?
- GRANT: Well, the honey from Australian bees is of excellent quality, much better than the stuff the Asian bees produce. In fact, Australia exports native Queen bees to a large number of countries because of this. When the European Honey Bee was first discovered out in the bush, we found they made really unpleasant honey and they were also too big to pollinate many of our native flowers here in Australia. Q23
- STUDENT 2: That must have had a devastating effect on the natural flora. Did you lose any species?
- GRANT: No, we managed to get them under control before that happened but if Asian bees got in there could be other consequences. We could lose a lot of money because you might not be aware, but it's estimated that native bees' pollination of flower and vegetable crops is worth 1.2 billion dollars a year. So in a way they're the farmers' friend. Oh, and another thing is, if you're stung by an Asian Honey Bee, it can produce an allergic reaction in some people; so they're much more dangerous than native bees. Q24
-
- PROFESSOR: How will you know if Asian bees have entered Australia?
- GRANT: We're looking at the diet of the bird called the Rainbow Bee Eater. The Bee Eater doesn't care what it eats, as long as they're insects. But the interesting thing about this bird is that we are able to analyse exactly what it eats and that's really helpful if we're looking for introduced insects. Q25
- PROFESSOR: How come?
- GRANT: Because insects have their skeletons outside their bodies, so the Bee Eaters digest the meat from the inside. Then they bring up all the indigestible bits of skeleton and, of course, the wings in a pellet – a small ball of waste material which they cough up.
- PROFESSOR: That sounds a bit unpleasant. So, how do you go about it?
- GRANT: In the field we track down the Bee Eaters and find their favourite feeding spots, you know, the places where the birds usually feed. It's here that we can find the pellets. We collect them up and take them back to the laboratory to examine the contents. Q26
- Q27

- PROFESSOR: How do you do that?
- GRANT: The pellets are really hard, especially if they have been out in the sun for a few days so, first of all, we treat them by adding water to moisten them and make them softer. Then we pull them apart under the microscope. Everything's all crunched up but we're looking for wings so we just pull them all out and straighten them. Then we identify them to see if we can find any Asian bee wings. Q28
- PROFESSOR: And how many have you found? Q29
- GRANT: So far our research shows that Asian bees have not entered Australia in any number – it's a good result and much more reliable than trying to find live ones as evidence of introduced insects. Q30
- PROFESSOR: Well, that's fascinating! Thank you, Grant, for those insights. I hope that you might inspire some of our students here to conduct some similar experiments.

SECTION 4

I've been doing some research into what people in Britain think of doctors, the ones who work in general practice – the first call for medical care – and comparing this with the situation in a couple of other countries. I want to talk about the rationale behind what I decided to do.

Now I had to set up my programme of research in three different countries so I approached postgraduates in my field in overseas departments, contacting them by email, to organise things for me at their end. I thought I would have trouble recruiting help but in fact everyone was very willing and sometimes their tutors got involved too. Q31

I had to give my helpers clear instructions about what kind of sample population I wanted them to use. I decided that people under 18 should be excluded because most of them are students or looking for their first job, and also I decided at this stage just to focus on men who were in employment, and set up something for people who didn't have jobs and for employed women later on as a separate investigation. Q32

I specifically wanted to do a questionnaire, and interviews with a focus group. With the questionnaire, rather than limiting it to one specific point, I wanted to include as much variety as possible. I know questionnaires are a very controlled way to do things but I thought I could do taped interviews later on to counteract the effects of this. And the focus group may also prove useful in future, by targeting subjects I can easily return to, as the participants tend to be more involved. Q33

So I'm just collating the results now. At the moment it looks as if, in the UK, despite the fact that newspapers continually report that people are unhappy with medical care, in fact it is mainly the third level of care, which takes place in hospitals, that they are worried about. Government reforms have been proposed at all levels and although their success is not guaranteed, long-term hospital care is in fact probably less of an issue than the media would have us believe. However, I've still got quite a bit of data to look at. Q34

Certainly I will need to do more far-reaching research than I had anticipated in order to establish if people want extra medical staff invested in the community, or if they want care to revert to fewer, but larger, key medical units. The solution may well be something that Q35

can be easily implemented by those responsible in local government, with central government support of course.

This first stage has proved very valuable though. I was surprised by how willing most of the subjects were to get involved in the project – I had expected some unwillingness to answer questions honestly. But I was taken aback and rather concerned that something I thought I'd set up very well didn't necessarily seem that way to everyone in my own department. Q36

I thought you might also be interested in some of the problems I encountered in collecting my data. There were odd cases that threw me – one of the subjects who I had approached while he was out shopping in town, decided to pull out when it came to the second round. It was a shame as it was someone who I would like to have interviewed more closely. Q37

And one of the first-year students I interviewed wanted reassurance that no names would be traceable from the answers. I was so surprised, because they think nothing of telling you about themselves and their opinions in seminar groups! Q38

Then, one of the people that I work with got a bit funny. The questions were quite personal and one minute he said he'd do it, then the next day he wouldn't, and in the end he did do it. It's hard not to get angry in that situation but I tried to keep focused on the overall picture in order to stay calm. Q39

The most bizarre case was a telephone interview I did with a teacher at a university in France. He answered all my questions in great detail – but then when I asked how much access he had to dangerous substances he wouldn't tell me exactly what his work involved. It's a real eye-opener . . . Q40

TEST 3

SECTION 1

- WOMAN: Good morning. How can I help you?
- MAN: Hello. I'm interested in renting a house somewhere in the town.
- WOMAN: Right. Could I have your name please?
- MAN: Yes, it's Steven Godfrey.
- WOMAN: And tell me how many bedrooms you're looking for.
- MAN: Well, we'd need four, because I'm going to share the house with three friends. *Example*
- WOMAN: Okay, there are several of that size on our books. They mostly belong to families who are working abroad at the moment. What about the location?
- MAN: It'd be nice to be central. Q1
- WOMAN: That might be difficult, as most houses of that size are in the suburbs. Still, there are a few. What's your upper limit for the rent?
- MAN: We'd like something around £500 a month, but we could go up to £600 if we have to. But we can't go beyond that. Q2
- WOMAN: Do you know how long you want to rent the house for? The minimum let is six months, as you probably realise.

MAN: We're at college here for two years, and we don't want to have to move during that time if we can avoid it. Q3

WOMAN: Right. And how soon do you want to move in? All our lets start on the first of the month.

MAN: Well, as soon as possible, really, so that means September 1st.

WOMAN: Okay, let me have a look at what we've got . . . We have photographs of all the houses on our books, so you can get an idea of what they're like. There's this one in Oakington Avenue, at £550 a month. Combined living room and dining room, with a separate kitchen. It doesn't have a garage, though you can park in the road. Q4

MAN: Ah, we'd prefer to have one, if possible.

WOMAN: Right. Then have a look at this house, in Mead Street. It's got a very large living room and kitchen, bathroom, cloakroom . . .

MAN: How much is it?

WOMAN: That one's 580. It's very well furnished and equipped. It also has plenty of space for parking, and it's available for a minimum of a year. Oh, and there's a big garden. Q5

MAN: I don't think we could cope with that, to be honest. We'll be too busy to look after it.

WOMAN: Okay. Then there's this older house in Hamilton Road: living room, kitchen-diner, and it has a study. 550 a month. Q6

MAN: That looks rather nice. But whereabouts in Hamilton Road?

WOMAN: Towards the western end.

MAN: Oh, that'll be very noisy. I know the area. Q7

WOMAN: Yes, it's pretty lively. Some people like it, though. Well, what about this house in Devon Close?

MAN: That looks lovely.

WOMAN: There's a big demand for houses in that area, so prices tend to be quite high. But this one hasn't been decorated for a few years, which has kept the rent down a bit. It's got a living room, dining room and small kitchen, and it's 595 a month. I think it would suit you, from what you've said. Q8

MAN: It sounds fine.

MAN: Why's that part of town so popular?

WOMAN: Well, there's a big scheme to improve the district, and it'll soon have the best facilities for miles around.

MAN: What sort of thing?

WOMAN: There's a big sports centre under construction, which will be very impressive when it's finished. In fact the swimming pool's already opened, ahead of schedule, and it's attracting a lot of people. Q9 & 10

MAN: What about cinemas: are there any in the area?

WOMAN: The only one closed down last year, and it's now in the process of being converted into a film museum. The local people are trying to get a new cinema added to the scheme.

MAN: I think I heard something about a plan to replace the existing concert hall with a larger one. Q9 & 10

- WOMAN: Ah, that's due to start next year.
MAN: Well it sounds an interesting area to live in. Could I go and see the house, please?
WOMAN: Yes, of course.

SECTION 2

Hello, and welcome to *Focus on the Arts*. I'm your host – Dave Green – and this is your very own local radio programme. Every Friday evening we put the spotlight on different arts and culture facilities, and look at the shows and events that are on offer in the coming week.

And today the focus is on The National Arts Centre. Now, if you don't already know it yourself, I'm sure you've all heard of it. It's famous throughout the world as one of the major venues for classical music. Q11

But did you know that it is actually much more than just a place to hear concerts? The Centre itself is a huge complex that caters for a great range of arts. Under a single roof it houses concert rooms, theatres, cinemas, art galleries and a wonderful public library, as well as service facilities including three restaurants and a bookshop. So at any one time, the choice of entertainment there is simply enormous. Q12

So, how did they manage to build such a big arts complex right in the heart of the city? Well, the area was completely destroyed by bombs during the war in 1940. So the opportunity was taken to create a cultural centre that would be, what they called: 'the City's gift to the Nation'. Of course it took a while for such a big project to get started, but it was planned in the 60s, built in the 70s and eventually opened to the public in 1983. Ever since then it has proved to be a great success. It is not privately owned, like many arts centres, but is still in public hands – it's run by the City Council. Both our National Symphony Orchestra and National Theatre Company were involved in the planning of the project, and they are now based there – giving regular performances every week – and as the Centre is open 363 days of the year, there are plenty of performances to choose from. Q13 & 14 Q15 Q16

So, to give you some idea of what's on, and to help you choose from the many possibilities, we've made a selection of the star attractions.

If you're interested in classical music, then we recommend you go along to the National on either Monday or Tuesday evening at 7.30 for a spectacular production of 'The Magic Flute' – probably the most popular of all Mozart's operas. It's in the Garden Hall and tickets start at only £8.00, but you'll have to be early if you want to get them that cheap! And remember, it's only on for those two evenings. Q17

For those more interested in the cinema, you might like to see the new Canadian film which is showing on Wednesday evening at 8pm in Cinema 2. And that's called 'Three Lives.' It's had fantastic reviews and tickets cost just £4.50, which is a reduction on the usual price of £5.50. So, it's really good value, especially for such a great movie. Q18 Q19

But you can see the centre's *main* attraction at the weekend, because on Saturday and Sunday, 11 am to 10 pm, they're showing a wonderful new exhibition that hasn't been seen anywhere else in Europe yet. It's a collection of Chinese Art called 'Faces of China' – that's Q20

in Gallery 1 – and it has some really fascinating paintings and sculptures by leading artists from all over China – and the good news is that it is completely free, so don't miss it!

So why not go along to the National Arts Centre next week for one – or all – of these great events – and you can always pick up a programme and check out all the other performances and exhibitions on offer, or coming soon, on almost every day of the year.

Next week we'll be looking at the new Museum of Science . . .

SECTION 3

- WOMAN: I've been reading your personal statement, Paul. First, let's talk about your work experience in South America. What took you there? Was it to gain more fluency in Spanish?
- PAUL: Well, as I'm combining Spanish with Latin American studies, my main idea was to find out more about the way people lived there. My spoken Spanish was already pretty good in fact. Q21
- WOMAN: So you weren't too worried about language barriers?
- PAUL: No. In fact, I ended up teaching English there, although that wasn't my original choice of work.
- WOMAN: I see. How did you find out about all this?
- PAUL: I found an agency that runs all kinds of voluntary projects in South America.
- WOMAN: What kind of work?
- PAUL: Well, there were several possibilities.
- WOMAN: You mean construction? Engineering work?
- PAUL: Yes, getting involved in building projects was an option. Then there was tourism – taking tourists for walks around the volcanoes – which I actually chose to do, and then there was work with local farmers. Q22
- WOMAN: But you didn't continue with that project. Why not?
- PAUL: Because I never really knew whether I'd be needed or not. I'd thought it might be difficult physically, but I was certainly fit enough . . . no, I wanted to do something that had more of a proper structure to it, I suppose. I get de-motivated otherwise. Q23
- WOMAN: What do you think you learned from your experience? It must have been a great opportunity to examine community life.
- PAUL: Yes, but it was difficult at first to be accepted by the locals. It was a very remote village and some of them were reluctant to speak to me – although they were always interested in my clothes and how much I'd had to pay for them.
- WOMAN: Well, that's understandable.
- PAUL: Yes, but things soon improved. What struck me was that when people became more comfortable with me and less suspicious, we really connected with each other in a meaningful way. Q24
- WOMAN: You made good friends?
- PAUL: Yes, with two of the families in particular.
- WOMAN: Good. What about management. Did you have a project manager?
- PAUL: Yes and he gave me lots of advice and guidance. Q25
- WOMAN: And was he good at managing too?

Tapescripts

- PAUL: That wasn't his strong point! I think he was often more interested in the academic side of things than filing reports. He was a bit of a dreamer.
- WOMAN: And did you have a contract?
- PAUL: I had to stay for a minimum of three months. My parents were surprised when I asked to stay longer – six months in the end. I was so happy there.
- WOMAN: And did anything on the administration side of things surprise you? What was the food and lodging like?
- PAUL: Simple . . . but there was plenty to eat and I only paid seven dollars a day for that which was amazing really. And they gave me all the equipment I needed . . . even a laptop. Q26
- WOMAN: You didn't expect that then?
- PAUL: No.
- WOMAN: Well, I'll look forward to hearing more.
-
- WOMAN: But now let's look at these modules. You'll need to start thinking about which ones you'll definitely want to study. The first one here is Gender Studies in Latin America.
- PAUL: Mmm . . .
- WOMAN: It looks at how gender analysis is reconfiguring civil society in Latin America. Women are increasingly occupying positions in government and in other elected leadership positions in Latin America. I think you'd find it interesting.
- PAUL: If it was to do with people in the villages rather than those in the public sphere, I would. Q27
- WOMAN: Okay. What about Second Language Acquisition?
- PAUL: Do you think I'd find that useful?
- WOMAN: Well, you've had some practical experience in the field, I think it would be.
- PAUL: I hadn't thought about that. I'll put that down as a definite, then. Q28
- WOMAN: Okay. What about Indigenous Women's Lives. That sounds appropriate.
- PAUL: I thought so too, but I looked at last year's exam questions and that changed my mind.
- WOMAN: Don't judge the value of the course on that. Maybe, talk to some other students first and we can talk about it again later. Q29
- PAUL: Okay.
- WOMAN: Yes. And lastly, will you sign up for Portuguese lessons?
- PAUL: My Spanish is good, so would I find that module easy?
- WOMAN: Not necessarily. Some people find that Spanish interferes with learning Portuguese . . . getting the accent right too. It's quite different in a lot of ways.
- PAUL: Well, I'd much sooner do something else, then. Q30
- WOMAN: Alright. Now, what we need to do is . . .

SECTION 4

Good morning, everyone. In the last few lectures I've been dealing with business finance, but now I'm going to move on to business systems. And in today's lecture I'm going to talk about what can go wrong when businesses try to copy their own best practices.

Once a business has successfully introduced a new process – managing a branch bank, say, or selling a new product – the parent organisation naturally wants to repeat that success, and capture it if possible on a bigger scale. The goal, then, is to utilise existing knowledge and not to generate new knowledge. It's a less glamorous activity than pure innovation, but it actually happens more often, as a matter of fact. However, surprisingly, getting things right the second time is not necessarily any simpler than it was the first time.

Q31

Now, there's been a lot of research into how companies can repeat their previous successes, and it certainly hasn't been confined to the United States. It seems that most large industries are trying to repeat their own successes, and manage the knowledge they've acquired – but even so it has been shown that the overwhelming majority of attempts fail. A host of studies confirm this, covering a wide range of business settings: branch banks, retail stores, real estate agencies, factories, call centres . . . to name but a few.

Q32

So why do so few managers get things right the second or third time? Let's consider one reason for failure – placing too much trust in the people who are running the successful operation, the 'experts' shall we say. Managers who want to apply existing knowledge typically start off by going to an expert – such as the person who designed and is running a successful department store – and picking their brains. Now, this approach can be used if you want to gain a rough understanding of a particular system, or understand smaller, isolated problems. The trouble is, even the expert doesn't fully grasp the whole thing because when it comes to complex systems, the individual components of the process are interwoven with one another. The expert never has complete access to the necessary information. And the situation's complicated even further by the fact that experts are usually not aware of their own ignorance. The ignorance can take various forms. For instance, a lot of details of the system are invisible to managers. Some may be difficult to describe – learned on the job and well known by workers perhaps, but impossible to describe in a way that's helpful. And there are some things that people know or do that they're not even aware of.

Q33

Q34

Now, let's consider two types of mistake that can occur when a manager actually starts to set up a duplicate system to replicate a successful process. Firstly, perhaps he forgets that he was just trying to copy another process, and starts trying to improve on it. Another mistake is trying to use the best parts of various different systems, in the hope of creating the perfect combination.

Q35

Unfortunately, attempts like these usually turn out to be misguided and lead to problems. Why? Well, for various reasons. Perhaps there weren't really any advantages after all, because the information wasn't accurate. Or perhaps the business settings weren't really comparable. More typically, the advantages are real enough, but there are also disadvantages that have been overlooked. For example, the modifications might compromise safety in some way.

Q36

So, what's the solution? Well, I don't intend to suggest that it's easy to get things right the second time . . . it's not. But the underlying problem has more to do with attitudes than the actual difficulty of the task, and there are ways of getting it right. These involve adjusting attitudes, first of all . . . being more realistic and cautious really. Secondly, they involve exerting strict controls on the organisational and operational systems. And this in turn means copying the original as closely as possible. Not merely duplicating the physical

Q37

Q38

characteristics of the factory, but also duplicating the skills that the original employees had. Q39 & 40
Reliance on a template like this offers the huge advantage of built-in consistency.

TEST 4

SECTION 1

- WOMAN: Hello, West Bay Hotel. Can I help you?
- MAN: Oh, good morning. I'm ringing about your advertisement in the Evening Gazette.
- WOMAN: Is that the one for temporary staff? *Example*
- MAN: That's right.
- WOMAN: Yes. I'm afraid the person who's dealing with that isn't in today, but I can give you the main details if you like.
- MAN: Yes please. Could you tell me what kind of staff you are looking for?
- WOMAN: We're looking for waiters at the moment. There was one post for a cook, Q1
but that's already been taken.
- MAN: Oh right. Erm, what are the hours of work?
- WOMAN: There are two different shifts – there's a day shift from 7 to 2 and a late shift from 4 till 11.
- MAN: And can people choose which one they want to do?
- WOMAN: Not normally, because everyone would choose the day shift I suppose. You alternate from one week to another.
- MAN: Okay. I'm just writing all this down. What about time off?
- WOMAN: You get one day off and I think you can negotiate which one you want, it's Q2
more or less up to you. But it has to be the same one every week.
- MAN: Do you know what the rates of pay are?
- WOMAN: Yes, I've got them here. You get £5.50 an hour, and that includes a break. Q3
- MAN: Do I have to go home to eat or . . .
- WOMAN: You don't have to. You can get a meal in the hotel if you want to, and Q4
there's no charge for it so you might as well.
- MAN: Oh good. Yes, so let's see. I'd get er, two hundred and twenty one, no, two hundred and thirty one pounds a week?
- WOMAN: You'd also get tips – our guests tend to be quite generous.
-
- MAN: Erm, is there a uniform? What about clothes?
- WOMAN: Yes, I forgot to mention that. You need to wear a white shirt, just a plain one, and dark trousers. You know, not green or anything like that. And we Q5
don't supply those.
- MAN: That's okay, I've got trousers, I'd just have to buy a couple of shirts. What about anything else? Do I need a waistcoat or anything?
- WOMAN: You have to wear a jacket, but the hotel lends you that. Q6
- MAN: I see. Er, one last thing – I don't know what the starting date is.
- WOMAN: Just a minute, I think it's some time around the end of June. Yes, the 28th, Q7
in time for the summer.
- MAN: That's great. I'm available from the 10th.

- WOMAN: Oh good. Well, if you can call again you need to speak to the Service Manager. Her name's Jane Urwin, that's U-R-W-I-N, and she'll probably arrange to meet you. Q8
- MAN: Okay. And when's the best time to ring?
- WOMAN: Could you call tomorrow? Um, she usually starts checking the rooms at midday, so before then if you can, so she'll have more time to chat. I'll just give you her number because she's got a direct line. Q9
- MAN: Thanks.
- WOMAN: It's 832 double-0 9.
- MAN: 823 double-0 9?
- WOMAN: 832.
- MAN: Oh, okay. Yes, I'll do that.
- WOMAN: And by the way, she will ask you for a reference, so you might like to be thinking about that. You know, just someone who knows you and can vouch for you. Q10
- MAN: Yes, no problem. Well, thanks very much for your help.
- WOMAN: You're welcome. Bye.
- MAN: Bye.

SECTION 2

- CAROL: Good morning and welcome again to *Your City Today*. With me today is Graham Campbell, a councillor from the city council. He will be telling us about the plan to improve the fast-growing suburb of Red Hill. Good morning Graham and welcome to the show.
- GRAHAM: Good morning, Carol.
- CAROL: Now, Graham, I understand that there has been a lot of community consultation for the new plan?
- GRAHAM: Yes, we've tried to address some of the concerns that local groups told us about. People we've heard from are mainly worried about traffic in the area, and, in particular, the increasing speed of cars near schools. They feel that it is only a matter of time before there is an accident as a lot of the children walk to the school. So we're trying to do something about that. Another area of concern is the overhead power lines. These are very old and a lot of people we spoke to asked if something could be done about them. Well, I'm happy to report that the power company have agreed to move the power lines underground at a cost of \$800,000. I think that will really improve the look of the area, as well as being safer. Q11 Q12
- CAROL: That's good to know, but will that mean an increase in rates for the local businesses in that area?
- GRAHAM: Well, the power company have agreed to bear the cost of this themselves after a lot of discussion with the council. This is wonderful news as the council now has some extra funds for us to put into other things like tree planting and art work. Q13
-
- GRAHAM: Now, we've also put together a map which we've sent out to all the residents in the area. And on the map we've marked the proposed changes. Firstly, we'll plant mature pine trees to provide shelter and shade just to the right of the supermarket in Days Road. In order to address the traffic Q14

problems, the pavements on the corner of Carberry and Thomas Street will be widened. This will help to reduce the speed of vehicles entering Thomas Street. We think it's very important to separate the local residential streets from the main road. So the roadway at the entry to Thomas Street from Days Road will be painted red. This should mark it more clearly and act as a signal for traffic to slow down. One way of making sure that the pedestrians are safe is to increase signage at the intersections. A 'keep clear' sign will be erected at the junction of Evelyn Street and Hill Street, to enable traffic to exit at all times. Something we're planning to do to help control the flow of traffic in the area is to install traffic lights half way down Hill Street where it crosses Days Road. Now, we haven't only thought about the cars and traffic, of course, there's also something for the children. We're going to get school children in the area to research a local story, the life of a local sports hero perhaps, and an artist will incorporate that story into paintings on the wall of a building on the other side of Hill Street from the supermarket. And finally, we've agreed to build a new children's playground which will be at the other end of Hill Street close to the intersection with Carberry Street.

Q15

Q16

Q17

Q18

Q19

Q20

CAROL: Wonderful, now, what's the next stage?

GRAHAM: Well, the final plan . . .

SECTION 3

DAN: Hi Jeannie. How's it going?

JEANNIE: Oh, hello Dan. Pretty well, thanks. Have you managed to get the money for the course yet?

DAN: Yes, that's all sorted out now, thanks. It took long enough, though. It was practically a year ago that I applied to my local council for a grant, and it took them six months to turn me down.

JEANNIE: That's really slow.

DAN: And I thought I was eligible for government funding, but it seems I was mistaken. So then I asked the boss of the company I used to work for if they would sponsor me, and much to my surprise, he said they'd make a contribution.

Q21 & 22

JEANNIE: But what about college grants and scholarships? There must be some you could apply for.

DAN: Yes, there are, but they're all so small that I decided to leave them until I was desperate.

JEANNIE: Uhuh.

DAN: And in fact I didn't need to apply. My parents had been saying that as I already had a job, I ought to support myself through college. But in the end they took pity on me, so now I've just about got enough.

Q21 & 22

JEANNIE: That's good.

DAN: So now I can put a bit of effort into meeting people – I haven't had time so far. Any suggestions?

JEANNIE: What about joining some college clubs?

DAN: Oh right. You joined several didn't you?

- JEANNIE: Yes, I'm in the drama club. It's our first performance next week, so we're rehearsing frantically, and I've got behind with my work, but it's worth it. I'm hoping to be in the spring production, too.
- DAN: I've never liked acting. Are you doing anything else?
- JEANNIE: I enjoyed singing when I was at school, so I joined a group when I came to college. I don't think the conductor stretches us enough, though so I'll give up after the next concert. And I also joined the debating society. It's fun, but with all the rehearsing I'm doing, something has to go, and I'm afraid that's the one. Q23 & 24
- DAN: Do you do any sports?
- JEANNIE: Yes, I'm in one of the hockey teams. I'm not very good, but I'd really miss it if I stopped. I decided to try tennis when I came to college, and I'm finding it pretty tough going. I'm simply not fit enough. Q23 & 24
- DAN: Nor me. I think I'll give that a miss!
- JEANNIE: I'm hoping it'll help me to build up my stamina, but it'll probably be a long haul.
- DAN: Good luck.
- JEANNIE: Thanks.
- DAN: How are you finding the course?
- JEANNIE: I wish we had more seminars.
- DAN: What? I'd have thought we had more than enough already. All those people saying clever things that I could never think of – it's quite interesting, but I wonder if I'm clever enough to be doing this course. Q25
- JEANNIE: I find it helpful to listen to the other people. I like the way we're exploring the subject, and working towards getting insight into it.
- DAN: How do you get on with your tutor? I don't think I'm on the same wavelength as mine, so I feel I'm not getting anything out of the tutorials. It would be more productive to read a book instead.
- JEANNIE: Oh, mine's very demanding. She gives me lots of feedback and advice, so I've got much better at writing essays. And she's helping me plan my revision for the end-of-year exams. Q26
- DAN: Do tell me, I always struggle with revision.
-
- JEANNIE: Well, the first thing is to find out exactly what's required in the exams.
- DAN: Mm. Would it help to get hold of some past papers?
- JEANNIE: Yes. They'll help to make it clear.
- DAN: Right, I'll do that. Then what?
- JEANNIE: Then you can sort out your revision priorities, based on what's most likely to come up. I put these on a card, and read them through regularly. Q27
- DAN: Uhuh.
- JEANNIE: But that isn't enough in itself. You also need a timetable, to see how you can fit everything in, in the time available. Then keep it in front of you while you're studying. Q28
- DAN: I've done that before, but it hasn't helped me!
- JEANNIE: Maybe you need to do something different every day, so if you break down your revision into small tasks, and allocate them to specific days, there's more incentive to tackle them. With big topics you're more likely to put off starting. Q29

Tapescripts

- DAN: Good idea.
- JEANNIE: And as I revise each topic I write a single paragraph about it – then later I can read it through quickly, and it helps fix things in my mind. Q30
- DAN: That's brilliant.
- JEANNIE: I also write answers to questions for the exam practice. It's hard to make myself do it, though!
- DAN: Well, I'll try. Thanks a lot, Jeannie. That's a great help.
- JEANNIE: No problem.
- DAN: See you around.
- JEANNIE: Bye.

SECTION 4

Good morning, everyone. I've been invited to talk about my research project into Australian Aboriginal rock paintings. The Australian Aborigines have recorded both real and symbolic images of their time on rock walls for many thousands of years. Throughout the long history of this tradition, new images have appeared and new painting styles have developed. And these characteristics can be used to categorise the different artistic styles. Among these are what we call the Dynamic, Yam and Modern styles of painting.

One of the most significant characteristics of the different styles is the way that humans are depicted in the paintings. The more recent paintings show people in static poses. But the first human images to dominate rock art paintings, over 8,000 years ago, were full of movement. These paintings showed people hunting and cooking food and so they were given the name 'Dynamic' to reflect this energy. It's quite amazing considering they were painted in such a simple stick-like form. In the Yam period, there was a movement away from stick figures to a more naturalistic shape. However, they didn't go as far as the Modern style, which is known as 'x-ray' because it actually makes a feature of the internal skeleton as well as the organs of animals and humans. The Yam style of painting got its name from the fact that it featured much curvier figures that actually resemble the vegetable called a yam, which is similar to a sweet potato. The Modern paintings are interesting because they include paintings at the time of the first contact with European settlers. Aborigines managed to convey the idea of the settlers' clothing by simply painting the Europeans without any hands, indicating the habit of standing with their hands in their pockets! Size is another characteristic. The more recent images tend to be life size or even larger, but the Dynamic figures are painted in miniature. Q31 Q32 Q33 Q34

Aboriginal rock art also records the environmental changes that occurred over thousands of years. For example, we know from the Dynamic paintings that over 8,000 years ago, Aborigines would have rarely eaten fish and sea levels were much lower at this time. In fact, fish didn't start to appear in paintings until the Yam period along with shells and other marine images. The paintings of the Yam tradition also suggest that, during this time, Aborigines moved away from animals as their main food source and began including vegetables in their diet, as these feature prominently. Freshwater creatures didn't appear in the paintings until the Modern period from 4,000 years ago. Q35 Q36

So, these paintings have already taught us a lot. But one image that has always intrigued us is known as the 'Rainbow Serpent'. The Rainbow Serpent, which is the focus of my

most recent project, gets its name from its snake or serpent-like body and it first appeared in the Yam period 4 to 6,000 years ago. Many believe it is a curious mixture of kangaroo, snake and crocodile. But we decided to study the Rainbow Serpent paintings to see if we could locate the animal that the very first painters based their image on.

Q37

The Yam period coincided with the end of the last ice age. This brought about tremendous change in the environment, with the sea levels rising and creeping steadily inland. This flooded many familiar land features and also caused a great deal of disruption to traditional patterns of life, hunting in particular. New shores were formed and totally different creatures would have washed up onto the shores. We studied 107 paintings of the Rainbow Serpent and found that the one creature that matches it most closely was the Ribboned Pipefish, which is a type of sea horse. This sea creature would have been a totally unfamiliar sight in the inland regions where the image is found and may have been the inspiration behind the early paintings.

Q38

Q39

So, at the end of the ice age there would have been enormous changes in animal and plant life. It's not surprising then, that the Aborigines linked this abundance to the new creatures they witnessed. Even today, Aborigines see the Rainbow Serpent as a symbol of creation, which is understandable given the increase in vegetation and the new life forms that featured when the image first appeared.

Model and sample answers for Writing tasks

TEST 1, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The pie chart shows that there are four main causes of farmland becoming degraded in the world today. Globally, 65% of degradation is caused by too much animal grazing and tree clearance, constituting 35% and 30% respectively. A further 28% of global degradation is due to over-cultivation of crops. Other causes account for only 7% collectively.

These causes affected different regions differently in the 1990s, with Europe having as much as 9.8% of degradation due to deforestation, while the impact of this on Oceania and North America was minimal, with only 1.7% and 0.2% of land affected respectively. Europe, with the highest overall percentage of land degraded (23%), also suffered from over-cultivation (7.7%) and over-grazing (5.5%). In contrast, Oceania had 13% of degraded farmland and this was mainly due to over-grazing (11.3%). North America had a lower proportion of degraded land at only 5%, and the main causes of this were over-cultivation (3.3%) and, to a lesser extent, over-grazing (1.5%).

Overall, it is clear that Europe suffered more from farmland degradation than the other regions, and the main causes there were deforestation and over-cultivation.

TEST 1, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

A child's education has never been about learning information and basic skills only. It has always included teaching the next generation how to be good members of society. Therefore, this cannot be the responsibility of the parents alone.

In order to be a good member of any society the individual must respect and obey the rules of their community and share their values. Educating children to understand the need to obey rules and respect others always begins in the home and is widely thought to be the responsibility of parents. They will certainly be the first to help children learn what is important in life, how they are expected to behave and what role they will play in their world.

However, learning to understand and share the value system of a whole society cannot be achieved just in the home. Once a child goes to school, they are entering a wider community where teachers and peers will have just as much influence as their parents do at home. At school, children will experience working and living with people from a whole variety of backgrounds from the wider society. This experience should teach them how to co-operate with each other and how to contribute to the life of their community.

But to be a valuable member of any community is not like learning a simple skill. It is something that an individual goes on learning throughout life and it is the responsibility of every member of a society to take responsibility for helping the younger generation to become active and able members of that society.

TEST 2, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The charts show how much a UK school spent on different running costs in three separate years: 1981, 1991 and 2001.

In all three years, the greatest expenditure was on staff salaries. But while other workers' salaries saw a fall from 28% in 1981 to only 15% of spending in 2001, teachers' pay remained the biggest cost, reaching 50% of total spending in 1991 and ending at 45% in 2001.

Expenditure on resources such as books had increased to 20% by 1991 before decreasing to only 9% by the end of the period. In contrast, the cost of furniture and equipment saw an opposite trend. This cost decreased to only 5% of total expenditure in 1991 but rose dramatically in 2001 when it represented 23% of the school budget. Similarly, the cost of insurance saw a rising trend, growing from only 2% to 8% by 2001.

Overall, teachers' salaries constituted the largest cost to the school, and while spending increased dramatically for equipment and insurance, there were corresponding drops in expenditure on things such as books and on other workers' salaries.

TEST 2, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 5.5** score. Here is the examiner's comment:

The topic introduction has been copied from the task and is deducted from the word count. This leaves the answer underlength at 236 words, so the candidate loses marks for this.

This answer addresses both questions, but the first is not well covered in terms of how actual relationships have changed. Nevertheless, there is a clear opinion that the effects have been positive and relationships have improved, with some relevant ideas to support this. There is a general progression to the argument, with some effective use of time markers and linkers. There is also some repetition, however. Paragraphing is not always logical, and ideas are not always well linked. A range of vocabulary that is relevant to the topic is used, including some precise and natural expressions. There are quite a lot of mistakes in word form, word choice or spelling, but these do not usually reduce understanding. A variety of sentence types is used, but not always accurately. Errors in grammar and punctuation are distracting at times, but only rarely cause problems for the reader.

Nowadays the way people interact with each other has changed because of technology.

Yes, the technology has changed the people's interaction in very enhanced manner.

Earlier people use to wait and try to find easy way to contact their friends or relatives leaving far. In past there was no quick technology to contact or to establish any communication between one person to another person. The Drawback with past communication systems was that it were very slow and were time taking process such as telegrams, letter etc. People used to afraid to write their personal feedbacks or things to their love ones due to insecure medium of communication. When it comes to professional level, the privacy and accuracy should be maintain but, to that time there were no secure communications.

Now the things have changed around, people from far distance contact their loves one in an easy and quick ways which improves the Interaction level between two person. Quality the level of the Interaction between people to people, has improved because the people are equipped with high-tec technology which enhances the communication. There are many many medium which are available now such as Internet, Calling Cards etc.

The technology has provided the mobility faster which help people to talk or to interact at any time anywhere in the world.

People can contact their friend or relatives any time they want. It has become so easier and feriently to be in touch with your ferriends, relatives even with the unknown people.

TEST 3, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 6** score. Here is the examiner's comment:

This answer presents the information in the two diagrams appropriately. The main differences between the two processes are identified in a clear summary, but other important features could be described more fully. The organisation of information is the strongest feature of this script. The description is well organised and there is a smooth progression across the whole answer that is achieved through good use of linkers and referencing phrases. A range of relevant vocabulary is used, although this is not wide and there are some less suitable word choices. There are a few mistakes in spelling, but these do not make the answer difficult to understand. A mix of sentence forms is used and there are some accurate examples of complex structures, but the many short, simple sentences tend to limit the range.

The diagrams show the processes and the equipments used to make cement, and how these are used to produce concrete for building purposes.

The first step in the cement productios is to introduce limestone clay. These materials pass through a crusher that produces a powder. Then this powder goes into a mixer. After this, the product passes to a rotating heater which works with heat. Afterwards, the mixture goes into a ginder where the cement comes out. At the end of the process, the cement is packed in bags.

Referring to the concret production, the process begins with a combination of 15% cement, 10% water, 25% sand and 50% gravel. These four elements are introduced into a concrete mixer.

As mentioned above, the concrete production takes fewer steps that the cement production; however, it is necessary to use more materials than the latter process in order to obtain the final product.

The last difference between both processes is that the concrete mixer does not work with heat.

TEST 3, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

There is no doubt that traffic and pollution from vehicles have become huge problems, both in cities and on motorways everywhere. Solving these problems is likely to need more than a simple rise in the price of petrol.

While it is undeniable that private car use is one of the main causes of the increase in traffic and pollution, higher fuel costs are unlikely to limit the number of drivers for long. As this policy would also affect the cost of public transport, it would be very unpopular with everyone who needs to travel on the roads. But there are various other measures that could be implemented that would have a huge effect on these problems.

I think to tackle the problem of pollution, cleaner fuels need to be developed. The technology is already available to produce electric cars that would be both quieter and cleaner to use. Persuading manufacturers and travellers to adopt this new technology would be a more effective strategy for improving air quality, especially in cities.

However, traffic congestion will not be solved by changing the type of private vehicle people can use. To do this, we need to improve the choice of public transport services available to travellers. For example, if sufficient sky trains and underground train systems were built and effectively maintained in our major cities, then traffic on the roads would be dramatically reduced. Long-distance train and coach services should be made attractive and affordable alternatives to driving your own car for long journeys.

In conclusion, I think that long-term traffic and pollution reductions would depend on educating the public to use public transport more, and on governments using public money to construct and run efficient systems.

TEST 4, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 8** score. Here is the examiner's comment:

This answer covers all the relevant information in the task, and clearly highlights the main trends and comparisons. The only thing that would improve this answer is an introduction to the topic that is not so closely copied from the prompt.

The message is easy to follow because paragraphing is logical and information is clearly linked across the whole answer. A wide range of vocabulary is used accurately and effectively, although there are some rare imprecise choices and some repetitions. Similarly, a wide range of grammatical structures and sentence forms is used accurately and effectively, with only one significant error where punctuation is omitted in the final paragraph. Overall, most sentences are accurate.

The graph illustrates the quantities of goods transported in the United Kingdom by four different modes of transport between the time period of 1974 and 2002. Over this span of 28 years, the quantities of goods transported by road, water and pipeline have all increased while the quantity transported by rail has remained almost constant at about 40 million tonnes.

The largest quantity of goods transported both in 1974 and 2002 was by road (70 million tonnes and 98 million tonnes respectively) while the lowest both in 1974 and 2002 was by pipeline (about 5 million tonnes and 22 million tonnes respectively). The amount of goods transported by water was constant from 1974 to 1978, where it showed an exponential growth, rising to almost 60 million tonnes after which it plateaued for about 20 years before starting to rise gradually again.

The amount of goods transported by rail is almost constant at 40 million tonnes in 1974 and 2002, with decreases in quantity in between the years. It is also interesting to note that almost all showed a decrease in 1994 in amount of goods transported except for the pipeline, which actually peaked in that year.

In conclusion the road remains the most popular method of transporting goods in the UK while water and pipelines are becoming increasingly used, have not become more popular as a method of transport.

TEST 4, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 6.5** score. Here is the examiner's comment:

This script answers both parts of the task and presents a clear opinion on the issues. There are relevant main ideas, although the supporting examples are sometimes less appropriate. The answer is organised with some good use of connectives and time-markers giving an overall progression to the argument. There are also mistakes, however, and some lack of linking between sentences. Paragraphing is used, but is not always logical, and the concluding paragraph is confused. The range of vocabulary is the best feature of this script, and includes some good use of natural expressions and idiomatic language. There is some inappropriate use of a less formal style at times, but control is generally good. There are few word choices that are inaccurate, and errors in word form and spelling are only occasional. A variety of sentence forms is used with accuracy and fluency, but there are a lot of short, simple sentences that reduce the range of complex structures. There are grammatical errors and omissions, but these are not frequent.

In some countries the average weight of people is increasing and their levels of health and fitness are decreasing. I think that the cause of these problems are due to unhealthy lifestyle and the lack of exercise.

Nowadays, people are getting more and more lazy. They want convenience in everything. When they come home from work, they will have microwaved dinner or fast food so that they do not have to take the trouble to prepare a meal or wash up after dinner. The introduction of fast food is also the main cause of unhealthy living. People are opting a fast food restaurant meal rather than a simple homecooked meal. Yes, your burgers and pizzas tasted better than a homecooked meal but think of all the calories you are swallowing. The oil they used to fry your fries. It is literally black. Eating too much Fast food will also lead to health problems. Sugary drinks, packeted chips, candies and chocolate are also some of the causes that contributes to unhealthy lifestyle. Heavy consumption can lead to weight gain and diabetes.

I think that the main cause is the lack of exercise. As you grow older, your metabolism rate drops. Even if you are eating the same amount as before, you will still gain weight. The one and only solution to this is exercise. The recommended exercise per day is at least 30 minutes of brisk walking. This target can be easily achieved if people do not drive to work. They can take a bus or a train and drip one stop earlier than walk to the office. Every little bit counts. When you comes home from work, you can play with your kids or bring the dog for a walk. Anything to get your attention away from the couch. More exercise will surpress your cravings for sugary stuffs.

People should also balance their diet. For example, by eating more vegetables and fruits. Eat less meat and drink plenty of water throughout the day. Organise time with your family to take a walk outdoors to enjoy the sceneries rather than cooping yourself in the house. This is healthy living for the body, heart and the soul. It is also less likely to fall sick if you do plenty of exercise as your body is strong enough to fight off illness and diseases.

TEST A, WRITING TASK 1 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Dear Dave,

I am writing to let you know that at last we have moved to a bigger house! We just couldn't go on living in the two-bedroom bungalow now that the twins are growing up and the new baby has arrived. So we started looking – and one thing led to another and finally here we are in our new home.

I'm sure you'll like it. We have three bedrooms now, and a very modern bathroom and kitchen. The kids are happy because there is much more space with the big living room and the garden outside. But Michel is the happiest of all because he doesn't need to do much decorating.

Why don't you come round this weekend and see what you think of our new place? We would all love to see you and if the weather is good we can have a barbecue in the garden.

Our new address and phone number are below, so give us a call and let us know when to expect you.

Lots of love,

Françoise

TEST A, WRITING TASK 2 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 7** score. Here is the examiner's comment:

This script is from a very high-level candidate who does not read the task carefully and who loses marks for this and for a lack of paragraphing.

This answer is a sophisticated response to the first question in the task. Reasons for increases in both long-distance and local travel are analysed and argued. However, the second question on the benefits for the traveller is not addressed at all, so the task is only partially answered and this limits the rating. Although the answer is logically organised and ideas are well linked, unfortunately there is no attempt at paragraphing. This makes it more difficult for the reader to identify the main points in the argument. A wide range of language is used naturally and accurately. There are no noticeable mistakes in the use of vocabulary or grammar and only rare lapses in the use of punctuation and spelling. Otherwise, the writer has full control of the language used.

Today more people are travelling than ever before. The reasons for this increase are many and varied. On a simplistic level, there are larger numbers of means of transportation – there are more cars, buses and trains in operation. However, the sheer number of transportation means is not enough to explain this increase. The cost of travelling; even though it is at present increasing due to an economic slow-down globally; is still relatively affordable to many people. This affordability is further enhanced by the use of credit cards and loans in order to fund travel, especially for holiday purposes. An increase of travel companies in competition with each other has also helped bring package prices down, while an increase in the number of operating flights globally has also increased, giving rise to falling air-fare prices. In addition, people now have more leisure time and disposable incomes. The combination of these two variables with unrelenting advertising campaigns from travel companies and cruise ship operators arguably leads to an increase in the number of people travelling, in this case for holiday purposes. Another reason why people travel is going to work. More than ever before, people are travelling greater distances to get to work. Large industrial sites for both service and production industries are tending to be located outside city areas. This invariably leads to increases in the number of people travelling locally. In conclusion, there are many reasons why more people are travelling both internationally and locally, for business and for leisure. What is sure is that this increase is likely to continue until travelling at current rates is no longer economically viable.

TEST B, WRITING TASK 1 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 4.5** score. Here is the examiner's comment:

The answer addresses the task and, although the response to bullet two is limited and not wholly focused on the prompt, the letter has a clear purpose. The points are organised but do not flow well because the progression is not always signalled clearly. Ideas can be linked, but there is only limited use of connectives, and these are not always accurate. Vocabulary is also limited, with mistakes in even basic words so the reader has to make some effort to follow the meaning. Similarly, control of sentence structure and grammar is weak, and punctuation is not used accurately. There are some correct structures, but errors are very frequent and are confusing for the reader.

Dear Sir or Madam,

I am writing this Letter to explain my problem which recently I bought dish
From your shops, then it is broke.

Last week I bought a small piece of dish For my kitchen and I got warranty
for that, when I current it to my home suddenly when I walking on the street
I heared something is broke, then, I opened my bag, unfortunately my dish is
broke and I think It was changed because that piece Like old and not that piece
which I saw in first time. I call your shop several times, but, unfortunately no
answer from your shop.

I would be grateful If you returen my money or changed this piece, Allso, I like to
talk with that man who changed my dish and I would Like from you to stoped
hem for short time for his Job.

faithfully

TEST B, WRITING TASK 2 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Some countries have single-sex education models, while in others both single sex and mixed schools co-exist and it is up to the parents or the children to decide which model is preferable.

Some educationalists think it is more effective to educate boys and girls in single-sex schools because they believe this environment reduces distractions and encourages pupils to concentrate on their studies. This is probably true to some extent. It also allows more equality among pupils and gives more opportunity to all those at the school to choose subjects more freely without gender prejudice. For example, a much higher proportion of girls study science to a high level when they attend girls' schools than their counterparts in mixed schools do. Similarly, boys in single-sex schools are more likely to take cookery classes and to study languages, which are often thought of as traditional subjects for girls.

On the other hand, some experts would argue that mixed schools prepare their pupils better for their future lives. Girls and boys learn to live and work together from an early age and are consequently not emotionally underdeveloped in their relations with the opposite sex. They are also able to learn from each other, and to experience different types of skill and talent than might be evident in a single gender environment.

Personally, I think that there are advantages to both systems. I went to a mixed school, but feel that I myself missed the opportunity to specialise in science because it was seen as the natural domain and career path for boys when I was a girl. So because of that, I would have preferred to go to a girls' school. But hopefully times have changed, and both genders of student can have equal chances to study what they want to in whichever type of school they attend.

Tapescripts

TEST 1

SECTION 1

WOMAN:	Good evening. King's Restaurant.	<i>Example</i>
MAN:	Good evening. I'm ringing about the job I understand you have vacant.	
WOMAN:	Oh yes.	
MAN:	I'd like to find out a few more details, if I may.	
WOMAN:	Yes, of course. Can I take your name?	
MAN:	It's Peter Chin.	
WOMAN:	Okay Peter. Well, if you want to ask about the job and then if we're both still interested, we could arrange for you to come for an interview.	
MAN:	Great, thanks. I'm afraid I missed the advert for the job but heard about it from a friend.	
WOMAN:	That's no problem at all. What would you like to know?	
MAN:	Well, um, what sort of work is it – washing up?	
WOMAN:	It's answering the phone.	Q1
MAN:	Oh right, fine.	
WOMAN:	And not waiting at table.	
MAN:	That'd be good. And how many nights a week would it be?	
WOMAN:	Well, we're really only busy at the weekend.	
MAN:	So two nights?	
WOMAN:	Three actually, so it would work out at twelve hours a week.	
MAN:	That'd be fine. It wouldn't interfere with my studies.	
WOMAN:	Are you at the university?	
MAN:	Yes. First year Physics student.	
WOMAN:	Oh, right.	
MAN:	Um, and because I'm not an EU national would I need a work permit?	
WOMAN:	Yes you would. Just get your tutor to sign it.	
MAN:	That wouldn't be a problem, if I were to get the job. Um, where exactly is the restaurant?	
WOMAN:	Well, we have two branches – the one we're recruiting for is in Hillsdunne Road.	Q2
MAN:	I don't know that. How do you spell it please?	
WOMAN:	It's H-I-double L-S-D-U-double N-E Road.	
MAN:	Got that. Thanks. Is it near a bus stop?	
WOMAN:	Yes. The nearest one would probably be just beside the Library.	Q3
MAN:	Oh yes, I know it. That'd be fine for me. And could I ask about the pay?	
WOMAN:	We're offering £4.45 an hour.	Q4
MAN:	That's very good. My last job was £3.95 an hour.	
WOMAN:	We feel it's pretty good and we also offer some good fringe benefits.	
MAN:	Really?	
WOMAN:	Well, we give you a free dinner, so you eat well.	
MAN:	Right, better than hostel food!	

- WOMAN: We certainly hope so! And we also offer extra pay for working on national holidays. Q5
- MAN: Oh, that's a really good perk, isn't it?
- WOMAN: Yes, we think so. And then because of the difficulties of getting public transport, if you're working after 11 o'clock we drive you home. Q6
- MAN: Oh, that's good to know.
- WOMAN: Well, we'd certainly be interested in inviting you for an interview, if you're still interested?
- MAN: Oh yes, certainly. Could I just also ask what qualities you're looking for?
- WOMAN: Well, for this particular job we want a clear voice, which you obviously do have! Q7
- MAN: Thanks.
- WOMAN: And you must be able to think quickly, you know. Q8
- MAN: Well, I hope I'd ...
- WOMAN: So, when could you come in for an interview? We're actually quite quiet tonight?
- MAN: Sorry, I couldn't come tonight. Or tomorrow, I'm afraid. Thursday's okay – that'd be 22nd of October. Q9
- WOMAN: Fine, after 5 p.m.?
- MAN: Yes, fine. Would 6 o'clock be okay?
- WOMAN: Perfect. And could you bring along the names of two referees?
- MAN: Yes, that's fine, no problem.
- WOMAN: Good. I look forward to seeing you.
- MAN: Oh, by the way, who should I ask for?
- WOMAN: Oh yes, of course, sorry. My name is Samira Manuja. Q10
- MAN: Can you spell that, please?
- WOMAN: M-A-N-U-J-A.
- MAN: Okay, I've got that. Thanks very much.
- WOMAN: Look forward to seeing you ...

SECTION 2

- ANDREW: Now we go to Jane who is going to tell us about what's happening in town this weekend.
- JANE: Right, thanks Andrew, and now on to what's new, and do we really need yet another sports shop in Bradcaster? Well, most of you probably know Sports World – the branch of a Danish sports goods company that opened a few years ago – it's attracted a lot of custom, and so the company has now decided to open another branch in the area. It's going to be in the shopping centre to the west of Bradcaster, so that will be good news for all of you who've found the original shop in the north of the town hard to get to. Q11
- I was invited to a special preview and I can promise you, this is the ultimate in sports retailing. The whole place has been given a new minimalist look with the company's signature colours of black and red. The first three floors have a huge range of sports clothing as well as equipment, and on the top floor there's a café and a book and DVD section. You'll find all the well-known names as well as some less well-known ones. If they haven't got exactly what you want in stock they promise to get it for you in ten days. Unlike the other store, where it Q12
- Q13
- Q14

can take up to fourteen days. They cover all the major sports, including football, tennis and swimming, but they particularly focus on running, and they claim to have the widest range of equipment in the country. As well as that, a whole section of the third floor is devoted to sports bags, including the latest designs from the States – if you can't find what you want here, it doesn't exist!

Q15

Q16

The shop will be open from 9.00 am this Saturday and if you go along to the opening then you'll have the chance to meet the national 400 metres running champion Paul King, who's coming along to open the shop, and he will be staying around until about midday to chat to any fans who want to meet him and sign autographs.

Q17

Then there will be a whole range of special attractions all weekend. There will be free tickets for local sporting events for the first 50 customers, and also a special competition open to all. Just answer fifteen out of twenty sports questions correctly to win a signed copy of Paul King's DVD 'Spring Tips', while the first person to get all the questions correct gets a year's free membership of the Bradcaster Gym. All entrants will receive a special Sports calendar with details of all Bradcaster fixtures in the coming year.

Q18

One of the special opening offers is a fitness test – a complete review of your cardiac fitness and muscle tone, actually done in the shop by qualified staff. This would normally cost £30.00 but is available at half price for this month only. There are only a limited number of places available for this, so to make a booking phone 560341. In addition, if you open an account you get lots more special offers including the chance to try out equipment at special open evenings ...

Q19 & 20

SECTION 3

TEACHER: Before we start, Spiros and Hiroko, thanks for coming in today to talk about your recent study experiences and congratulations to you both in doing so well in your first semester exams! I'd like to discuss with you the value of the English for Academic Purposes course you did here last year before starting your university course. Spiros, if I could start with you, what parts of the programme have now proved to be particularly valuable to you?

SPIROS: I think that having to do a seminar presentation really helped me. For example, a couple of weeks ago in our marketing subject, when it was my turn to give a presentation I felt quite confident. Of course, I was still nervous but because I had done one before, I knew what to expect. Also, I know I was well-prepared and I had practised my timing. In fact, I think that in relation to some of the other people in my group, I did quite a good job because my overall style was quite professional. What about you, Hiroko?

Q21

HIROKO: Mmm, that's interesting. In my group, I was really surprised by the way the students did their presentations – they just read their notes aloud! Can you believe that? They didn't worry about their presentation style or keeping eye contact with their audience – and I remember that these things were really stressed to us in the course here.

Q22

TEACHER: So, how did you approach your presentation, Hiroko?

- HIROKO: Well, to speak frankly, I read my notes too! At the time, it was a relief to do it this way, but actually when I had finished, I didn't feel any real sense of Q23
satisfaction. I didn't feel positive about the experience at all.
- SPIROS: That's a pity. You know, although I was pleased with my presentation, I am not so pleased with my actual performance right now in the Q24
tutorials – during the whole semester I've not said anything in our tutorial discussions. Not a word.
- HIROKO: Really, Spiros? Why's that? Do the other students talk too much?
- SPIROS: It's partly that, but it's mostly because I have had no confidence to speak out. Their style of speaking is so different – it's not the style we were used to during the course. They use so many colloquialisms, they're not very polite and sometimes there seems to be no order in their discussion. Also, they are very familiar with each other, so because they know each other's Q25
habits, they can let each other into the discussion.
- HIROKO: You're right, Spiros, I've experienced that too.
-
- HIROKO: For most of this semester, I've said absolutely nothing in tutorials. But recently, I've been trying to speak up more and I just jump in, and I've Q26
noticed an interesting thing, I've noticed that if they thought my point was interesting or new, then the next time they actually asked for my opinion, and then it was much easier for me to be part of the discussion.
- SPIROS: That's great, Hiroko! I hope that happens for me next semester – I'll have to work hard to find some interesting points. What helped you to find these ideas?
- HIROKO: I think that one thing that helped me with this was the reading. I've had to do so much reading this semester just to help me make sense of the lectures. At first I couldn't understand what the lecturers were talking about, so I had to turn to the books and journals. Every night I read for Q27
hours, using the lists of references that were given, and I made pages of notes. At breakfast, I read and read my notes again. This habit has helped me to follow the ideas in the lectures, and it's also given me some ideas to use in the tutorials.
- SPIROS: But I did so much reading anyway – I don't think there's any time left over for anything extra. My reading speed is still quite slow, though I'm much Q28
better at dealing with vocabulary than I used to be.
- TEACHER: What else do you think we could add to the course program to help with this reading problem?
- SPIROS: There's not really anything because it's my problem. I remember we were given long articles to read. We didn't like that but now I realise that reading those long articles was good preparation for the things I need to read now. Also, in class we regularly had speed-reading tasks to do, and we kept a record of our reading speed, so the teachers were encouraging us to work on that.
- HIROKO: That's true Spiros, but what we read could have been different. Sometimes in the English class I felt frustrated when I had to read articles about the environment or health or education, because I wanted Q29
to concentrate on my own field, but we didn't read anything about engineering. So, I think I wasted some time learning vocabulary I didn't need.
- TEACHER: But surely the strategies you were taught for dealing with that vocabulary were helpful.

- HIROKO: Yes, but psychologically speaking, I would have felt much better working on reading from my own field. What do you think Spiros? Q30
- SPIROS: I agree; that would have helped my confidence too and I would have been more motivated. It was good though that we could work on our own topics when we wrote the research assignments.
- TEACHER: Okay, let's move on to writing now ...

SECTION 4

Good afternoon everyone. Well, with some of you about to go out on field work it's timely that in this afternoon's session I'll be sharing some ideas about the reasons why groups of whales and dolphins sometimes swim ashore from the sea right onto the beach and, most often, die in what are known as 'mass strandings'.

Unfortunately, this type of event is a frequent occurrence in some of the locations that you'll be travelling to, where sometimes the tide goes out suddenly, confusing the animals. However, there are many other theories about the causes of mass strandings. Q31

The first is that the behaviour is linked to parasites. It's often found that stranded animals were infested with large numbers of parasites. For instance, a type of worm is commonly found in the ears of dead whales. Since marine animals rely heavily on their hearing to navigate, this type of infestation has the potential to be very harmful. Q32

Another theory is related to toxins, or poisons. These have also been found to contribute to the death of many marine animals. Many toxins, as I'm sure you're aware, originate from plants, or animals. The whale ingests these toxins in its normal feeding behaviour but whether these poisons directly or indirectly lead to stranding and death, seems to depend upon the toxin involved. Q33

In 1988, for example, fourteen humpback whales examined after stranding along the beaches of Cape Cod were found to have been poisoned after eating tuna that contained saxitoxin, the same toxin that can be fatal in humans.

Alternatively, it has also been suggested that some animals strand accidentally by following their prey ashore in the confusion of the chase. In 1995 David Thurston monitored pilot whales that beached after following squid ashore. However, this idea does not seem to hold true for the majority of mass strandings because examination of the animals' stomach contents reveal that most had not been feeding as they stranded. Q34

There are also some new theories which link strandings to humans. A growing concern is that loud noises in the ocean cause strandings. Noises such as those caused by military exercises are of particular concern and have been pinpointed as the cause of some strandings of late. Q35

One of these, a mass stranding of whales in 2000 in the Bahamas coincided closely with experiments using a new submarine detection system. There were several factors that made this stranding stand out as different from previous strandings. This led researchers to look for a new cause. For one, all the stranded animals were healthy. In addition, the animals were spread out along 38 kilometres of coast, whereas it's more common for the animals to be found in a group when mass strandings occur. Q36 Q37

A final theory is related to group behaviour, and suggests that sea mammals cannot distinguish between sick and healthy leaders and will follow sick leaders, even to an inevitable death. This is a particularly interesting theory since the whales that are thought to be most social – the toothed whales – are the group that strand the most frequently. Q38

The theory is also supported by evidence from a dolphin stranding in 1994. Examination of the dead animals revealed that apart from the leader, all the others had been healthy at the time of their death. Q39

Without one consistent theory however it is very hard for us to do anything about this phenomenon except to assist animals where and when we can. Stranding networks have been established around the world to aid in rescuing animals and collecting samples from those that could not be helped. I recommend John Connor's *Marine Mammals Ashore* as an excellent starting point if you're interested in finding out more about these networks, or establishing one yourself. Q40

TEST 2

SECTION 1

MAN:	Good morning. Can I help you?	
WOMAN:	Yes. I've just been accepted on a course at the university and I'd like to try and arrange accommodation in the <u>hall of residence</u> .	Example
MAN:	Yes, certainly. Please sit down. What I'll do is fill in a form with you to find out a little more about your preferences and so forth.	
WOMAN:	Thank you.	
MAN:	So first of all, can I take your name?	
WOMAN:	It's Anu Bhatt.	Q1
MAN:	Could you spell your name please?	
WOMAN:	Yes. A-N-U ... B-H-A double T.	
MAN:	Thanks, and could I ask your date of birth?	
WOMAN:	<u>31st March 1972.</u>	Q2
MAN:	Thank you. And where are you from?	
WOMAN:	India.	
MAN:	Oh right. And what will you be studying?	
WOMAN:	<u>I'm doing a course in nursing.</u>	Q3
MAN:	Right, thank you. And how long would you want to stay in hall, do you think?	
WOMAN:	Well, it'll take three years but I'd <u>only</u> like to stay in hall for two. I'd like to think about living outside for the third year.	Q4
MAN:	Fine. And what did you have in mind for catering? Do you want to cook for yourself or have all your meals provided, that's full board?	
WOMAN:	Is there something in between?	
MAN:	Yes. You can just have evening meal provided, which is half board.	
WOMAN:	That's what I'd prefer.	
MAN:	Yes, a lot of students opt for that. Now, with that in mind, do you have any special diet, anything we should know about?	
WOMAN:	Yes, <u>I don't take red meat.</u>	Q5
MAN:	No red meat.	

MAN: Now, thinking about the room itself, we have a number of options. You can have a single study bedroom or you can have a shared one. These are both what we call simple rooms. The other alternative is to opt for a single bedsit which actually has more space and better facilities. There's about £20 a week difference between them.

WOMAN:	Well, actually my grant is quite generous and I think the bedsit sounds the best option.	Q6
MAN:	Lovely. I'll put you down for that and we'll see what availability is like. Now can I ask some other personal details which we like to have on record?	
WOMAN:	Yes, of course.	
MAN:	I wonder if you could let us know what your interests are. This might help us get a closer match for placing you in a particular hall.	
WOMAN:	Ummm. Well, I love the theatre.	Q7
MAN:	Right.	
WOMAN:	And I enjoy sports, particularly badminton.	
MAN:	That's worth knowing. Now, what we finish with on the form is really a list from you of what your priorities are in choosing a hall and we'll do our best to take these into account.	
WOMAN:	Well, the first thing is I'd prefer a hall where there are other mature students, if possible.	Q8
MAN:	Yes, we do have halls which tend to cater for slightly older students.	
WOMAN:	Ummm and I'd prefer to be out of town.	Q9
MAN:	That's actually very good for you because we tend to have more vacancies in out-of-town halls.	
WOMAN:	Lucky!	
MAN:	Yes. Anything else?	
WOMAN:	Well, I would like somewhere with a shared area, a TV room for example, or something like that. It's a good way to socialise.	Q10
MAN:	It certainly is.	
WOMAN:	That's it.	
MAN:	Now, we just need a contact telephone number for you.	
WOMAN:	Sure, I'll just find it. It's double 67549.	
MAN:	Great, so we'll be in contact with you as soon as possible ...	

SECTION 2

Hello, I'm delighted to welcome you to our Wildlife Club, and very pleased that you're interested in the countryside and the plants and creatures of this area. I think you'll be surprised at the variety we have here, even though we're not far from London. I'll start by telling you about some of the parks and open spaces nearby.

One very pleasant place is Halland Common. This has been public land for hundreds of years, and what you'll find interesting is that the River Ouse, which flows into the sea eighty kilometres away, has its source in the common. There's an information board about the plants and animals you can see here, and by the way, the common is accessible 24 hours a day.

Then there's Holt Island, which is noted for its great range of trees. In the past willows were grown here commercially for basket-making, and this ancient craft has recently been reintroduced. The island is only open to the public from Friday to Sunday, because it's quite small, and if there were people around every day, much of the wildlife would keep away.

From there it's just a short walk across the bridge to Longfield Country Park. Longfield has a modern replica of a farm from over two thousand years ago. Children's activities are often arranged there, like bread-making and face-painting. The park is only open during daylight hours, so bear that in mind if you decide to go there.

Longfield Park has a programme of activities throughout the year, and to give you a sample, this is what's happening in the next few days. On Monday you can learn about herbs, and how they've been used over the centuries. You'll start with a tour of our herb garden, practise the technique of using them as colour dyes for cloth, and listen to an illustrated talk about their use in cooking and medicine. Q14

Then on Wednesday you can join local experts to discover the variety of insects and birds that appear in the evening. We keep to a small number of people in the group, so if you want to go you'll need to phone the park ranger a few days ahead. There's a small charge, which you should pay when you turn up. Q15

I'm sure you're all keen to help with the practical task of looking after the park, so on Saturday you can join a working party. You'll have a choice of all sorts of activities, from planting hedges to picking up litter, so you'll be able to change from one to another when you feel like it. The rangers will be hard at work all day, but do come and join in, even for just a short while. One thing, though, is to make sure you're wearing something that you don't mind getting dirty or torn. Q16

And finally I'd like to tell you about our new wildlife area, Hinchbrook Park, which will be opened to the public next month. This slide doesn't really indicate how big it is, but anyway, you can see the two gates into the park, and the main paths. As you can see, there's a lake in the north west of the park, with a bird hide to the west of it, at the end of a path. So it'll be a nice quiet place for watching the birds on the lake. Q17

Fairly close to where refreshments are available, there's a dog-walking area in the southern part of the park, leading off from the path. And if you just want to sit and relax, you can go to the flower garden; that's the circular area on the map surrounded by paths. Q18 Q19

And finally, there's a wooded area in the western section of the park, between two paths. Q20

Okay, that's enough from me, so let's go on to ...

SECTION 3

- PAM: Hi Jun. As you know, I've asked you here today to discuss the future of our Self-Access Centre. We have to decide what we want to do about this very important resource for our English language students. So, can you tell me what the students think about this?
- JUN: Well, from the students' point of view, we would like to keep it. The majority of students say that they enjoy using it because it provides a variation on the classroom routine and they see it as a pretty major component of their course, but we would like to see some improvements to the equipment, particularly the computers; there aren't enough for one each at the moment and we always have to share. Q21
- PAM: Well yes, the teachers agree that it is a very valuable resource but one thing we have noticed is that a lot of the students are using it to check their personal emails. We don't want to stop you students using it, but we think the computers should be used as a learning resource, not for emails. Some of us also think that we could benefit a lot more by relocating the Self-Access Centre to the main University library building. How do you think the students would feel about that, Jun? Q22
- JUN: Well, the library is big enough to incorporate the Self-Access Centre, but it wouldn't be like a class activity anymore. Our main worry would be not being Q23

	able to go to a teacher for advice. I'm sure there would be plenty of things to do but we really need teachers to help us choose the best activities.	
PAM:	Well, there would still be a teacher present and he or she would guide the activities of the students, we wouldn't just leave them to get on with it.	
JUN:	Yes, but I think the students would be much happier keeping the existing set-up; they really like going to the Self-Access Centre with their teacher and staying together as a group to do activities. If we could just improve the resources and facilities, I think it would be fine. Is the cost going to be a problem?	
PAM:	It's not so much the expense that I'm worried about, and we've certainly got room to do it, but it's the problem of timetabling a teacher to be in there outside class hours. If we're going to spend a lot of money on equipment and resources, we really need to make sure that everything is looked after properly. Anyway, let's make some notes to see just what needs doing to improve the Centre.	Q24
PAM:	Now, what about the computers? I think it might be a good idea to install some new models. They would take up a lot less room and so that would increase the work space for text books and so on.	
JUN:	That would be great. It is a bit cramped in there at times.	
PAM:	What about other resources? Do you have a list of things that the students would like to see improved?	
JUN:	Yes, one of the comments that students frequently make is that they find it difficult to find materials that are appropriate for their level, especially reading resources, so I think we need to label them more clearly.	Q25
PAM:	Well that's easy enough, we can get that organised very quickly. In fact I think we should review all of the study resources as some of them are looking a bit out-of-date.	
JUN:	Definitely. The CD section especially needs to be more current. I think we should get some of the ones that go with our latest course books and also make multiple copies.	Q26
PAM:	Good, now I was also thinking about some different materials that we haven't got in there at all. What do you think of the idea of introducing some workbooks? If we break them up into separate pages and laminate them, they'd be a great resource. The students could study the main course book in class and then do follow-up practice in the Self-Access Centre.	Q27
JUN:	That sounds good.	
PAM:	Okay, now finally we need to think about how the room is used. I'll have to talk to the teachers and make sure we can all reach some agreement on a timetable to supervise the centre after class. But we also need to think about security, too. Especially if we're going to invest in some new equipment.	Q28
JUN:	What about putting in an alarm?	Q29
PAM:	Good idea. The other thing I'd like to do is talk to our technicians and see whether we could somehow limit the access to email. I really don't want to see that resource misused.	Q30
JUN:	What about if we agree to only use it before and after class?	
PAM:	Yes, that would be fine. OK, anyway ... that's great for now. We'll discuss it further when we've managed to ...	

SECTION 4

Good morning everyone. Now whether you're going to university to study business or some other subject, many of you will eventually end up working for a company of some kind.

Now, when you first start working somewhere you will realise that the organisation you've joined has certain characteristics. And we often refer to these social characteristics as the culture of the organisation – this includes its unwritten ideas, beliefs, values and things like that. One well known writer has classified company cultures by identifying four major types.

The first type is called the Power Culture, and it's usually found in small organisations.

It's the type of culture that needs a central source of power to be effective, and because control is in the hands of just one or two people there aren't many rules or procedures. Q31

Another characteristic is that communication usually takes the form of conversations rather than, say, formal meetings or written memos. Now one of the benefits of this culture is that the organisation has the ability to act quickly, so it responds well to threat, or danger on the one hand, and opportunity on the other. Q32

But on the negative side, this type of organisation doesn't always act effectively, because it depends too much on one or two people at the top, and when these people make poor decisions there's no-one else who can influence them. Q33

And the kind of person who does well in this type of business culture is one who is happy to take risks, and for whom job security is a low priority. Q34

The next type is known as Role Culture – that's R-O-L-E, not R-O-double L, by the way, and this type is usually found in large companies, which have lots of different levels in them. Q35

These organisations usually have separate departments that specialise in things like finance, or sales, or maintenance, or whatever. Each one is co-ordinated at the top by a small group of senior managers, and typically everyone's job is controlled by sets of rules and procedures – for example, there are specific job descriptions, rules for discipline, and so on. Q36

What are the benefits of this kind of culture? Well firstly, because it's found in large organisations, its fixed costs, or overheads as they're known, are low in relation to its output, or what it produces. In other words it can achieve economies of scale. And secondly, it is particularly successful in business markets where technical expertise is important. On the other hand, this culture is often very slow to recognise the need for change, and even slower to react. What kind of person does this type of culture suit? Q37
Q38

Well it suits employees who value security, and who don't particularly want to have responsibility. Q39

Moving on now to Task Cultures – this type is found in organisations that are project-oriented. You usually find it where the market for the company's product is extremely competitive, or where the products themselves have a short life-span. Usually top management delegates the projects, the people and other resources. And once these have been allocated, little day-to-day control is exercised from the top, because this would seem like 'breaking the rules'.

Now one of the major benefits of this culture is that it's flexible. But it does have some major disadvantages too. For instance, it can't produce economies of scale or great depth of expertise. People who like working in groups or teams prefer this type of culture. Q40

And finally, the fourth category is called the Person Culture ...

TEST 3

SECTION 1

- MAN: Greek Island Holidays, can I help you?
- WOMAN: Yes, I hope so. I have a friend who's just come back from Corfu and she's recommended some apartments in Arilas. She thought they might be on your list.
- MAN: Arilas, Arilas, let me see. Can you give me the names?
- WOMAN: Yes, the first's Rose Garden Apartments. I'd like to go with another friend in the last week of October.
- MAN: Well, we've got a lovely studio flat available at that time. I'm sure you'd enjoy the entertainment programme there too, with Greek dancing in the restaurant.
- WOMAN: And the cost for each of us?
- MAN: £219.
- WOMAN: That sounds very reasonable! I'm just jotting down some notes. Now the second one she mentioned was called Blue Bay.
- MAN: Blue Bay? Yes, in fact that's very popular and it has some special features.
- WOMAN: Really?
- MAN: The main attraction is the large swimming pool with salt water.
- WOMAN: Much healthier, I understand.
- MAN: That's right. And it isn't far from the beach, either – only 300 metres, and only around half a kilometre to some shops, so you don't have to be too energetic.
- WOMAN: Is it much more expensive than the first one?
- MAN: Let me just check. I think at the time you want to go it's around £260 – no £275 to be exact.
- WOMAN: Right, I've got that. Now there are just two more apartments to ask you about. Um, I can't read my own writing! Something to do with sun ...
- MAN: Sunshine, is it?
- WOMAN: I think you meant the Sunshade Apartments. They're on a mountainside.
- MAN: Any special features?
- WOMAN: Yes, each room has its own sun terrace and there are shared barbecue facilities.
- MAN: Sounds lovely!
- WOMAN: Yes, it is rather well-equipped. It also provides water sports – it has its own beach. There are facilities for water-skiing.
- MAN: Any kite-surfing? My friend's quite keen.
- WOMAN: Not at the hotel but I'm sure you'll find some in Arilas. There's also satellite TV in the apartments.
- MAN: And how much is that one?
- WOMAN: £490 with two sharing.
- MAN: You mean £245 each?
- WOMAN: I'm afraid not! Each person has to pay that amount and there must be at least two in an apartment.
- MAN: I don't think that would be within our budget, unfortunately. And the last one sounds a bit expensive too – the Grand!

Example

Q1

Q2

- MAN: Actually it's quite reasonable. It's an older style house with Greek paintings in every room, and a balcony outside. Q3
- WOMAN: Sounds nice. What are the views like?
- MAN: Well, there are forests all round and they hide a supermarket just down the road, so that's very useful for all your shopping needs. There's a disco in the area too. Q4
- WOMAN: And the price?
- MAN: £319 at that time, but if you leave it till November it goes down by 40%. Q5
- WOMAN: Too late, I'm afraid.
- MAN: Well, why don't I send you a brochure with full details, Ms ... ?
- WOMAN: Nash. But don't worry about that. I'm coming to Upminster soon and I'll call and get one. I just wanted to get an idea first.
- MAN: Well, that's fine. We've got plenty here when you come.
-
- WOMAN: If you've got a minute, could I just check a couple of points about insurance? I got one policy through the post but I'd like to see if yours is better.
- MAN: Fine. What would you like to know?
- WOMAN: Well, the one I've got has benefits and then the maximum amount you can claim. Is that like yours?
- MAN: Yes, that's how most of them are.
- WOMAN: Well, the first thing is cancellation. If the holiday's cancelled on the policy I've got, you can claim £8,000.
- MAN: We can improve on that, Ms Nash. For Greek islands and holidays, our maximum is £10,000. Q6
- WOMAN: That's good – of course our holiday won't even cost £1,000 together!
- MAN: It's still sensible to have good cover. Now, if you go to hospital, we allow £600.
- WOMAN: Yes, mine's similar.
- MAN: And we also allow a relative to travel to your holiday resort. Q7
- WOMAN: My policy just says their representative will help you.
- MAN: You can see there's another difference there. And what happens if you don't get on the plane?
- WOMAN: Nothing, as far as I can see on this form.
- MAN: Don't you have missed departure? Q8
- WOMAN: No, I'll just jot that down.
- MAN: We pay up to £1,000 for that, depending on the reason. And we're particularly generous about loss of personal belongings – up to £3,000, but not more than £500 for a single item. Q9
- WOMAN: Then I'd better not take my laptop!
- MAN: Not unless you insure it separately.
- WOMAN: OK – thanks very much for your time – you've really been helpful. Can I get back to you? Your name is?
- MAN: Ben – Ludlow. That's L-U-D-L-O-W, I'm the Assistant Manager here. I'll give you my number. It's 081260 543216. Q10
- WOMAN: But didn't I phone 081260 567294? That's what I've got on the paper.
- MAN: That's the main switchboard. I've given you my direct line.
- WOMAN: Right, thank you ...

SECTION 2

WOMAN:	For the second in our series about locally-run businesses, we meet Simon Winridge, co-founder of the hugely-successful Winridge Forest Railway Park. Welcome, Simon. Now, perhaps you can begin by telling us a little bit about how it all started.	
MAN:	Well, during the 1970s, my wife, Liz and I had just acquired 80 acres of sheep-farming land, and we decided to settle down and have children. Pretty soon we had a daughter, Sarah, and a son, Duncan. The place was wonderful for the kids: they particularly loved trains and gradually built up an enormous network of miniature railway track. I began to develop larger-scale models of locomotives but we didn't think anything more of it until I went on a trip to a theme park near Birmingham and decided we could do a much better job! So we set up a small one ourselves based on the miniature railway and we opened to the public for just a month that year. 1984 – in July – our driest month – because our children said they didn't want our guests to have a miserable, wet visit. I dealt with Park business and Liz carried on with the farm work.	Q11
	It soon became clear that we were onto a winner. We began to extend the railway track and lay it among more interesting landscape by planting trees, which in turn attracted more wildlife, and by making cuttings through the rock.	Q12
	Nowadays, we're open all year round and we're pleased to say that Winridge is one of the most popular visitor attractions in the area – with 50,000 visitors a year – a million and a half people have been through our doors since we opened.	Q13
	All these visitors mean we have had to expand our operation and it's now a truly family concern. I'm near to retirement age so I only concern myself with looking after the mechanical side of things – keeping the trains going. Liz now devotes all her energies to recruiting and supporting the large squadron of workers, which keep the place running smoothly. We're really pleased that after some years away teaching, Sarah has now returned to the park and makes sure the visitors are kept fed and watered, which keeps her pretty busy as you can imagine. Our son, Duncan, has been a stalwart of the park for the last ten years, taking over from me in the area of construction – and I'll say a little bit more about that in a moment – and his new wife, Judith, has also joined the team in charge of retail. That's becoming a tremendous growth area for us – a lot of people want to buy souvenirs.	Q14
		Q15
		Q16
		Q17
		Q18
WOMAN:	So have you finished your development of the site for the moment?	
MAN:	Not at all! We're constantly looking for ways to offer more to our visitors. The railway remains the central feature and there's now 1.2 kilometres of the line laid but we'd like to lay more. Because of the geology of the area, our greatest problem is digging tunnels. But we're gradually overcoming that. We're also very pleased with a new installation of the Go-Kart arena which is 120 square metres in area. Again the problem is the geology; we had to level the mounds on the track for safety reasons. We wanted to enable 5–12 year olds to use the go-karts. And the main attraction here is the Formula 1 Kart. We've known fights to break out over who gets it! And then finally to our most recent development which is the landscaped ...	Q19
		Q20

SECTION 3

- TUTOR: Ah Caroline ... come on in. Sit down.
 CAROLINE: Thanks.
 TUTOR: So how's the dissertation planning going?
 CAROLINE: Well Dr Schulmann, I'm still having a lot of trouble deciding on a title.
 TUTOR: Well, that's perfectly normal at this stage. And this is what your tutorials will help you to do.
 CAROLINE: Right.
 TUTOR: What we'll do is jot down some points that might help you in your decision. First of all, you have chosen your general topic area, haven't you?
 CAROLINE: Yes, it's the fishing industry. Q21
 TUTOR: Oh yes, that was one of the areas you mentioned. Now, what aspects of the course are you good at?
 CAROLINE: Well, I think I'm coping well with statistics, and I'm never bored by it. Q22
 TUTOR: Good. Anything else?
 CAROLINE: Well, I found computer modelling fascinating – I have no problem following what's being taught, whereas quite a few of my classmates find it difficult.
 TUTOR: Well, that's very good. Do you think these might be areas you could bring into your dissertation?
 CAROLINE: Oh yes, if possible. It's just that I'm having difficulty thinking how I can do that. You see I feel I don't have sufficient background information.
 TUTOR: I see. Well, do you take notes?
 CAROLINE: I'm very weak at note-taking. My teachers always used to say that. Q23
 TUTOR: Well, I think you really need to work on these weaknesses before you go any further.
 CAROLINE: What do you suggest?
-
- TUTOR: Well, I can go through the possible strategies with you and let you decide where to go from there.
 CAROLINE: Okay, thanks.
 TUTOR: Well, some people find it helpful to organise peer-group discussions – you know, each week a different person studies a different topic and shares it with the group.
 CAROLINE: Oh right.
 TUTOR: It really helps build confidence, you know, having to present something to others. Q24
 CAROLINE: I can see that.
 TUTOR: The drawback is that everyone in the group seems to share the same ideas ... they keep being repeated in all the dissertations. Q25
 CAROLINE: Okay.
 TUTOR: You could also try a service called 'Student Support'. It's designed to give you a structured programme over a number of weeks to develop your skills. Q26
 CAROLINE: Sounds good.
 TUTOR: Yes, unfortunately there are only a few places. But it's worth looking into. Q27
 CAROLINE: Yes, of course. I know I've got to work on my study skills.
 TUTOR: And then there are several study skills books you can consult.
 CAROLINE: Right.

TUTOR:	They'll be a good source of reference but the problem is they are, sometimes too general.	Q28
CAROLINE:	Yes, that's what I've found.	
TUTOR:	Other than that I would strongly advise quite simple ideas like using a card index.	
CAROLINE:	Well, yes, I've never done that before.	
TUTOR:	It's simple, but it really works because you have to get points down in a small space. Another thing I always advise is don't just take your notes and forget about them. Read everything three times – that'll really fix them in your mind.	Q29
CAROLINE:	Yes, I can see it'd take discipline but ...	
TUTOR:	Well, if you establish good study skills at this stage they'll be with you all your life.	
CAROLINE:	Oh yes, I completely agree. It's just that I don't seem to be able to discipline myself. I need to talk things over.	
TUTOR:	Well, we'll be continuing these tutorials of course. Let's arrange next month's now. Let's see, I can see you virtually any time during the week starting 22 nd January.	
CAROLINE:	What about the 24 th ? I'm free in the afternoon.	
TUTOR:	Sorry, I'm booked then. What about the following day?	
CAROLINE:	Thursday? I can make the morning.	
TUTOR:	Fine, we'll go for the 25 th then.	Q30
CAROLINE:	That's great, thanks.	

SECTION 4

Good morning. In the last few lectures I've been talking about the history of domestic building construction. But today I want to begin looking at some contemporary, experimental designs for housing. So, I'm going to start with a house which is constructed more or less under the ground. And one of the interesting things about this project is that the owners – both professionals but not architects – wanted to be closely involved, so they decided to manage the project themselves. Their chief aim was to create somewhere that was as environmentally-friendly as possible. But at the same time they wanted to live somewhere peaceful – they'd both grown up in a rural area and disliked urban life.

Q31

So the first thing they did was to look for a site. And they found a disused stone quarry in a beautiful area. The price was relatively low, and they liked the idea of recycling the land, as it were. As it was, the quarry was an ugly blot on the landscape, and it wasn't productive any longer, either.

Q32

They consulted various architects and looked at a number of designs before finally deciding on one. As I've said, it was a design for a sort of underground house, and it was built into the earth itself, with two storeys. The north, east and west sides were set in the earth, and only the sloping, south-facing side was exposed to light. That was made of a double layer of very strong glass. There were also photovoltaic tiles fixed to the top and bottom of this sloping wall. These are tiles that are designed to store energy from the sun. And the walls had a layer of foam around them too, to increase the insulation.

Q33

Q34

Now, what is of interest to us about this project is the features which make the building energy-efficient. Sunlight floods in through the glass wall, and to maximise it there are lots of mirrors and windows inside the house. That helps to spread the light around. So that's the first thing – light is utilised as fully as possible.

Q35

In addition, the special tiles on the outside convert energy from the sun and generate some of the house's electricity. In fact, and it's possible that in future the house may even generate an electricity surplus, and that the owners will be able to sell some to the national grid. Q36

As well as that, wherever possible, recycled materials have been used. For example, the floors are made of reclaimed wood. And the owners haven't bought a single item of new furniture – they just kept what they already had. And then there's the system for dealing with the waste produced in the house. This is dealt with organically – it's purified by being filtered through reed beds which have been planted for that purpose in the garden. So the occupants of the house won't pollute the land or use any damaging chemicals. Q37 Q38

It's true that the actual construction of the house was harmful to the environment, mainly because they had to use massive amounts of concrete – one of the biggest sources of carbon dioxide in manufacturing. And, as you know, this is very damaging to the environment. In total, the house construction has released 70 tons of carbon dioxide into the air. Now that's a frightening thought. However, once the initial 'debt' has been cleared – and it's been calculated that this will only take fifteen years – this underground house won't cost anything – environmentally I mean – because unlike ordinary houses, it is run in a way that is completely environmentally friendly. Q39 Q40

So, eco-housing like this is likely to become much more ...

TEST 4

SECTION 1

WOMAN: Can I help you?
MAN: Yes, I've just moved to this area with my wife and children and I'd like to know where we can all register with a doctor at a Health Centre.
WOMAN: Okay. Well, there's Doctor Green at The Harvey Clinic. We always recommend her for babies, because she's very good with them and she runs a special clinic. Example Q1
MAN: Oh ... actually my youngest child is five, so that wouldn't be any good for us.
WOMAN: Right.
MAN: Is there anywhere else I could try?
WOMAN: Yes, the Eshcol Health Practice is the next one on my list. Q2
MAN: How do you spell that?
WOMAN: E-S-H-C-O-L. And it's Doctor Fuller, who has space on his list. The clinic only opened a year ago, so the facilities are all very modern.
MAN: That sounds good.
WOMAN: And it's particularly good if you're busy during the day, because they also do appointments in the evening. They're closed on Saturday, though. Q3
The only other place on the list is the Health Centre on Shore Lane. You can register with Doctor Gormley, that's G-O-R-M-L-E-Y. He's new there, Q4
but the centre has a very good reputation.
MAN: Oh yes, I think I know the road. That would be the best one. Thanks.
Could you tell me, will all their services be free?

WOMAN: Erm ... there are usually some small charges that doctors make. Let me see what it says about the Shore Lane Centre. If you need to be vaccinated before any trips abroad, you won't have to pay for this. Erm, what else? The sports injury treatment service operates on a paying basis, as does the nutritional therapy service. Some health centres do offer alternative therapies like homeopathy as part of their pay-to-use service. Shore Lane are hoping to do this soon – I think they may start with acupuncture. And finally, if you need to prove you're healthy or haven't had any serious injuries before a new employer will accept you, you can get a free fitness check-up there, but you'd most likely have to pay for insurance medicals though. Q5 & 6

MAN: Okay, thanks. Q5 & 6

WOMAN: You might also be interested to know the Centre is running a pilot scheme of talks for patients. I've got the list here. Actually, they look very interesting.

MAN: What sort of things?

WOMAN: Well, the first one's about giving up smoking. It's next week, the twenty-fifth of February, at 7 pm, and that's in Room 4. It says, the talk will stress the health benefits particularly for people with asthma or heart disease. Q7

MAN: That sounds very interesting.

WOMAN: There's also a talk for families with children. It's on Healthy Eating, and takes place on the first of March at five o'clock.

MAN: Will that be at the Health Centre?

WOMAN: Erm, actually it's at the primary school on Shore Lane. I imagine they're inviting the parents of pupils there – it says here 'all welcome'. Q8

MAN: Mmm, I might go to that if I have time.

WOMAN: There's a couple of other talks – one giving advice about how to avoid injuries while doing exercise. It's on the ninth of March. Oh, it's a late afternoon talk, at four thirty, and it'll be in Room 6. It also says the talk is suitable for all ages. And finally, there's a talk called 'Stress Management' which is ... Q9 Q10

SECTION 2

MAN: Hello?

WOMAN: Hi. It's Laura Carlton here. We've just arrived at the holiday flat, but I can't get the hot water and heating to work.

MAN: Oh right! That's easy. Don't worry. In the upstairs cupboard, you'll find the water heater. You'll see three main controls on the left at the bottom of the heater. The first one – the round one on the far left – is the most important one for the heating and hot water. It's the main control switch. Make sure it's in the 'on' position. The switch itself doesn't light up, but the little square below will be black if the switch is 'off'. That's probably what's happened – it's got switched off by mistake. The middle one of these three controls – you'll see it's slightly larger than the first one – controls the radiators. If you feel cold while you're there and need the radiators on, this needs to be turned to maximum. The last of the three controls – the one on the right – is usually on about a number four setting which for the water in the taps is usually quite hot enough. Q11

- Below the heating controls in the middle is a small round plastic button. If there isn't enough water in the pipes, sometimes the heater goes out. If this happens you'll need to press this button to reset the heater. Hold it in for about five seconds and the heater should come on again. Then there's a little square indicator under the third knob that's a kind of alarm light. It'll flash if you need to reset the heater. Q12
- WOMAN: It sounds complicated ... Q12
- MAN: I'm sure you won't have any problems with it. There should be some more instructions on the side of the heater. Call me back if you can't make it work. Q13
- WOMAN: Okay.
-
- WOMAN: While you're on the phone, we haven't managed to find a few things we need, like extra pillows for the beds and some washing powder. Is there any here?
- MAN: Pillows ... yes. If you look in the cupboard, the large white one upstairs – to the left of the bathroom door – there should be four or five on the top shelf. And if you want to do some washing, there's some powder for that ... probably by the back door. There's a kind of shelf there above the sink. In fact, I'm sure there's some there, in a large blue box. You need about half a cup full for each wash. Q14
- And that reminds me, the spare key to the back door is hanging on a hook on the wall by the sitting room window. Please make sure to put it back when you've used it. The previous guests lost it in the garden and I had to get another one made! And if you have any trouble with the lamps, you'll find some spare bulbs in a large cardboard box. It's on top of the washing machine with all kinds of useful things in it. Q15
- Oh, and another thing I forgot to mention when we last spoke ... Q16
- WOMAN: Yes? Q17
- MAN: I've left you a local map, so you'll be able to find your way around easily. It shows the whole area. I put it in the top drawer of the chest under the TV in your bedroom. There's a whole file of local information in there too. Q18
- WOMAN: Thanks. What about visiting the town? Can you give us any advice?
- MAN: Yes. You'll need to take the car. It's too far to walk from the flat really. You have to pay to leave your car in all the car parks now I'm afraid ... I like the one that's by the station best and you can walk to the town centre from there in five minutes. That's where all the best restaurants are. But if you want a takeaway, the Italian one does really good pasta and pizzas. Call 7-3 double 2, 8-1 for that one, or 7 double 6, double 1, 9 for the Chinese. They're both good and they'll both deliver to the flat. Q19
- As for places to visit, yes, do go and see the railway museum. The exhibition is small but really good. It gets very crowded on Sundays, so I suggest you visit it on a quieter day, later in the week, but not on Thursdays which is market day – you won't find anywhere to park and it's also the only day of the week when they're not open! Anything else? Q20
- WOMAN: Not for the moment. Thanks!

SECTION 3

- PAUL: Hello, Kira, how are you?
- KIRA: Fine thanks, Paul, how are you?
- PAUL: Well, thanks. It's good to see you. It must be twelve months since you did our course?
- KIRA: That's right. It's nice to come back and say hello.
- PAUL: What course did you enrol in?
- KIRA: Actually, I went straight into third year Pharmacy. They credited me with two years, which probably made it more difficult for me.
- PAUL: On the other hand, you were lucky to be granted credits. Is that why you chose the course?
- KIRA: Yes. And, as I'd already finished a course in it in my country, I thought it would be easier if I studied something I already knew. Q21
- PAUL: I didn't realise you went into third year. I thought you started in first year. No wonder it was so hard! And what do you think is one of the big differences between studying at a university here and studying in your country?
- KIRA: Well, I've found it very difficult to write assignments, because I wasn't familiar with that aspect of the system here. The main problem is that the lecturers expect you to be critical. That made me feel really terrible. I thought "How can I possibly do it? How can I comment on someone else's research when they probably spent five years doing it?" I think a lot of people who come from overseas countries have similar problems. But after a while it became easier for me. People expect you to have problems with the process of reading and writing but, in fact, it is more a question of altering your viewpoint towards academic study. Q22
- PAUL: How was the content of the lectures? Was it easy for you?
- KIRA: I didn't really have many problems understanding lectures. The content was very similar to what I'd studied before.
- PAUL: And what about the lecturers themselves? Are they essentially the same as lecturers in your country?
- KIRA: Well actually, no. Here, they're much easier to approach. After every lecture you can go and ask them something you didn't understand. Or you can make an appointment and talk to them about anything in the course. Q23
- PAUL: Maybe you found them different because you're a more mature student now, whereas when you were studying in your country you were younger and not so assertive. Q24
- KIRA: No, I don't think that's the difference. Most of the students here do it. In my faculty, they all seem to make appointments – usually to talk about something in the course that's worrying them, but sometimes just about something that might really interest them, something they might want to specialise in. The lecturers must set aside certain times every week when they're available for students. Q25
- PAUL: That's good to hear.
-
- PAUL: And how was your timetable? Was it a very busy year?
- KIRA: Very, very busy. They make you work very hard. Apart from lectures, we had practical sessions in a lot of subjects. We did these in small groups. I had to go and work four hours every week in a community pharmacy. Q26
- Actually, I enjoyed this very much – meeting new people all the time. Then

- in second semester, we had to get experience in hospital dispensaries, so every second day we went to one of the big hospitals and worked there. Q27
- And on top of all that we had our assignments, which took me a lot of time. Oh, I nearly forgot, between first and second semesters, we had to work full-time for two weeks in a hospital. Q28
- PAUL: That does sound a very heavy year. So are you pleased now that you did it? Do you feel some sense of achievement?
- KIRA: Yeah, I do feel much more confident, which I suppose is the most important thing. Q29
- PAUL: And have you got any recommendations for people who are studying from overseas?
- KIRA: Well, I suppose they need very good English. It would be much better if they spent more time learning English before they enter the university, because you can be in big trouble if you don't understand what people are saying and you haven't got time to translate.
- PAUL: Anything else?
- KIRA: Well, as I said before, the biggest problem for me was a lack of familiarity with the education system here. Q30
- PAUL: It sounds as if it was a real challenge. Congratulations, Kira.
- KIRA: Thanks, Paul.

SECTION 4

Good morning. Today I'd like to present the findings of our Year 2 project on wildlife found in gardens throughout our city. I'll start by saying something about the background to the project, then talk a little bit about our research techniques, and then indicate some of our interim findings.

First of all, how did we choose our topic? Well, there are four of us in the group and one day while we were discussing a possible focus, two of the group mentioned that they had seen yet more sparrow-hawks – one of Britain's most interesting birds of prey – in their own city centre gardens and wondered why they were turning up in these gardens in great numbers. We were all very engaged by the idea of why wild animals would choose to inhabit a city garden. Why is it so popular with wildlife when the countryside itself is becoming less so? Q31

The first thing we did was to establish what proportion of the urban land is taken up by private gardens. We estimated that it was about one fifth, and this was endorsed by looking at large-scale usage maps in the town land survey office – 24% to be precise. Q32

Our own informal discussions with neighbours and friends led us to believe that many garden owners had interesting experiences to relate regarding wild animal sightings so we decided to survey garden owners from different areas of the city. Just over 100 of them completed a survey once every two weeks for twelve months – ticking off species they had seen from a pro forma list – and adding the names of any rarer ones. Meanwhile, we were doing our own observations in selected gardens throughout the city. We deliberately chose smaller ones because they were by far the most typical in the city. The whole point of the project was to look at the norm not the exception. Q33

Alongside this primary research on urban gardens, we were studying a lot of books about the decline of wild animals in the countryside and thinking of possible causes for this. Q34

So what did we find? Well, so much that I just won't have time to tell you about here. If you're interested in reading our more comprehensive findings, we've produced detailed

graphic representations on the college web-site and of course any of the group would be happy to talk to you about them. Just email us.

What we've decided to present today is information about just three species – because we felt these gave a good indication of the processes at work in rural and urban settings as a whole. Q36

The first species to generate a lot of interesting information was frogs. And there was a clear pattern here – they proliferate where there is suitable water. Garden ponds are on the increase, rural ponds are disappearing, leading to massive migration to the towns. Q37

Hedgehogs are also finding it easier to live in urban areas – this time because their predators are not finding it quite so attractive to leave their rural environment, so Q38

hedgehogs have a better survival rate in cities. We had lots of sightings, so all in all we had no difficulties with our efforts to count their numbers precisely. Q39

Our final species is the finest of bird singers, the song thrush. On the decline in the countryside, they are experiencing a resurgence in urban gardens because these days gardeners are buying lots of different plants which means there's an extensive range of seeds around, which is what they feed on. Another factor is the provision of nesting places – which is actually better in gardens than the countryside. Hard to believe it, but it's true. Q40
Incidentally, we discovered that a massive new survey on song thrushes is about to be launched, so you should keep an eye open for that.

Now, I'd be happy to answer any questions you may have ...

Model and sample answers for Writing tasks

TEST 1, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 7** score. Here is the examiner's comment:

This answer clearly presents the key features of the diagrams, and although the first map is described only briefly, this is acceptable for this particular task. The description is accurate though some aspects, such as the section on the accommodation, could have been more fully extended. The final paragraph summarises the main points effectively. The information is logically organised and can be easily followed throughout the response. A range of cohesive devices including reference and substitution is used appropriately, with only occasional inaccuracies. Some less common vocabulary and collocations are used appropriately, e.g. *central reception block*; *western accommodation units*, and there are no spelling errors. There is a variety of grammatical structures and many sentences contain no inaccuracies. Where errors do occur, they do not affect understanding.

The two maps show the same island while first one is before and the second one is after the construction for tourism.

Looking first at the one before construction, we can see a huge island with a beach in the west. The total length of the island is approximately 250 metres.

Moving on to the second map, we can see that there are lots of buildings on the island. There are two areas of accommodation. One is in the west near the beach while the other one is in the centre of the island. Between them, there is a restaurant in the north and a central reception block, which is surrounded by a vehicle track. This track also goes down to the pier where people can go sailing in the south sea of the island. Furthermore, tourists can swim near the beach in the west. A footpath connecting the western accommodation units also leads to the beach.

Overall, comparing the two maps, there are significant changes after this development. Not only lots of facilities are built on the island, but also the sea is used for activities. The new island has become a good place for tourism.

TEST 1, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Traditionally, children have begun studying foreign languages at secondary school, but introducing them earlier is recommended by some educationalists. This policy has been adopted by some educational authorities or individual schools, with both positive and negative outcomes.

The obvious argument in its favour is that young children pick up languages much more easily than teenagers. Their brains are still programmed to acquire their mother tongue, which facilitates learning another language, and unlike adolescents, they are not inhibited by self-consciousness.

The greater flexibility of the primary timetable allows for more frequent, shorter sessions and for a play-centred approach, thus maintaining learners' enthusiasm and progress. Their command of the language in later life will benefit from this early exposure, while learning other languages subsequently will be easier for them. They may also gain a better understanding of other cultures.

There are, however, some disadvantages. Primary school teachers are generalists, and may not have the necessary language skills themselves. If specialists have to be brought in to deliver these sessions, the flexibility referred to above is diminished. If primary language teaching is not standardised, secondary schools could be faced with a great variety of levels in different languages within their intake, resulting in a classroom experience which undoes the earlier gains. There is no advantage if enthusiastic primary pupils become demotivated as soon as they change schools. However, these issues can be addressed strategically within the policy adopted.

Anything which encourages language learning benefits society culturally and economically, and early exposure to language learning contributes to this. Young children's innate abilities should be harnessed to make these benefits more achievable.

TEST 2, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The chart shows the time spent by UK residents on different types of telephone calls between 1995 and 2002.

Local fixed line calls were the highest throughout the period, rising from 72 billion minutes in 1995 to just under 90 billion in 1998. After peaking at 90 billion the following year, these calls had fallen back to the 1995 figure by 2002.

National and international fixed line calls grew steadily from 38 billion to 61 billion at the end of the period in question, though the growth slowed over the last two years.

There was a dramatic increase in mobile calls from 2 billion to 46 billion minutes. This rise was particularly noticeable between 1999 and 2002, during which time the use of mobile phones tripled.

To sum up, although local fixed line calls were still the most popular in 2002, the gap between the three categories had narrowed considerably over the second half of the period in question.

TEST 2, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 8** score. Here is the examiner's comment:

The answer addresses all parts of the prompt sufficiently, focusing on the benefits for students rather than society. A number of relevant, extended and supported ideas are used to produce a well-developed response to the question. However, some ideas, for example the reference to the crime level, are not fully extended. The ideas are logically ordered and cohesion is consistently well managed. Paragraphing is used appropriately, and progression between paragraphs is managed with some sophistication. A wide range of vocabulary is used to articulate meanings precisely, with skilful use of uncommon lexis, and very few inappropriacies. The range of grammatical structures used is also wide, with only occasional minor errors.

It has been suggested that high school students should be involved in unpaid community services as a compulsory part of high school programmes. Most of the colleges are already providing opportunities to gain work experience, however these are not compulsory. In my opinion, sending students to work in community services is a good idea as it can provide them with many lots of valuable skills.

Life skills are very important and by doing voluntary work, students can learn how to communicate with others and work in a team but also how to manage their time and improve their organisational skills. Nowadays, unfortunately, teenagers do not have many after-school activities. After-school clubs are no longer that popular and students mostly go home and sit in front of the TV, browse internet or play video games.

By giving them compulsory work activities with charitable or community organisations, they will be encouraged to do something more creative. Skills gained through compulsory work will not only be an asset on their CV but also increase their employability. Students will also gain more respect towards work and money as they will realise that it is not that easy to earn them and hopefully will learn to spend them in a more practical way.

Healthy life balance and exercise are strongly promoted by the NHS, and therefore any kind of spare time charity work will prevent from sitting and doing nothing. It could also possibly reduce the crime level in the high school age group. If students have activities to do, they will not be bored and come up with silly ideas which can be dangerous for them or their surroundings.

In conclusion, I think this is a very good idea, and I hope this programme will be put into action for high schools/colleges shortly.

TEST 3, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 6** score. Here is the examiner's comment:

The answer addresses the task, reporting sufficient details for the reader to be accurately informed, even though in each chart one element is implied rather than overtly stated. Clear comparisons are drawn between the two countries. An overview is given, although focusing on only one age group reduces its clarity. The information is well organised and a range of linking devices used, e.g. *whereas*; *the latter country*. Vocabulary is adequate for the task and generally accurate, though attempts to use less common words are less successful. A few errors occur in word formation, e.g. *statistic* (statistical); *estimative* (estimate), but they do not affect understanding. Simple and complex sentence forms are produced with few grammatical errors, but the range of structures is rather restricted.

The diagrams show statistic information regarding the ages of the habitants of Yemen and Italy in 2000 and also a estimative for 2050.

We can see that in 2000 the majority of people in Yemen was between 0 and 14 years old, with 50.1%, whereas in Italy most of the population was between 15-59 years old (61.6%), in the same year. On the other hand, just 3.6% of people in the former country was 60 years old or more in 2000, while in the latter country this figure is represented with 24.1%.

The projections for 2050 show that the number of people with 15-59 years and 60 years or more will increase in Yemen, reaching 57.3% and 5.7% respectively. In contrast, in Italy, the population with 15-59 years will decrease to 46.2%, while people with 60 years or more will grow to 42.3%.

Overall, it is possible to see that there is an upward trend on the rates of people with 60 years or more in both countries.

TEST 3, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

A problem of modern societies is the declining level of health in the general population, with conflicting views on how to tackle this worrying trend. One possible solution is to provide more sports facilities to encourage a more active lifestyle.

Advocates of this believe that today's sedentary lifestyle and stressful working conditions mean that physical activity is no longer part of either our work or our leisure time. If there were easy-to-reach local sports centres, we would be more likely to make exercise a regular part of our lives, rather than just collapsing in front of a screen every evening. The variety of sports that could be offered would cater for all ages, levels of fitness and interests: those with painful memories of PE at school might be happier in the swimming pool than on the football pitch.

However, there may be better ways of tackling this problem. Interest in sport is not universal, and additional facilities might simply attract the already fit, not those who most need them. Physical activity could be encouraged relatively cheaply, for example by installing exercise equipment in parks, as my local council has done. This has the added benefit that parents and children often use them together just for fun, which develops a positive attitude to exercise at an early age.

As well as physical activity, high tax penalties could be imposed on high-fat food products, tobacco and alcohol, as excessive consumption of any of these contributes to poor health. Even improving public transport would help: it takes longer to walk to the bus stop than to the car.

In my opinion, focusing on sports facilities is too narrow an approach and would not have the desired results. People should be encouraged not only to be more physically active but also to adopt a healthier lifestyle in general.

TEST 4, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The graph shows energy consumption in the US from 1980 to 2012, and projected consumption to 2030.

Petrol and oil are the dominant fuel sources throughout this period, with 35 quadrillion (35q) units used in 1980, rising to 42q in 2012. Despite some initial fluctuation, from 1995 there was a steady increase. This is expected to continue, reaching 47q in 2030.

Consumption of energy derived from natural gas and coal is similar over the period. From 20q and 15q respectively in 1980, gas showed an initial fall and coal a gradual increase, with the two fuels equal between 1985 and 1990. Consumption has fluctuated since 1990 but both now provide 24q. Coal is predicted to increase steadily to 31q in 2030, whereas after 2014, gas will remain stable at 25q.

In 1980, energy from nuclear, hydro- and solar/wind power was equal at only 4q. Nuclear has risen by 3q, and solar/wind by 2. After slight increases, hydropower has fallen back to the 1980 figure. It is expected to maintain this level until 2030, while the others should rise slightly after 2025.

Overall, the US will continue to rely on fossil fuels, with sustainable and nuclear energy sources remaining relatively insignificant.

TEST 4, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 4** score. Here is the examiner's comment:

This answer expresses a position on the topic, but the ideas are not always clear because of repetition and a lack of development (the answer is unfinished and underlength). The information is not organised coherently and it is difficult to follow a progression through the answer. Although some linking devices occur, substitution and referencing are not used, and connections between the ideas are unclear. The range of vocabulary is limited and repetitive, and inappropriate word choices, e.g. *small country language*; *invest*, make it difficult for the reader to follow the meaning. There are some attempts to produce complex sentences and some grammatical structures are produced accurately, but frequent errors and omissions in basic sentence formation and in punctuation make the writing difficult to understand.

I agree about this opinion.

Nowadays, Several languages die out. I think this situation is right. In the world, already have to much languages minimum 100 languages include small country. But we know Just some languages, kind of English, French Japanese, Chinies.

At this moment, we live in the world, So we need frist language in the world. Therefor several languages need to die out.

Also, small country language is almost difficult to learn and not usuful. so we don't need to learn this languages. Even if we learning this languages not using in the world. Just usuful this country And we don't find small language education academy.

So I think small country languages make spend money and time also we need find first language using all of country. This is very important for all country of developing.

After when decide first language our communication will be more easier with another country people. Beside we don't need invest of another language education, and we can invest another part kind of economic and culture developing by decrease education money.

Accordng to this opinion,

TEST A, WRITING TASK 1 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Dear Jennifer

I am writing to request some unpaid leave next month.

My parents' 60th wedding anniversary is on March 21st, and they are planning to celebrate this significant achievement with all their children and grandchildren. To do this, they have rented a house big enough to accommodate the whole family.

To participate in this special occasion, I would need to be away from work for four days, from Monday 19th to Thursday 23rd. My schedule for that week is relatively light, apart from two meetings with clients. Netta would be able to attend these in my place, as she has had previous dealings with both companies and knows the relevant staff there. I have no other urgent work commitments at that time.

I would be very grateful if you could allow me this time. These few days are very important to my parents and the whole family, and it would be a way to thank them for all the support they have given me.

Best wishes

TEST A, WRITING TASK 2 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 6** score. Here is the examiner's comment:

This answer addresses all parts of the task, though the disadvantages of fame are covered more fully than the advantages. Main ideas are relevant, though the answer would be better if they were developed further. The conclusions drawn are at times repetitive. The organisation of ideas is coherent and some are linked effectively, but the openings of paragraphs 2, 3, 4 and 5 show some limitations. Paragraphs 2 and 3 do not develop a central topic well. Vocabulary is adequate for the task, although inappropriacies indicate that the range is restricted. However, the errors which occur in word choice and spelling do not prevent meaning being communicated. Simple and complex sentence forms are used, and although a number of inaccuracies are noticeable in structure and punctuation, communication is rarely affected.

Being a celebrity was not always the easiest way of life. Of course besides all the advantages of being rich, loved and being famous there are many disadvantages, that we have to take into consideration. So, after all it is a quite hard question, and we cannot give an easy answer.

Let's just think of the celebrities, and try to get a few benefits of being well-known. Some of them had had a very long way until they reached their part of life when they are celebrities.

But if we just look into their everyday, we can say that they have a very good accommodation and lifestyle: they have an income of what everyone is dreaming, they live in huge houses, they can buy all the cars they want.

But as the saying says: money is nothing, even they are rich, their personal life is not always so beautiful as it seems. Let's just remember the famous teenager singer Britney Spears. In the beginning she was just like a young girl that everyone wanted to follow. But as time went on, she had some growing personal life problems. She was seen in nightclubs wearing the least dress, once she cut her hair bald, she had alcohol and drug problems. Anyway, being a celebrity is not often easy and beautiful!

Let's just mention the paparazzos. A celebrity cannot go outside his/her house to pick his/her morning newspaper without being photographed. They have to be very careful about their private life, because their fans are following them, and they always have to behave perfectly! And since no one of us is perfect, their fans are quite often disappointed.

After all, taking into the consideration all the advantages and disadvantages, we should say that being a celebrity is not always easy!

TEST B, WRITING TASK 1 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 5** score. Here is the examiner's comment:

The answer addresses all the bullet points but does not cover them adequately, either through insufficient information (the second bullet point) or through lack of clarity (the third bullet point). The purpose of the letter is not always clear. Although organising the letter in line with the bullet points provides some logic, linking devices are not effectively used. Reference and substitution occur but are often unclear. The range of vocabulary is limited but just adequate for the task. While there are no spelling errors, inappropriate word choices and faulty word formation require the reader to make some effort to understand the letter. Complex sentences are attempted, but are mainly limited to 'which' clauses. Frequent grammatical errors and faulty punctuation cause the reader some difficulty.

Dear Sir or Madam

On my recently holiday trip which was in thailand for week. I lost my luggage in which I had too many import documents and my gold watch which I bought from Singapore for someone, which costs me \$1500 australian Dollar. Fortunately this comes under my travel insurance which I did from your Insurance company. I have all details of this watch including Tax invoice receipt.

It happens when we enjoyed in a hotel. Later on we forget our one of the bag in a local taxi we tried to find it but all in vain due to shortage of time.

I would like to request you that I want a claim for it. So In future we being your regular customers by paying all premium and instalments.

I will send you all my policies numbers or other thing in your given address.

Thank you

Yours truly customer

TEST B, WRITING TASK 2 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

What's the happiest time in people's lives: youth or old age; school, career or retirement? All of these have been suggested, but teenage years and adulthood both have many supporters.

Those who believe teenagers are the happiest people cite their lack of responsibilities as a significant factor. They are supported financially and emotionally by their parents, and although they may be included in family decisions, they're not ultimately responsible. However, adolescents are on the threshold of adult life: they're old enough to get a part-time job, so they can enjoy their first taste of financial independence, and their future study and career lie ahead.

Away from these serious concerns, young people have an active social life with their friends, often simply by hanging out with them. And of course, there's the excitement of first love and first heartbreak. With all this to experience, teenagers see their parents' lives as boring and stressful.

However, the reverse is also true. Adults see anxious, self-dramatising adolescents, and appreciate the joys of maturity. These may include a contented family life, long-lasting friendships and a career. Long-term relationships may not have the fireworks of adolescence, but are stronger for it, because of the wealth of shared experience. At work, many of us are challenged and stimulated by the increasing professional skills we acquire, which ensures that our jobs remain interesting.

The greatest benefit, though, is that maturity gives you greater confidence in your own judgement, in all areas of life. You're not afraid to express your opinion when others disagree and, unlike a teenager, you know when to let things go.

Both these periods can be happy times, but I look back at my own teenage years with no desire to go back. Adult life may be less dramatic, but fireworks don't keep you warm.

Audioscripts

TEST 1

SECTION 1

TRAVEL AGENT:	Good morning. World Tours. My name is Jamie. How can I help you?	
ANDREA:	Good morning. I want some information on self-drive tours in the USA. Could you send me a brochure?	
TRAVEL AGENT:	Of course. Could I have your name please?	<i>Example</i>
ANDREA:	Andrea Brown.	
TRAVEL AGENT:	Thank you. And your address?	
ANDREA:	24, Ardleigh Road.	Q1
TRAVEL AGENT:	Can you spell that?	
ANDREA:	A-R-D-L-E-I-G-H Road.	
TRAVEL AGENT:	Postcode?	
ANDREA:	BH5 2OP	
TRAVEL AGENT:	Thanks. And can I have your phone number?	
ANDREA:	Is a mobile alright?	
TRAVEL AGENT:	Fine.	
ANDREA:	It's 07786643091.	
TRAVEL AGENT:	Thank you. And can I ask you where you heard about World Tours? From a friend? Or did you see an advert somewhere?	
ANDREA:	No, I read about you in the <u>newspaper</u> .	Q2
TRAVEL AGENT:	OK, I'll get the brochures in the post to you but can I give you some information over the phone. What kinds of things do you want to do on your holiday?	
ANDREA:	I'm interested in going to California with my family. I've got two children and we want to hire a car.	
TRAVEL AGENT:	OK. We have a couple of self-drive tours there visiting different places of interest in California. The first one begins in Los Angeles and there's plenty of time to visit some of the <u>theme</u> parks there.	Q3
ANDREA:	That's something on my children's list so I'd want to include that.	
TRAVEL AGENT:	Good. Then you drive to San Francisco. From San Francisco you can drive to Yosemite Park where you spend a couple of nights. You can choose to stay in a lodge or on the campsite.	
ANDREA:	I don't like the idea of staying in a tent. It'd be too hot.	Q4
TRAVEL AGENT:	Right. And the tour ends in Las Vegas.	
ANDREA:	OK.	
TRAVEL AGENT:	The other trip we can arrange is slightly different. It starts in San Francisco. Then you drive south to Cambria.	
ANDREA:	Someone told me there's a really nice castle near Cambria. Will we go near that?	Q5
TRAVEL AGENT:	Hearst Castle is on that road so you could stop there.	
ANDREA:	Good. I'd like to do that. Does this trip also go into the desert?	
TRAVEL AGENT:	No, it continues to Santa Monica where most people like to stop and do some shopping.	
ANDREA:	We have enough of that at home so that doesn't interest us.	

TRAVEL AGENT:	OK. Well you could go straight on to San Diego.	
ANDREA:	That's good for <u>beaches</u> isn't it?	Q6
TRAVEL AGENT:	That's right, that's a good place to relax and your children might like to visit the zoo before flying home.	
ANDREA:	I don't think so. We want some time for sunbathing and swimming.	
ANDREA:	So how many days are the trips and how much do they cost?	
TRAVEL AGENT:	The first one I told you about is a self-drive tour through California which lasts twelve days and covers <u>2,020</u> kilometres. The shortest journey is 206 km and the longest is 632 kilometres. The cost is £525 per person. That includes accommodation, car rental and a flight but no meals.	Q7
ANDREA:	OK. And the other trip?	Q8
TRAVEL AGENT:	That lasts nine days but you spend only three days on the road. You cover about 980 kilometres altogether.	
ANDREA:	So is that cheaper then?	
TRAVEL AGENT:	Yes, it's almost a hundred pounds cheaper. It's <u>£429</u> per person, which is a good deal.	Q9
ANDREA:	So that covers accommodation and car hire. What about flights?	
TRAVEL AGENT:	They aren't included. But these hotels offer <u>dinner</u> in the price.	Q10
ANDREA:	OK. Well, thank you very much. I'll be in touch when I've had a chance to look at the brochure.	
TRAVEL AGENT:	I'm pleased to help. Goodbye.	
ANDREA:	Goodbye.	

SECTION 2

On behalf of LP Clubs, I'd like to welcome you all here today. My name's Sandy Fisher and I'm one of the fitness managers here. Before we start our tour of the club I'll just run through some basic information about the facilities we have here, including recent improvements, and explain the types of membership available.

Our greatest asset is probably our swimming pool which at 25 metres isn't Olympic-sized, but now we've expanded it to eight lanes, it's much wider. This means there are rarely more than a couple of people at a time in each lane. Unfortunately, there isn't space for an outdoor pool here but the glass roof on the swimming pool is partly retractable, which means you can enjoy something of the open-air experience on warmer days.

Our recently refurbished fitness suite has all the latest exercise equipment including ten new running machines, and a wide range of weight-training machines. Each member is given full training in how to operate the equipment and there is always a trainer on duty to offer help and advice. Although we do have adult-only times after 6 and at certain times at weekends, children are well catered for. Older children continue to benefit from a wide range of tuition; anything from trampolining to yoga.

One thing all our members appreciate about us is that we take very good care of them. This starts on day one with your personal assessment. You are asked to fill in a questionnaire giving details of any health problems. One of our personal trainers will then go through this with you.

The trainer will then take you through the safety rules for using the equipment in the fitness suite. During your next exercise session a personal trainer will work with you to make sure you understand these. It's very important to do this because we really do want to avoid

having any sports injuries. There's a lot more to looking after yourself than simply lifting weights!

At the end of the personal assessment, the trainer will draw up a plan, outlining what you should try to achieve within a six-week period. This will then be reviewed at the end of the six weeks. Q15

Now, I'll just quickly run through the types of membership we have available. All members must pay a joining fee of £90 in addition to the rates for the monthly membership fees. Q16

Gold membership entitles you to free entry at all LP Clubs. There are now LP clubs in all major cities and towns so if you travel a lot this will be a great advantage. Individual gold membership costs £50 a month and joint membership for you and your partner will cost £75. Q17

Premier membership is for professional people whose work commitments make it difficult for them to use the club during the day and so LP gives booking preferences to Premier members at peak times. This means you will find it easier to book the sessions at times that suit you. Reciprocal arrangements with other LP Clubs are available to Premier members. Premier membership is for individuals only, but you will be sent passes for guests every month. The monthly fee is £65. Q18 Q19

You don't have to have any special clothes or equipment when you visit the club. We provide robes and hairdryers in the changing rooms, but it's very important to remember your photo card because you won't be able to get in without it. Q20

For people who aren't working during the day then ...

SECTION 3

JOHN: Erm ... hello Professor, I'm John Wishart. I'm working on my entry for the Global Design Competition. My tutor said you might be able to help me with it.

PROFESSOR: Ah, yes, I got a copy of your drawings. Come in and tell me about it. What sort of competition is it?

JOHN: Well, it's an international design competition and we have to come up with a new design for a typical domestic kitchen appliance. Q21

PROFESSOR: I see, and are there any special conditions? Does it have to save energy for example?

JOHN: Actually that was the focus in last year's competition. This year's different. We have to adopt an innovative approach to existing technology, using it in a way that hasn't been thought of before.

PROFESSOR: I see, that sounds tricky. And what kitchen appliance have you chosen?

JOHN: Well, I decided to choose the dishwasher.

PROFESSOR: Interesting, what made you choose that?

JOHN: Well, they're an everyday kitchen appliance in most Australian houses but they're all pretty boring and almost identical to each other. I think some people will be prepared to pay a little extra for something that looks different. Q22

PROFESSOR: That's a nice idea. I see you've called your design 'the Rockpool'; why is that?

JOHN: Basically because it looks like the rock pools you find on a beach. The top is made of glass so that you can look down into it.

PROFESSOR: And there's a stone at the bottom. Is that just for decoration?

- JOHN: Actually it does have a function. Instead of pushing a button, you turn the stone. Q23
- PROFESSOR: So it's really just a novel way of starting the dishwasher.
- JOHN: That's right.
- PROFESSOR: It's a really nice design, but what makes it innovative?
- JOHN: Well, I decided to make a dishwasher that uses carbon dioxide.
- PROFESSOR: In place of water and detergent? How will you manage that?
- JOHN: The idea is to pressurise the carbon dioxide so that it becomes a liquid. The fluid is then released into the dishwasher where it cleans the dishes all by itself.
- PROFESSOR: Sounds like a brilliant idea! Your system will totally do away with the need for strong detergents. So what happens once the dishes are clean?
- JOHN: Well, to allow them to dry, the liquid carbon dioxide and the waste materials all go to an area called the holding chamber. That's where the liquid is depressurised and so it reverts to a gas. Then the oil and grease are separated out and sent to the waste system. Q24
- PROFESSOR: It sounds like you've thought it all out very thoroughly. So, what happens to the carbon dioxide once the process is complete? Not wasted I hope.
- JOHN: Actually, that's where the real savings are made. The carbon dioxide is sent back to the cylinder and can be used again and again. Q25
- PROFESSOR: What a terrific idea. Do you think it will ever be built?
- JOHN: Probably not, but that's OK.
- PROFESSOR: Well, I'm sure a lot of positive things will come out of your design.
-
- PROFESSOR: Now, you seem to have thought about everything so what exactly did you need me to help you with?
- JOHN: Well, my design has made it to the final stage of the competition and, in a few months' time, I have to give a presentation, and that's the part I was hoping you could help me with. Q26
- PROFESSOR: Right, well that should be easy enough. What have you managed to do so far?
- JOHN: Well, I've got detailed drawings to show how it will work and I've also written a 500-word paper on it.
- PROFESSOR: I see. Well, if you want to stand a good chance of winning you really need a model of the machine. Q27
- JOHN: Yes, I thought I might but I'm having a few problems.
- PROFESSOR: What is the main difficulty so far? Let me guess – is it the materials?
- JOHN: Yes. I want it to look professional but everything that's top quality is also very expensive. Q28
- PROFESSOR: Look, projects like this are very important to us. They really help lift our profile. So why don't you talk to the university about a grant? I can help you fill out the application forms if you like. Q29
- JOHN: That would be great.
- PROFESSOR: You'd better show me this paper you've written as well. For a global competition such as this you need to make sure the technical details you've given are accurate and thorough. Q30
- JOHN: That would be a great help.
- PROFESSOR: Is there anything else I can do?
- JOHN: Well, I'm really ...

SECTION 4

Today we continue our series on ecology and conservation with a look at a particularly endangered member of the black bear family. One in ten black bears is actually born with a white coat, which is the result of a special gene that surfaces in a few. Local people have named it 'the spirit bear'. And according to the legends of these communities, its snowy fur brings with it a special power. Because of this, it has always been highly regarded by them – so much that they do not speak of seeing it to anyone else. It is their way of protecting it when strangers visit the area. Q31 Q32 Q33

The white bear's habitat is quite interesting. The bear's strong relationship with the old-growth rainforest is a complex one. The white bear relies on the huge centuries-old trees in the forest in many ways. For example, the old-growth trees have extremely long roots that help prevent erosion of the soil along the banks of the many fish streams. Keeping these banks intact is important because these streams are home to salmon, which are the bear's main food source. In return, the bear's feeding habits nurture the forest. As the bears eat the salmon, they discard the skin and bones in great amounts on the forest floor, which provide vital nutrients. These produce lush vegetation that sustains thousands of other types of life forms, from birds to insects and more. Q34

Today, the spirit bear lives off the coast of the province of British Columbia on a few islands. There is great concern for their survival since it is estimated that less than two hundred of these white bears remain. The best way to protect them is to make every effort to preserve the delicate balance of their forest environment – in other words, their ecosystem. Q35

The greatest threat to the bear's existence is the loss of its habitat. Over many years, logging companies have stripped the land by cutting down a large number of trees. In addition, they have built roads which have fractured the areas where the bear usually feeds, and many hibernation sites have also been lost. The logging of the trees along the streams has damaged the places where the bears fish. To make matters worse, the number of salmon in those streams is declining because there is no legal limit on fishing at the moment. Q36 Q37

All these influences have a negative impact on the spirit bear's very existence, which is made all the more fragile by the fact that reproduction among these bears has always been disappointingly low. Q38

And so, what's the situation going forward? Community organizations, environmental groups and the British Columbia government are now working together on the problem. The government is now requiring logging companies to adopt a better logging method, which is a positive step. However, these measures alone may not be sufficient to ensure a healthy population of the spirit bear in the future. Q39

Other steps also need to be taken. While it is important to maintain the spirit bear's habitat, there also needs to be more emphasis on its expansion. The move is justified as it will also create space for other bears that are losing their homes ... Q40

TEST 2

SECTION 1

INTERVIEWER:	Excuse me.	
LUISA:	Yes?	
INTERVIEWER:	I wonder if you could spare a few minutes to do a survey on transport. It won't take long.	
LUISA:	No, that's fine.	
INTERVIEWER:	Lovely. The survey is on behalf of the local council. They'd like to know about what transport you use and any suggestions for improvement. Can I start by asking you how you travelled to town today?	
LUISA:	Sure. I came on the <u>bus</u> .	Example
INTERVIEWER:	Great. Now can I get a few details about yourself?	
LUISA:	OK.	
INTERVIEWER:	What's your name?	
LUISA:	It's Luisa	
INTERVIEWER:	Yes.	
LUISA:	<u>Hardie</u> .	Q1
INTERVIEWER:	Can you spell that, please?	
LUISA:	Yes, it's H-A-R-D-I-E.	
INTERVIEWER:	Great. Thanks. And can I have your address?	
LUISA:	It's <u>19</u> , White Stone Road.	Q2
INTERVIEWER:	Oh, right. I know that area. It's Bradfield, isn't it?	
LUISA:	That's right.	
INTERVIEWER:	Is the postcode GT7?	
LUISA:	It's actually G-T-8, <u>2-L-C</u> .	Q3
INTERVIEWER:	Great. And could I ask what your job is? Are you a student?	
LUISA:	I've actually just finished my training. I'm <u>a</u> hairdresser.	Q4
INTERVIEWER:	Oh, right. And one more question in this section. What is the reason for you coming into town today?	
LUISA:	Actually it's not for shopping today, which would be my normal reason, but <u>to see the</u> dentist.	Q5
INTERVIEWER:	Right. Thanks.	
INTERVIEWER:	Now in this last section I'd like you to give us some ideas about the facilities and arrangements in the city for getting to and from work, er, any suggestions you have for improvements.	
LUISA:	Well, something I've thought about for some time is that when I do walk and I'm doing a later shift, I think <u>the lighting</u> should be <u>better</u> .	Q6
INTERVIEWER:	Yes, good point.	
LUISA:	And of course, I think it's a real shame they've been cutting down on the number of footpaths. They should have more of those. Then people would walk more.	
INTERVIEWER:	Yes, right.	
LUISA:	And, I <u>don't</u> think there are <u>enough trains</u> . <u>That's why I don't use them – you have to wait</u> so long.	Q7
INTERVIEWER:	Thanks. And finally I'd like to ask your opinion on cycling. As you may know, there's a drive in the city to get more people to cycle to work.	

- LUISA: Right.
- INTERVIEWER: But we realise that there are things which the council, but also employers, might do to help encourage workers to cycle to work.
- LUISA: Yep. Well, I have thought about it and where I work there are no safe places to leave your bikes. Q8
- INTERVIEWER: OK.
- LUISA: And also, I'd have to cycle uphill and on a hot day I'd arrive at work pretty sweaty so I think I'd need a shower somewhere at work. Q9
- INTERVIEWER: Right.
- LUISA: And I suppose the last thing is that I wouldn't be all that confident about cycling on such busy roads. I think I'd like to see you offering training for that, you know, I'd feel a lot better about starting if that was the case. Q10
- INTERVIEWER: Well, that's very helpful. Thank you very much for your time.
- LUISA: No problem. Bye.

SECTION 2

Good morning. I'm very pleased to have this opportunity to say a little about two exciting new developments in the city: the Brackenside Open-Air Swimming Pool and the children's Adventure Playground in Central Park. As many of you may know, the idea for these initiatives came from you, the public, in the extensive consultation exercise which the City Council conducted last year. And they have been realised using money from the SWRDC – the South West Regional Development Commission. Q11

First of all, Brackenside Pool. As many of the older members of the audience will remember, there used to be a wonderful open-air pool on the sea front 30 years ago but it had to close when it was judged to be unsafe. For the design of this new heated pool, we were very happy to secure the talents of internationally renowned architect Ellen Wendon, who has managed to combine a charming 1930s design, which fits in so well with many of the other buildings in the area, with up-to-the-minute features such as a recycling system – the only one of its kind in the world – which enables seawater to be used in the pool. Q12

Now, there has been quite a bit of discussion in the local press about whether there would be enough room for the number of visitors we're hoping to attract, but the design is deceptive and there have been rigorous checks about capacity. Also, just in case you were wondering, we're on schedule for a June 15th opening date and well within budget; a testimony to the excellent work of local contractors Hickman's. Q13

We hope that as many people as possible will be there on June 15th. We have engaged award-winning actress Coral White to declare the pool open and there'll be drinks and snacks available at the pool side. There'll also be a competition for the public to decide on the sculpture we plan to have at the entrance: you will decide which famous historical figure from the city we should have. Q14

And now, moving on to the Central Park Playground, which we're pleased to announce has just won the Douglas Award for safety: the news came through only last week. The unique design is based on the concept of the Global Village, with the playground being divided into six areas showing different parts of the world – each with a representative feature. For example, there is a section on Asia, and this is represented by rides and equipment in the shape of snakes, orang-utans, tigers and so on – fauna native to the forests of the region. Q15

Moving south to the Antarctic – we couldn't run to an ice rink I'm afraid but opted instead

for climbing blocks in the shape of mountains – I thought they could have had slides for the glaciers but the designers did want to avoid being too literal! Then on to South America – and here the theme is El Dorado – games replicating the search for mines full of precious stones. And then moving up to North America, here there was considerable debate – I know the contribution of cinema and jazz was considered but the designers finally opted for rockets and the International Space Station. Eastwards to Europe then, and perhaps the most traditional choice of all the areas: medieval castles and other fortifications. Then last, but not least, moving south to Africa and a whole set of wonderful mosaics and trails to represent the great rivers of this fascinating and varied continent.

Q16

Q17

Q18

Q19

Q20

Now, the opening date for our Global Playground is 10th July. And again we'd love to see you there – so make a date and come and see this magnificent, original new amenity right in the heart of the city.

SECTION 3

- VICTOR: Right, well, for our presentation shall I start with the early life of Thor Heyerdahl?
- OLIVIA: Sure. Why don't you begin with describing the type of boy he was, especially his passion for collecting things. Q21 & 22
- VICTOR: That's right, he had his own little museum. And I think it's unusual for children to develop their own values and not join in their parents' hobbies; I'm thinking of how Heyerdahl wouldn't go hunting with his dad, for example.
- OLIVIA: Yeah, he preferred to learn about nature by listening to his mother read to him. And quite early on he knew he wanted to become an explorer when he grew up. That came from his camping trips he went on in Norway I think ...
- VICTOR: No, it was climbing that he spent his time on as a young man. Q21 & 22
- OLIVIA: Oh, right ... After university he married a classmate and together, they decided to experience living on a small island, to find out how harsh weather conditions shaped people's lifestyles. Q23 & 24
- VICTOR: As part of their preparation before they left home, they learnt basic survival skills like building a shelter. I guess they needed that knowledge in order to live wild in a remote location with few inhabitants, cut off by the sea, which is what they were aiming to do.
- OLIVIA: An important part of your talk should be the radical theory Heyerdahl formed from examining mysterious ancient carvings that he happened to find on the island. I think you should finish with that.
- VICTOR: OK.
-
- OLIVIA: All right, Victor, so after your part I'll talk about Thor Heyerdahl's adult life, continuing from the theory he had about Polynesian migration. Up until that time of course, academics had believed that humans first migrated to the islands in Polynesia from Asia, in the west.
- VICTOR: Yes, they thought that travel from the east was impossible, because of the huge, empty stretch of ocean that lies between the islands and the nearest inhabited land. Q25
- OLIVIA: Yes, but Heyerdahl spent ages studying the cloud movements, ocean currents and wind patterns to find if it was actually possible. And another

argument was that there was no tradition of large ship-building in the communities lying to the east of Polynesia. But Heyerdahl knew they made lots of coastal voyages in locally built canoes.

VICTOR: Yes, or sailing on rafts, as was shown by the long voyage that Heyerdahl did next. It was an incredibly risky journey to undertake – sometimes I wonder if he did that trip for private reasons, you know? To show others that he could have spectacular adventures. What do you think, Olivia?

OLIVIA: Well, I think it was more a matter of simply trying out his idea, to see if migration from the east was possible. Q26

VICTOR: Yes, that's probably it. And the poor guy suffered a bit at that time because the war forced him to stop his work for some years ...

OLIVIA: Yes. When he got started again and planned his epic voyage, do you think it was important to him that he achieve it before anyone else did?

VICTOR: Um, I haven't read anywhere that that was his motivation. The most important factor seems to have been that he use only ancient techniques and local materials to build his raft. Q27

OLIVIA: Yes. I wonder how fast it went.

VICTOR: Well, it took them 97 days from South America to the Pacific Islands.

OLIVIA: Mm. And after that, Heyerdahl went to Easter Island, didn't he? We should mention the purpose of that trip. I think he sailed there in a boat made out of reeds.

VICTOR: No, that was later on in Egypt, Olivia.

OLIVIA: Oh, yes, that's right.

VICTOR: But what he wanted to do was talk to the local people about their old stone carvings and then make one himself to learn more about the process. Q28

OLIVIA: I see. Well, what a great life. Even though many of his theories have been disproven, he certainly left a lasting impression on many disciplines, didn't he? To my mind, he was the first person to establish what modern academics call practical archaeology. I mean, that they try to recreate something from the past today, like he did with his raft trip. It's unfortunate that his ideas about where Polynesians originated from have been completely discredited. Q29

VICTOR: Yes. Right, well, I'll prepare a PowerPoint slide at the end that acknowledges our sources. I mainly used *The Life and Work of Thor Heyerdahl* by William Oliver. I thought the research methods he used were very sound, although I must say I found the overall tone somewhat old-fashioned. I think they need to do a new, revised edition. Q30

OLIVIA: Yeah, I agree. What about the subject matter – I found it really challenging!

VICTOR: Well, it's a complex issue ...

OLIVIA: I thought the book had lots of good points. What did you think of ...

SECTION 4

Well, I've been talking to managers in a number of businesses, and reading surveys about the future of management. And what I'm going to present in this seminar is a few ideas about how the activity is likely to change in the next ten years. It isn't a scientific, statistical analysis – just some ideas for us to discuss.

One area I want to mention is business markets, and I'm sure a really significant development will be a major increase in competition, with companies from all round the world trying to sell similar products. Consumers will have much more choice – for instance, food products sold in Australia might be manufactured in the USA, China, Finland and dozens of other countries. At the same time, mergers and takeovers mean that governments are actually losing power to major global corporations. We can probably all think of companies that exert a great deal of influence, which may be good for consumers. A third point I want to make about markets is that in the rapidly expanding economies, such as India, China, Brazil and Russia, demand is growing very fast. This is putting pressure on resources all over the world.

Q31

Q32

Q33

I think businesses are becoming more open to external influences. In particular, companies are consulting customers more and more before making their business decisions. Companies are finding out what they want and providing it, instead of making products and then trying to sell them, which is the model of years ago.

Q34

Another influence is that concerns about the environment will force manufacturers to extend product lifecycles, to reduce the amount of pollution and waste. And in some cases, regulation will need to be strengthened.

Q35

Many societies are much more fluid and democratic, and the structure of companies is changing to reflect that. I think we're going to see a greater emphasis within companies on teams created with a specific project in mind. And when they're completed, the teams will be disbanded and new ones formed.

Q36

More and more people see work as simply one part of their lifestyle, and not the most important one, and as the workforce is shrinking in some countries, businesses are having to compete for staff instead of being able to choose among a lot of applicants. Typical examples that will attract and retain staff are traditional ones like flexible hours and – something that has been made possible by advances in technology – remote working, with people based at their home, abroad, or almost anywhere they choose.

Q37

Management styles will almost certainly continue to change. Senior managers will require a lot more than the efficiency that they've always needed. Above all they'll need great skills in leadership, so that their organisation can initiate and respond to change in a fast-moving world, where they face lots of competing requirements and potential conflicts.

Q38

In most of the world, the senior managers of large businesses are mainly men in their fifties and sixties. The predominant style of management will almost certainly become more consultative and collaborative, caused above all, by more women moving into senior management positions.

Q39

Many of the changes are influenced by developments in the wider economy. The traditional emphasis of business was manufacturing, and of course the service sector is very important. But we shouldn't overlook the growing financial contribution of IP, that is, intellectual property. Some books and films generate enormous sums from the sale of related DVDs, music, games, clothes, and so on.

Another point I'd like to make is that although I've been talking about companies, one trend that they have to face is the move away from people working for the same employer for years. Instead, more and more people are becoming self-employed, to gain the freedom and control over their lives that they're unlikely to get from being employed.

Q40

OK, well that's all I want to say, so let's open it up for discussion.

TEST 3

SECTION 1

DIRECTOR:	Good morning. Welcome to the Early Learning Childcare Centre. How may I help you?	
CAROL:	Hi. I spoke to you last week about enrolling my daughter for next year.	
DIRECTOR:	Oh, yes. I'll just get some details from you. So, you're her mother?	
CAROL:	That's right.	
DIRECTOR:	And, can I have your name?	
CAROL:	It's Carol, Carol <u>Smith</u> .	Example
DIRECTOR:	And your daughter's name?	
CAROL:	It's Kate.	
DIRECTOR:	Now, we have several groups at the centre and we cater for children from three to five years old. How old is your daughter?	
CAROL:	She's three now but she turns four next month.	
DIRECTOR:	<u>I'll put four down because that's how old she'll be when she starts.</u>	Q1
CAROL:	Fine, she's so excited about her birthday and coming to the centre.	
DIRECTOR:	That's good to hear. And what's your address?	
CAROL:	It's <u>46 Wombat Road</u> , that's W-O-M-B-A-T. Woodside 4032.	Q2
DIRECTOR:	And what's the phone number?	
CAROL:	Oh ... it's ... 3345 9865.	
DIRECTOR:	So, have you decided on the days you'd like to bring your daughter here?	
CAROL:	I'd prefer Monday and Wednesday if possible.	
DIRECTOR:	Mmm. I'll check, Monday's fine, but I think the centre is already full for Wednesday. Erm. Yes. Sorry. It seems to be a very popular day. We can offer you a Thursday or a Friday as well.	
CAROL:	Oh dear. <u>I suppose Thursday would be all right</u> because she has swimming on Friday.	Q3
DIRECTOR:	OK, got that. Because a lot of parents work, we do offer flexible start and finish times. We are open from 7:30 in the morning until 6 o'clock at night. What time would you like your daughter to start?	
CAROL:	I need to get to work in the city by 9:00 so <u>I'll drop her off at 8:30</u> . You're pretty close to the city here so that should give me plenty of time to get there.	Q4
DIRECTOR:	That's fine. Now, we also need to decide which group she'll be in. We have two different groups and they're divided up according to age. There's the green group, which is for three- to four-year-olds. And then there's the red group which is for four- to five-year-olds.	
CAROL:	She's quite mature for her age and she can already write her name and read a little.	
DIRECTOR:	Well, I'll put her in <u>the red group</u> and we can always change her to the green one if there are any problems.	Q5
CAROL:	That sounds fine.	
DIRECTOR:	OK. Let's move on to meals. We can provide breakfast, lunch and dinner. As she's finishing pretty early, she won't need dinner, will you give her breakfast before she comes?	
CAROL:	Yes, <u>she'll only need lunch</u> .	Q6

- DIRECTOR: Now, does she have any medical conditions we need to know about?
Does she have asthma or any hearing problems for example?
- CAROL: No. But she does need to wear glasses. Q7
- DIRECTOR: Oh, I'll make a note of that.
- CAROL: Yes, she's pretty good about wearing them, she can't see much without them.
- DIRECTOR: Right. OK. Now, I also need emergency contact details.
- CAROL: So what sort of information do you need?
- DIRECTOR: Just the name and number of a friend or family member we can contact in case we can't get hold of you at any time.
- CAROL: OK. That'd better be my sister ... Jenny Ball. That's B-A-double L. Her Q8
phone number is 3346 7523.
- DIRECTOR: Great. So she is the child's aunt? Q9
- CAROL: Yes, that's right.
- DIRECTOR: I'll make a note of that as well. Now, is there anything you'd like to ask?
- CAROL: What about payment? How much are the fees each term?
- DIRECTOR: Well, for two days and the hours you've chosen, that will be \$450 altogether.
- CAROL: OK, and do I have to pay that now?
- DIRECTOR: No, we send out invoices once the children start at the centre. You can choose to pay at the end of each term or we do offer a slightly discounted rate if you pay every month.
- CAROL: Oh, I'll do that then. I find it easier to budget that way and I'm not used to Q10
the term dates just yet.
- DIRECTOR: Good, it makes it a lot simpler for us as well. Well, that's everything.
Would you like me to show you around ...?

SECTION 2

- INTERVIEWER: Today we're pleased to have on the show Alice Bussell from the Dolphin Conservation Trust. Tell us about the Trust, Alice.
- ALICE: Well, obviously its purpose is to protect dolphins in seas all around the world. It tries to raise people's awareness of the problems these marine creatures are suffering because of pollution and other threats. It started ten years ago and it's one of the fastest growing animal charities in the country – although it's still fairly small compared with the big players in animal protection. We are particularly proud of the work we do in education – last year we visited a huge number of schools in different parts of the country, going round to talk to children and young people aged from five to eighteen. In fact, about thirty-five per cent of our members are children. The charity uses its money to support campaigns – for example, for changes in fishing policy and so forth. Q11 & 12
It hopes soon to be able to employ its first full-time biologist – with dolphin expertise – to monitor populations. Of course, many people give their services on a voluntary basis and we now have volunteers working in observation, office Q11 & 12
work and other things.
- I should also tell you about the award we won from the Charity Commission last year – for our work in education. Although it's not meant an enormous amount of money for us, it has made our activities even more widely publicised and understood. Q13
In the long term it may not bring in extra members but we're hoping it'll have this effect.

- INTERVIEWER: Is it possible to see dolphins in UK waters?
- ALICE: Yes. In several locations. And we have a big project in the east part of Scotland. This has long been a haven for dolphins because it has very little shipping. However, that may be about to change soon because oil companies want to increase exploration there. We're campaigning against this because, although there'll be little pollution from oil, exploration creates a lot of underwater noise. It means the dolphins can't rest and socialise. Q14
- This is how I became interested in dolphin conservation in the first place. I had never seen one and I hadn't been particularly interested in them at school. Then I came across this story about a family of dolphins who had to leave their home in the Moray Firth because of the oil companies and about a child who campaigned to save them. I couldn't put the book down – I was hooked. Q15
-
- INTERVIEWER: I'm sure our listeners will want to find out what they can do to help. You mentioned the 'Adopt a Dolphin' scheme. Can you tell us about that?
- ALICE: Of course! People can choose one of our dolphins to sponsor. They receive a picture of it and news updates. I'd like to tell you about four which are currently being adopted by our members: Moondancer, Echo, Kiwi and Samson. Unfortunately, Echo is being rather elusive this year, and hasn't yet been sighted by our observers but we remain optimistic that he'll be out there soon. All the others have been out in force – Samson and Moondancer are often photographed together but it is Kiwi who's our real 'character' as she seems to love coming up close for the cameras and we've captured her on film hundreds of times. Q16
- They all have their own personalities – Moondancer is very elegant and curves out and into the water very smoothly, whereas Samson has a lot of energy – he's always leaping out of the water with great vigour. Q17
- You'd probably expect him to be the youngest – he's not quite – that's Kiwi – but Samson's the latest of our dolphins to be chosen for the scheme. Q18
- Kiwi makes a lot of noise so we can often pick her out straightaway. Echo and Moondancer are noisy too, but Moondancer's easy to find because she has a particularly large fin on her back, which makes her easy to identify. So, yes, they're all very different... Q19
- INTERVIEWER: Well, they sound a fascinating group ... Q20

SECTION 3

- MIA: Hi, Rob. How's the course going?
- ROB: Oh, hi, Mia. Yeah, great. I can't believe the first term's nearly over.
- MIA: I saw your group's performance last night at the student theatre. It was good.
- ROB: Really? Yeah ... but now we have to write a report on the whole thing, an in-depth analysis. I don't know where to start. Like, I have to write about the role I played, the doctor, how I developed the character.
- MIA: Well, what was your starting point?
- ROB: Er ... my grandfather was a doctor before he retired, and I just based it on him.

- MIA: OK, but how? Did you talk to him about it?
- ROB: He must have all sorts of stories, but he never says much about his work, even now. He has a sort of authority though.
- MIA: So how did you manage to capture that?
- ROB: I'd ... I'd visualise what he must have been like in the past, when he was. Q21
sitting in his consulting room listening to his patients.
- MIA: OK, so that's what you explain in your report.
- ROB: Right.
- MIA: Then there's the issue of atmosphere – so in the first scene we needed to know how boring life was in the doctor's village in the 1950s, so when the curtain went up on the first scene in the waiting room, there was that long silence before anyone spoke. And then people kept saying the same thing. Q22
over and over, like 'Cold, isn't it?'
- ROB: Yes, and everyone wore grey and brown, and just sat in a row.
- MIA: Yes, all those details of the production.
- ROB: And I have to analyse how I functioned in the group – what I found out about myself. I know I was so frustrated at times, when we couldn't agree.
- MIA: Yes. So did one person emerge as the leader?
- ROB: Sophia did. That was OK – she helped us work out exactly what to do, for Q23
the production. And that made me feel better, I suppose.
- MIA: When you understood what needed doing?
- ROB: Yes. And Sophia did some research, too. That was useful in developing our approach.
- MIA: Like what?
- ROB: Well, she found these articles from the 1950s about how relationships Q24
between children and their parents, or between the public and people like
bank managers or the police were shifting.
- MIA: Interesting. And did you have any practical problems to overcome?
- ROB: Well, in the final rehearsal everything was going fine until the last scene – that's where the doctor's first patient appears on stage on his own.
- MIA: The one in the wheelchair?
- ROB: Yes, and he had this really long speech, with the stage all dark except for one spotlight – and then that stuck somehow so it was shining on the Q25
wrong side of the stage ... but anyway we got that fixed, thank goodness.
Yes, it was fine on the night.
-
- ROB: But while you're here, Mia, I wanted to ask you about the year abroad option. Would you recommend doing that?
- MIA: Yes, definitely. It's a fantastic chance to study in another country for a year.
- ROB: I think I'd like to do it, but it looks very competitive – there's only a limited number of places.
- MIA: Yes, so next year when you are in the second year of the course, you Q26
need to work really hard in all your theatre studies modules. Only students
with good marks get places – you have to prove that you know your
subject really well.
- ROB: Right. So how did you choose where to go?
- MIA: Well, I decided I wanted a programme that would fit in with what I wanted Q27
to do after I graduate, so I looked for a university with emphasis on acting,
rather than directing for example. It depends on you. Then about six
months before you go, you have to email the scheme coordinator with

- your top three choices. I had a friend who missed the deadline and didn't Q28
get her first choice, so you do need to get a move on at that stage. You'll
 find that certain places are very popular with everyone.
- ROB: And don't you have to write a personal statement at that stage?
- MIA: Yes.
- ROB: Right. I'll get some of the final year students to give me some tips ... Q29
 maybe see if I can read what they wrote.
- MIA: I think that's a very good idea. I don't mind showing you what I did.
And while you're abroad don't make the mistake I made. I got so involved Q30
I forgot all about making arrangements for when I came back here for
the final year. Make sure you stay in touch so they know your choices for
the optional modules. You don't want to miss out doing your preferred
 specialisms.
- ROB: Right.

SECTION 4

Today, I want to talk about self-regulatory focus theory and how the actions of leaders can affect the way followers approach different situations. Self-regulatory focus theory is a theory developed by Tori Higgins. He says that a person's focus at any given time is to either approach pleasure or avoid pain. These are two basic motivations that each and every one of us has, and they cause us to have different kinds of goals. Promotion goals in Q31
different life situations emphasise achievement. Prevention goals are oriented towards the avoidance of punishment.

In a specific situation, our thoughts might focus more on promotion goals or more on prevention goals. The theory suggests that two factors affect which goals we are focusing on. First, there is a chronic factor. This factor is connected to a person's personality and Q32
 says that each person has a basic tendency to either focus more on promotion goals or focus more on prevention goals as part of his or her personality. Second, there is a Q33
situational factor which means that the context we are in can make us more likely to
focus on one set of goals or the other. For example, we are more likely to be thinking Q34
about pleasure and to have promotion goals when we are spending time with a friend. In contrast, if we are working on an important project for our boss, we are more likely to try to avoid making mistakes and therefore have more prevention goals in our mind.

Research has shown that the goals we are focusing on at a given time affect the way we think. For example, when focusing on promotion goals, people consider their ideal self, Q35
their aspirations and gains. They don't think about what they can lose, so they think in a happier mode. They feel more inspired to change.

When people are focusing on prevention goals, they think about their "ought" self. What are they supposed to be? What are people expecting from them? They consider their obligations to others. As a result, they experience more anxiety and try to avoid situations where they could lose.

Now that I have talked about the two focuses and how they affect people, I want to look at the idea that the way leaders behave, or their style of leading, can affect the focus Q36
that followers adopt in a specific situation. In talking about leadership, we often mention transformational leaders and transactional leaders. Transformational leaders, when
interacting with their followers, focus on their development. In their words and actions Q37

transformational leaders highlight change. Their speech is passionate and conveys a definitive vision. All of these things can encourage followers to think about what could be. In other words, they inspire a promotion focus in their followers. Q38

In contrast, transactional leaders focus on developing clear structures that tell their followers exactly what is expected of them. While they do explain the rewards people will get for following orders, they emphasise more how a follower will be punished or that a follower won't get rewarded if his or her behaviour doesn't change. In short, they emphasise the consequences of making a mistake. This emphasis will clearly lead followers to focus on avoiding punishment and problems. This is clearly a prevention focus. Q39

In conclusion, it is important to understand that one focus is not necessarily better than the other one. For a designer who works in a field where a lot of innovation is needed, a promotion focus is probably better. In contrast, a prevention focus which causes people to work more cautiously and produce higher quality work might be very appropriate for a job like a surgeon, for example. The main point of the research, though, is that the actions of leaders can greatly influence whether people approach a situation with more of a promotion focus or more of a prevention focus. Q40

TEST 4

SECTION 1

- MR THORNDYKE: Thorndyke's.
 EDITH: Good morning. Is that Mr Thorndyke?
 MR THORNDYKE: Speaking. How can I help?
 EDITH: I've got quite a few things which need painting and fixing in the flat and I wonder whether you'd be able to do the work.
 MR THORNDYKE: I'm sure I'd be able to help but let me take down a few details.
 EDITH: Yes, of course.
 MR THORNDYKE: Well, firstly, how did you hear about us?
 EDITH: It was my friend May Hampton. ... you did some excellent work for her a couple of years ago. Do you remember? *Example*
 MR THORNDYKE: Oh, yes, that was in West Park Flats, lovely lady.
 EDITH: Yes, she is.
 MR THORNDYKE: And what's your name, please?
 EDITH: It's Edith Pargetter. Q1
 MR THORNDYKE: Edith ... can you spell your surname, please?
 EDITH: It's P-A-R-G-E-double T-E-R.
 MR THORNDYKE: Double T, right. And do you live in West Park Flats as well?
 EDITH: No, actually it's East Park, Flat 4. Q2
 MR THORNDYKE: Oh, right, that's over the road, I seem to remember – quite difficult to get to.
 EDITH: Yes, it's at the back of the library. Q3
 MR THORNDYKE: Right, I know. And what's your phone number?
 EDITH: 875934 but I'm out a great deal in the afternoons and evenings.
 MR THORNDYKE: So would the best time to ring you be in the morning? Q4
 EDITH: Yes.

MR THORNDYKE:	Fine. I've made a note of that. Can I just ask, I'll be in a van and I know parking's rather difficult round your flats. Where would you recommend?	
EDITH:	Well, I always tell people in larger vehicles to <u>park by the postbox on the other side of the road from the entrance</u> .	Q5
MR THORNDYKE:	Good, thanks.	
EDITH:	And will you be able to give me a full itemised quote?	
MR THORNDYKE:	Oh, yes, I'll <u>list all the jobs separately</u> with individual <u>prices</u> .	Q6
EDITH:	That'd be a great help.	
MR THORNDYKE:	No problem.	
MR THORNDYKE:	Now, what would you like me to do?	
EDITH:	Firstly and most urgently is in the kitchen. With all the weather damage, <u>the glass in the door has cracked</u> and I'd <u>need that fixing ...</u>	
MR THORNDYKE:	<u>I presume you mean replacing?</u>	Q7
EDITH:	Oh, yes. And as soon as possible ...	
MR THORNDYKE:	What I'll do is come round tomorrow morning and do that immediately.	
EDITH:	Thank you so much. The other things aren't so urgent but ...	
MR THORNDYKE:	Now, I'll make a note of everything you want doing.	
EDITH:	Well, in the kitchen I'd like some painting doing.	
MR THORNDYKE:	All the kitchen walls?	
EDITH:	<u>Just the area over the cooker</u> . It's very greasy ...	Q8
MR THORNDYKE:	Right ... it does tend to get that way!	
EDITH:	Yes!	
MR THORNDYKE:	Well, if you want a proper job done what I'd need to do is <u>strip the old paint and plaster it about a week before I paint it</u> .	Q9
EDITH:	Of course. Now, May tells me you also do work in the garden.	
MR THORNDYKE:	That's right.	
EDITH:	Well, I'd like you to <u>replace a fence</u> .	Q10
MR THORNDYKE:	Just one?	
EDITH:	Yes, at the far end.	
MR THORNDYKE:	Fine. Shouldn't be a problem.	
EDITH:	And that's the lot.	
MR THORNDYKE:	Fine. Yeah, as I say I can come round tomorrow morning to look over things with you.	
EDITH:	That's great, thank you.	
MR THORNDYKE:	So, I'll look forward to seeing you tomorrow at ...	

SECTION 2

Welcome to Manham Port, where a thousand years of history are brought to life. All the family can enjoy a day out at Manham: visit our copper mine, see models of the machinery it used, have your photo taken in nineteenth-century costume, experience at first hand how people lived at different stages throughout history, and especially how children studied, worked and played.

The port of Manham is located in beautiful and peaceful countryside, on a bend in the great River Avon, and developed here because it's the highest navigable point of the Avon – boats can go no higher up this river – and proved a handy place to load and Q11
unload cargo to and from the sea, which is over 23 miles away. A small port was already

established here when, about 900 years ago, tin was discovered nearby, though it wasn't until the Industrial Revolution, when a tremendous need for metals of all kinds developed, that Manham expanded to become one of the busiest ports in the country. And because it was already so busy, prospectors began to look for other minerals, and by the end of the nineteenth century, lead, copper, manganese and arsenic were added to the cargos leaving Manham. Q12

In the early days, the ores had been smelted – or processed – in the same area they were mined. But, as demand grew, the smelting process required huge factory furnaces or fires to melt the metal from the rock and there was not enough coal in the local area, so the rocks containing minerals had to be shipped long distances. Q13

Sadly, in the twentieth century, the great port of Manham declined, and thousands of workers were forced to emigrate out of the area. The building at the port fell into disrepair, and the place became almost forgotten. But then, the Manham Trust was formed to conserve the historical resources of the area. It organised scores of local volunteers to remove undergrowth to find the original outlines of the installations. It then brought in paid professionals to match installations with maps of the original port complex and to set about reconstructing it. Q14 Q15
Today you can see the results of this ambitious programme of restoration. The intention, and we believe this will be realised before the end of the year, is to return Manham Port to the condition it reached at its peak as 'the greatest copper port in the country'.

But what can you do and see on your visit today? Here are just a few highlights. We suggest you start with the visit to the copper mine. Travel on converted mining trains and journey into the depths of the mountain along seams once worked by hundreds of miners. Q16 Watch out especially for the great pumping machines which rid the mine of water. But please be warned that, like all mines, ours is very dark and closed in and we do say that children under five and also dogs should NOT be taken into the mine. Q17

The next recommended visit is to the village school. While looking round the classrooms, take a special look at our display of games, which is one of the largest in the world. Q18 Q19 And it's recommended that you time your visit to coincide with a guided tour. This will give you the opportunity to ask lots of questions. Near the school is the beautiful old sailing ketch called 'The George'. You are welcome to board the boat and look round the cabins. Look out for the ship's wheel which was missing until only five years ago when it was dredged out of the silt by a local fisherman. We have no idea how it got there but it's been polished and proudly restored to its original place on the boat. Please take care going down the ladders, if you wish to visit the lower deck – we don't recommend you allow young children to use them. Q20

So we hope you have a memorable visit to Manham Port and will tell your friends all about us.

SECTION 3

TIM: Hi, Laura – could you spare a few minutes to talk about the work placement you did last summer? I'm thinking of doing one myself ...
LAURA: Hi, Tim. Sure.
TIM: Didn't you do yours at an environmental services company?
LAURA: That's right ... It's only a very small company and they needed

someone to produce a company brochure, and I wanted to get some business experience because I'm interested in a career in occupational psychology in a business environment. It was good because I had overall responsibility for the project.

TIM: What kind of skills do you think you developed on the placement? I mean, apart from the ones you already had ... Did you have to do all the artwork for the brochure, the layout and everything?

LAURA: We hired the services of a professional photographer for that. I did have to use my IT skills to a certain extent because I cut and pasted text from marketing leaflets, but that didn't involve anything I hadn't done before.

TIM: Do you think you got any better at managing your time and prioritising things? You always used to say you had trouble with that ... Q21 & 22

LAURA: Oh, definitely. There was so much pressure to meet the project deadline. And I also got better at explaining things and asserting my opinions, because I had to have weekly consultations with the marketing manager and give him a progress report. Q21 & 22

TIM: It sounds as if you got a lot out of it then.

LAURA: Absolutely. It was really worthwhile ... But you know, the company benefited too ...

TIM: Yes, they must have done. After all, if they'd used a professional advertising agency to produce their brochure instead of doing it in-house, presumably they'd have paid a lot more?

LAURA: Oh, yes. I worked it out – it would have been 250 per cent more. And I thought the end result was good, even though we did everything on site. The company has quite a powerful computer and I managed to borrow some scanning software from the university. The new brochure looks really professional; it enhances the image of the company straight away. Q23 & 24

TIM: So in the long run it should help them to attract clients, and improve their sales figures?

LAURA: That's the idea. Yeah.

TIM: Well, all in all it sounds very positive – I think I will go ahead and apply for a placement myself. How do I go about it?

LAURA: It's easy enough to do, because there's a government agency called STEP – S-T-E-P – that organises placements for students. You should start by getting their booklet with all the details – I expect you can download one from their website.

TIM: Actually, they've got copies in the psychology department – I've seen them there. I'll just go to the office and pick one up. Q25

LAURA: Right. And then if I were you, after I'd looked at it I'd go over all the options with someone ...

TIM: I suppose I should ask my tutor's advice. He knows more about me than anyone.

LAURA: One of the career officers would be better, they've got more knowledge about the jobs market than your personal tutor would have. Q26

TIM: OK ...

LAURA: And then when you know what you want you can register with STEP – you'll find their address in the booklet. And once you've registered they assign you to a mentor who looks after your application.

TIM: And then I suppose you just sit back and wait till you hear something?

LAURA: They told me at the careers office that it's best to be proactive, and get Q27

- updates yourself by checking the website for new placement alerts. Your mentor is supposed to keep you informed, but you can't rely on that.
- TIM: I don't suppose it's a good idea to get in touch with companies directly, is it?
- LAURA: Not really ... But it is the company who notifies you if they want you to go for an interview. You get a letter of invitation or an email from personnel departments. Q28
- TIM: And do I reply directly to them?
- LAURA: Yes, you do. STEP only gets involved again once you've been made a job offer.
- TIM: Right ... So, once you've had an interview you should let your mentor know what the outcome is? I mean whether you're offered a job, and whether you've decided to accept it? Q29
- LAURA: That's right. They'll inform the careers office once a placement has been agreed, so you don't have to do that.
- TIM: Is that all then?
- LAURA: More or less. Only once you've accepted an offer you'll probably have to supply a reference, because the placement will be conditional on that. And that's something you should ask your own tutor to provide. He knows about your academic ability and also about your qualities, like reliability. Q30
- TIM: Well, thanks very much for the information – I'm starting to look forward ...

SECTION 4

Today we're going to look at an important area of science, namely nanotechnology. So what is it? Nano means tiny, so it's science and engineering on the scale of atoms and molecules. The idea is that by controlling and rearranging atoms, you can literally create anything. However, as we'll see, the science of the small has some big implications affecting us in many ways.

There's no doubt that nanotechnology promises so much for civilisation. However, all new technologies have their teething problems. And with nanotechnology, society often gets the wrong idea about its capabilities. Numerous science-fiction books and movies have raised people's fears about nanotechnology – with scenarios such as inserting little nano-robots into your body that monitor everything you do without you realising it, or self-replicating nano-robots that eventually take over the world. Q31

So how do we safeguard such a potentially powerful technology? Some scientists recommend that nano-particles be treated as new chemicals with separate safety tests and clear labelling. They believe that greater care should also be taken with nano-particles in laboratories and factories. Others have called for a withdrawal of new nano products such as cosmetics and a temporary halt to many kinds of nanotech research. Q32

But as far as I'm concerned there's a need to plough ahead with the discoveries and applications of nanotechnology. I really believe that most scientists would welcome a way to guard against unethical uses of such technology. We can't go around thinking that all innovation is bad, all advancement is bad. As with the debate about any new technology, it is how you use it that's important. So let's look at some of its possible uses. Q33

Thanks to nanotechnology, there could be a major breakthrough in the field of transportation with the production of more durable metals. These could be virtually unbreakable, lighter and much more pliable leading to planes that are 50 times lighter than at present. Those same improved capabilities will dramatically reduce the cost of travelling into space making it more accessible to ordinary people and opening up a totally new holiday destination. Q34 Q35

In terms of technology, the computer industry will be able to shrink computer parts down to minute sizes. We need nanotechnology in order to create a new generation of computers that will work even faster and will have a million times more memory but will be about the size of a sugar cube. Nanotechnology could also revolutionise the way that we generate power. The cost of solar cells will be drastically reduced so harnessing this energy will be far more economical than at present. Q36 Q37

But nanotechnology has much wider applications than this and could have an enormous impact on our environment. For instance, tiny airborne nano-robots could be programmed to actually rebuild the ozone layer, which could lessen the impact of global warming on our planet. That's a pretty amazing thought, isn't it? On a more local scale, this new technology could help with the clean-up of environmental disasters as nanotechnology will allow us to remove oil and other contaminants from the water far more effectively. And, if nanotechnology progresses as expected – as a sort of building block set of about 90 atoms – then you could build anything you wanted from the bottom up. In terms of production, this means that you only use what you need and so there wouldn't be any waste. Q38 Q39

The notion that you could create anything at all has major implications for our health. It means that we'll eventually be able to replicate anything. This would have a phenomenal effect on our society. In time it could even lead to the eradication of famine through the introduction of machines that produce food to feed the hungry.

But it's in the area of medicine that nanotechnology may have its biggest impact. How we detect disease will change as tiny biosensors are developed to analyse tests in minutes rather than days. There's even speculation nano-robots could be used to slow the ageing process, lengthening life expectancy. Q40

As you can see, I'm very excited by the implications that could be available to us in the next few decades. Just how long it'll take, I honestly don't know.

Listening and Reading Answer Keys

TEST 1

LISTENING

Section 1, Questions 1–10

- 1 Ardleigh
- 2 newspaper
- 3 theme
- 4 tent
- 5 castle
- 6 beach/beaches
- 7 2020
- 8 flight
- 9 429
- 10 dinner

Model and sample answers for Writing tasks

TEST 1, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 4.5** score. Here is the examiner's comment:

The response generally addresses the requirements of the task but there is no clear overview. Key features of the two pie charts are presented but not adequately covered, and there is a tendency to focus on details without referring to the bigger picture. Organisation is evident. The relationship of ideas can be followed (*and, First, but, Secondly, The former, The latter*) but the sentences are not fluently linked to each other. Vocabulary is limited but just adequate for the task. Simple vocabulary is used accurately but the range does not allow much variation in expression. There are noticeable errors in spelling, though these do not cause strain. A limited range of grammatical structures is used; subordinate clauses are rare and most sentences are simple. Even simple sentences often contain errors (*The latter have*), so grammatical errors are frequent and can cause severe strain for the reader. Control over sentence formation is weak.

This chart shows the energy consumption of an average Australian household and how propotion of emitting greenhouse gas in each type of active..

First, the most bigger different informations are using heating and other appliances, relate to 42% and 15%, but they going up side down in gas emittions. which is 15% and 28%.

Secondly, using energy of lighting and refrigeration are similar change in greenhouse gas emittions. The former using 4% energy and produce double number of emittions to 8%. The latter have the same situation about 7% in using energy but emit 14% greenhouse gas.

The last two parts of things are water heating which is second large source of using energy and the smallest cumsuming energy one = cooling. Indeed, there are just a marginally change in greenhouse gas emittions which grow from 30% to 32% and rise from 2% to 3%.

TEST 1, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

One important stage in a child's growth is certainly the development of a conscience, which is linked to the ability to tell right from wrong. This skill comes with time and good parenting, and my firm conviction is that punishment does not have much of a role to play in this. Therefore I have to disagree almost entirely with the given statement.

To some extent the question depends on the age of the child. To punish a very young child is both wrong and foolish, as an infant will not understand what is happening or why he or she is being punished. Once the age of reason is reached however, a child can be rewarded for good behaviour and discouraged from bad. This kind but firm approach will achieve more than harsh punishments, which might entail many negative consequences unintended by the parents.

To help a child learn the difference between right and wrong, teachers and parents should firstly provide good role modelling in their own behaviour. After that, if sanctions are needed, the punishment should not be of a physical nature, as that merely sends the message that it is acceptable for larger people to hit smaller ones – an outcome which may well result in the child starting to bully others. Nor should the punishment be in any way cruel.

Rather, teachers and parents can use a variety of methods to discipline their young charges, such as detention, withdrawal of privileges, and time-out. Making the punishment fit the crime is a useful notion, which would see children being made to pick up rubbish they have dropped, clean up graffiti they have drawn, or apologise to someone they have hurt. In these ways responsibility is developed in the child, which leads to much better future behaviour than does punishment.

TEST 2, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

The two tables contain sales data for Fairtrade coffee and bananas in 1999 and 2004, in five nations of Europe.

The first table shows low-level coffee sales increasing in all five countries, albeit to widely varying degrees. In two places sales increased by the same small amount: 1.8–2 million euros in Denmark, and 0.8–1 million in Sweden. The increment was slightly larger in Belgium, from 1–1.7 million euros. Meanwhile, in Switzerland sales doubled from 3–6 million euros. Finally, in the UK there was an enormous increase, from 1.5–20 million euros.

In the second table, it is Switzerland which stands out as buying far more Fairtrade bananas than the other four countries. Swiss sales figures jumped from 15–47 million euros across these five years, while in the UK and Belgium sales only grew from 1–5.5 and from 0.6–4 million euros respectively. Sweden and Denmark showed a different pattern, with falls in banana sales from 1.8–1 and 2–0.9 million euros.

Comparing the two tables, it is clear that in 1999 Fairtrade coffee sales ranged from 0.8–3 million euros in these five countries, while banana sales also mostly clustered between 0.6 and 2 million euros, with Switzerland the outlier at a huge 15 million euros. By 2004, sales figures for both products had risen across the board, except for Sweden and Denmark which recorded drops in banana sales.

TEST 2, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 3.5** score. Here is the examiner's comment:

This response is too short at only 232 original words, so does not meet the minimum length required for the task. It is difficult to work out what the writer is trying to say, as his/her position is not made clear. The ideas do seem to be relevant, but problems in the writing mean that no part of the task is adequately addressed. Although some linking words and phrases are used, and the paragraphing looks helpful on the page, the order of information is not coherent and the response does not progress clearly to the end. The vocabulary is basic and the writer has only limited control of word formation. The spelling errors cause strain for the reader. Two lengthy phrases have been copied from the writing question paper. Some complex grammatical structures are attempted but are all faulty. Some simple structures are correct but overall errors predominate. Commas, fullstops and capital letters are misused throughout so punctuation is faulty.

All of us agree that all University students have mind can They use to think and choose a way life. The governments need to be better in the future.

The big question? How can we find the answer to realize interested students and the governments?

First of all, who the some people think that all university students should study whatever they like. There are experts. The experts could be give us the result suitable for the students, and drew for Them the good choose. also, should be The government put plan for future. for example, How many pilot, How many teacher or tutor the country need. Moreover, In schools, help students for choose what they like of job. Furthermore, count all the minor together. (together much better)

on the other hand, I think not good idea a drew the way for students. such as, take who finish study in school to study subject we like Not what he like. and the same as me. when I was student, me tutor told me "please study computer science", and my do not like computer science. Now, I will study another subject. I have aim and I can do what I like. I agree with people, who should only be allowed to study subjects that will be useful in the future.

in conclusion, I would like to say that the students have mind. They with our recommend to them. They will be live one of the good lives in countries also the science and technology plays role important in our life.

I hope you

TEST 3, WRITING TASK 1

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 6.5** score. Here is the examiner's comment:

This response reports the data on the bar charts accurately and gives an extended overview at the end. Information is logically organised and there is a clear progression throughout. The message can be followed with ease as a range of cohesive devices are used flexibly. Referencing and substitution are also well managed, however there are lapses in paragraphing. A range of vocabulary is used with no spelling errors, though word choice is not always appropriate (*to seek further study, roughly almost, the percentage on the amount of, overuse of sought*). These errors do not detract from overall clarity but they do reduce the communicative effect. A range of complex structures is also used accurately. Error-free sentences are frequent and only a few mistakes occur (*The graphs represents, we will notice*), so grammar and punctuation are generally well controlled.

The graphs represents what UK graduates and postgraduates did after leaving college in 2008.

On the first graph, it shows that 17,735 graduate students sought part-time employment in 2008 while 3,500 did voluntary work and 29,665 decided to seek further study. According to the graph, 16,235 graduate students were unemployed after college, which is roughly almost the same amount as those who sought part-time work.

On the second graph, we see that 2,535 UK postgraduates did part-time work while only 345 did voluntary work. 2,725 UK postgraduates decided to study further which is slightly more than those who decided to take part-time employment. Lastly, 1,625 UK postgraduate students were not in the work force. The overall trend shows that most of the students, graduates and postgraduates alike, sought out further education while only a small number of students in both groups did voluntary work after leaving college. We will also notice that about a third in each group were unemployed. Lastly, the only difference that we will notice between the two groups is the percentage on the amount of students who went on to do part-time work with only one-third of the total amount in the graduate students and almost one-half with the postgraduate students.

TEST 3, WRITING TASK 2

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

It is said that countries are becoming similar to each other because of the global spread of the same products, which are now available for purchase almost anywhere. I strongly believe that this modern development is largely detrimental to culture and traditions worldwide.

A country's history, language and ethos are all inextricably bound up in its manufactured artefacts. If the relentless advance of international brands into every corner of the world continues, these bland packages might one day completely oust the traditional objects of a nation, which would be a loss of richness and diversity in the world, as well as the sad disappearance of the manifestations of a place's character. What would a Japanese tea ceremony be without its specially crafted teapot, or a Fijian kava ritual without its bowl made from a certain type of tree bark?

Let us not forget either that traditional products, whether these be medicines, cosmetics, toys, clothes, utensils or food, provide employment for local people. The spread of multinational products can often bring in its wake a loss of jobs, as people turn to buying the new brand, perhaps thinking it more glamorous than the one they are used to. This eventually puts old-school craftspeople out of work.

Finally, tourism numbers may also be affected, as travellers become disillusioned with finding every place just the same as the one they visited previously. To see the same products in shops the world over is boring, and does not impel visitors to open their wallets in the same way that trinkets or souvenirs unique to the particular area do.

Some may argue that all people are entitled to have access to the same products, but I say that local objects suit local conditions best, and that faceless uniformity worldwide is an unwelcome and dreary prospect.

TEST 4, WRITING TASK 1

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Salmon begin life as eggs on a pebbly riverbed, hidden among reeds in the slow-moving upper reaches of a river. After five to six months the eggs hatch into 'fry'. For approximately the next four years, these baby salmon will live in the lower, faster-flowing waters of their river. During this time they measure between three and eight centimetres in length.

By the time salmon reach twelve to fifteen centimetres, they are termed 'smolt', and at this time they migrate further downriver into the open sea. After five years at sea the salmon will have grown to adult size, which is between seventy and seventy-six centimetres. They then begin swimming back to their birthplace, where they will lay their eggs, and the cycle starts anew.

In summary, the salmon passes through three distinct physical stages as it grows to maturity. Each of these stages takes place in a very different aquatic location. It is noteworthy that the first two stages of this fish's life occur in a freshwater environment, while the third stage is lived in saltwater.

TEST 4, WRITING TASK 2

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 5.5** score. Here is the examiner's comment:

This script is too short at only 219 words, so fails to meet the minimum word count required by the task. However it does address all parts of the prompt, and presents a relevant position. The main ideas are clear and developed but could be more fully extended and supported. Information is arranged coherently and there is a clear overall progression, with adequate use of linking words (*However, also, Usually, since, but, So*) and paragraphing. The vocabulary is generally adequate and appropriate for the task (*funds, maintain*) and meaning is generally clear. However, misuse of the word *admission* and other slight inappropriacies (*doing a charity*) show a lack of precision in word choice. Many different complex structures are used but there are still fairly frequent errors. However, these rarely impede communication; in general grammar and punctuation are fairly well controlled.

Museums are unique places where you get to experience the history from past to the latest technology. However admission is required when entering.

Museums are popular places to go to on a weekends with family or friends. Admissions are one of the funds which keeps the museum running and also to maintain its exhibits. Without admission museums would be dirty, poorly maintained, and likely impossible to operate, unless funded from goverment or charity.

However admissions are one thing which may keep the customer from entering. Usually we have to pay around \$30 for admissions. Children or family which doesn't earn much simply can not afford such amount. They will go to museum which is free or even not go and experience the greatness of the museum, which I think is horrible because it should be open for everyone.

I think having an admission is a disadvantage since museums should be open for everyone, but admissions are essential for running the museums. So I think it is very important to come up with a plan so that museums could be operated but also be admission free, such as goverment funding or doing a charity. Auckland Museum is one great example. It is one of the biggest museums in New Zealand but it is also free of admission since it's goverment funded.

TEST A, WRITING TASK 1 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

Dear Sally,

My departure date for New Zealand is drawing near, and I am busy with preparations. I have enrolled at an institution called 'ABC English' in Wellington, for a six-month Advanced course, full-time. It is quite expensive but I am hopeful of improving my pronunciation, especially.

To assist in covering the costs of my study, I aim to find a part-time job. Not only are the college fees rather high, but also I know that rental accommodation in the capital city will not be cheap, to say nothing of food and heating expenses! So I would very much like to arrange some temporary employment before I arrive.

I was wondering if you could ask around among your friends and colleagues to see if anyone wants a house-cleaner, gardener, or nanny for their children. I know you have a wide social network in Wellington which you could canvas for me, if you wouldn't mind. I'd be so grateful.

I look forward to seeing you soon.

Best wishes,

Margot

TEST A, WRITING TASK 2 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 5** score. Here is the examiner's comment:

Both parts of the prompt are addressed, although the main ideas and the writer's position could be better developed. No clear conclusions are drawn so there is a lack of overall progression. Organisation is evident but not always logical, and the sentences are not fluently linked to each other, while each paragraph lacks a clear topic. The vocabulary is limited but minimally adequate, with not much variation in expression, and the frequent spelling errors are noticeable and cause some difficulty for the reader. The range of sentence types is limited and rather repetitive. Complex sentences are attempted but tend to be faulty, and there are a number of basic errors. Punctuation is poorly controlled, with underuse of capital letters and fullstops.

I am going to write about how the amount of crime is increasing in many countries and why.

Nowdays there are many countries has increasing on the amount of crime and I think the problem is that most of the crim has done by the young people which is under 18 and from the age you can see and you can understand what is going on but in my openion I think the main causes is the family and the school, the family I mean the mum an dad they have to look after theire tenagers until they grow up and do not let them watch films which has a fight or blod, the school is the same as the second house for the tenagers and they have to teach them how to grow up in good way and teach them how to respect the old people.

For example I have been told from my oldest brother that in the UK 2 years ago a boy from Qatar he is 16 years old has killed by groube of tenagers in Itaisting and they killed him without any reasons and when the Police asked them why did you do that they said we want to show of we are the best. So you can say they learn from the action movies.

Finally I hope all the people can help the tenagers to give them advice and to let them know what will happen after the crime. Also in schools they must teach them how to avoied the bad movies and to grow up in safe way.

TEST B, WRITING TASK 1 (GENERAL TRAINING)

SAMPLE ANSWER

This is an answer written by a candidate who achieved a **Band 8** score. Here is the examiner's comment:

The response addresses all the bullet points very naturally, and expands fully on two of them. The reason for the celebration is covered at the beginning and the end, but could be more fully developed. The message is easy to follow, ideas are logically sequenced and all aspects of cohesion are well managed. The paragraphing is sufficient but could be improved: the three short, single-sentence paragraphs would be better combined into one. A wide range of vocabulary is fluently used to convey precise meanings. There are several spelling errors which do not reduce the communicative effect. A wide range of grammatical structures is accurately used, with full flexibility and control. Punctuation and grammar are appropriate throughout, with no errors.

Dear Sir or Madam,

I am writing to you to express my delight with the excellent service and high quality of food that your restaurant provided us last Saturday night, on the occasion of my 50th birthday.

We were a party of twelve, which included my family, close friends and colleagues from work. Your staff went out of their way to provide seating arrangements that were easily accessible, and did not interfere with other diners. I find that this is unusual in many restaurants these days. The waiters were extremely professional and polite, and were obviously experienced as they did not encroach too much on the proceedings.

Your current menu offers a great deal of choice, as does your wine list, and everything was available. There were no complaints about the quality or quantity of the dishes served, and the presentation of each dish was akin to the dishes produced in shows such as 'Master Chef'.

I ordered the rack of pork ribs, which was deliciously succulent and, if anything, maybe slightly too large. Nevertheless, I managed to finish it!

I was similarly impressed with the large variety of local and International wines available. The wine that was ordered arrived at the correct temperature that each wine should be consumed at. The waiters were familiar with the etiquette of drinking and enjoying fine wines; and the service was paramount.

All-in-all, our group enjoyed a delicious meal at your establishment, and I had a very happy birthday.

Congratulations once again.

Yours sincerely

TEST B, WRITING TASK 2 (GENERAL TRAINING)

MODEL ANSWER

This model has been prepared by an examiner as an example of a very good answer. However, please note that this is just one example out of many possible approaches.

It is true that many parents purchase a multitude of playthings for their offspring. Whether or not this is a good thing for the child, is a moot point. On the face of it the advantages seem most apparent, but could there be a downside to this phenomenon of devoted parenting as well?

Most people would consider children who have many toys to be the fortunate ones. Interesting things to play with stimulate many positives in the young boy or girl, such as optimum brain development, hand-eye coordination and colour recognition, apart from the simple joy of playing. Modern toys are designed to be educational as well as fun, and concerned parents carefully select products which might speed their child's acquisition of numbers or the alphabet.

Is it possible that owning multiple toys could be in any way detrimental to a child? This is an unusual question, but there are some hidden pitfalls. For one, wealthy parents might spoil their son or daughter by showering him/her with toys, resulting in a negative effect on the child's character. For another, a growing child's concentration span may suffer if they are constantly surrounded by too many tempting objects, so that they become unable to focus on any one game for a decent length of time before being distracted. On the social side, older children may become targets of envy from classmates, if they are perceived as having far more possessions than their peers. Finally, the majority of toys today are made of plastic which commonly contains the chemical BPA, proven to be dangerous for infants to suck on or ingest.

It is clear then that this situation is not as straightforward as it first appears. It would seem that one of the many duties of parents is to make an informed choice about how many toys they buy for their young ones.
